1. Introduction

What is Steneum

Steneum is a cryptocurrency or digital asset that is only available in the digital world. It is nearly identical to Bitcoin since it is created based on Bitcoin platform.

Transfer instant Peer to Peer

Steneum is fully decentralized peer to peer cryptocurrency designed to work as a unit of exchange without relying on a central server. It uses open protocol to facilitate secure payment transactions. The storage server is decentralized and distributed- divided into various servers run by each user connected to the network.

Transfer money easily

You can easily send Steneum anywhere in this entire world in seconds as long as it is connected to the internet.

Transfer fee is very small to zero

You can set the transfer fee at \$0. If you want to speed up the transaction you can also set the cost as you wish. The amount of Steneum that you sent will not affect the transfer fee.

Steneum transactions are Anonymous

All transactions that have been done is recorded and displayed in blockchain. Although you can set your identity anonymous, all your transaction is still able to be monitored via steneum blockchain explorer.

Transactions are very easy

You can transfer Steneum to anywhere in the entire world as long as it is connected to the internet. It will be later stored in the Steneum Wallet.

The number of coins is limited

There will only be 20 million Steneum coins worldwide. This resembles an economic system based on deflation and increasing supply coin. Steneum prices will rise as demand grows and the number of coin remains.

Steneum is not controlled by institutions

Steneum uses a Blockchain database that is not controlled by any party. This system allowing digital information to be distributed but not copied. It has no single point of failure. All transactions are recorded live, transparent, and spread across multiple servers.

Bitcoin and Steneum Differences

In the world of cryptocurrencies, Bitcoin and Steneum are not much different, the difference is Opportunity and Price. To have one Bitcoin you have to prepare more usd 7000, Steneum provides a great benefit because the price is still very cheap and you will get an opportunity to get an ICO price .

2.1 Algorithm Script

Script is used in many cryptocurrencies as a proof-of-work algorithm. It was first implemented in Tenebrix (released in September 2011) and served as the basis for Litecoin and Dogecoin, which also adopted its script algorithm. Mining of cryptocurrencies that use script is often performed on graphics processing units (GPUs) since GPUs tend to have significantly more processing power compared to the CPU.

productivity

3. ICO (Initial Coin Offering)

3.1 What is ICO?

ICO stands for Initial Coin Offering. It means earliest coin offered before it is launched in the free market.

3.2 ICO Target

Our goal and objective is to promote Steneum
It aims to provide opportunities to all cryptocurrency enthusiasts to immediately have Steneum at competitive price.

We fully understand about the development of payment instrument nowadays.

Countries have used crypto as a digital payment tool. With the presence of Steneum we strongly believe to become a big part of cryptocurrency world development.

3.3 ICO DURATION

ICO START

ICO FINISH

1st December 2017

1st January 2018

ICO Price

0	- 1,000,000	= \$ 0.15
1,000,001	- 2,000.000	= \$ 0.20
2,000,001	- 3,000.000	= \$ 0.30
3,000,001	- 4,000.000	= \$ 0.40
4,000,001	- 5,000.000	= \$ 0.50

▪▪ICO Distribution : 5 Million

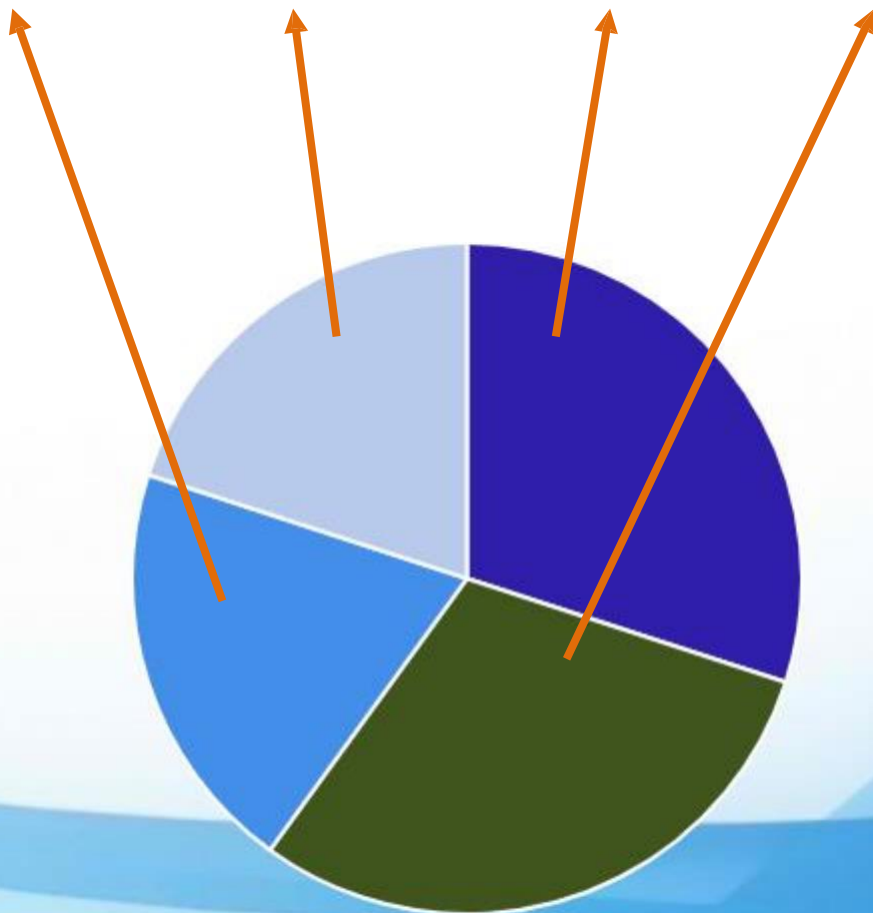

▪▪Coin Supply : 20 Million

3.4 ICO ALLOCATION

Investor	30%
Development	30%
Advertising	20%
Maintenance	20%

4. Why Should You Choose Steneum?

4.1 Benefit

It's a big opportunity of profitable project that we offer. Steneum has prepared concept about cryptocurrency to be brought all over the world. Grab the chance and become part of the big thing.

Saving Program

Early Contribution

Affiliate Program

Early Contribution

Each member has the opportunity to contribute early on taking the ICO opportunities we have prepared through our website and several Partner Exchangers.

5,000,000 STN will be launched with the opening price of USD 0.15 and increasing Volume.

Use your earliest opportunity to have a coin at very low price from us.

A Unique Saving program

Unlike other coins, the steneum is unique. It's a real project that generates real benefit for the team and investors. Steneum does not use fiat like \$ (USD) on Saving program, so if you save 1000 STN, you will get back 1000 STN not \$1000.

The daily commission that will be distributed every day comes from Bitsten market income,

Take an example, you save 1000 STN during the contract period when the price at \$1. When the contract is completed and the current price is \$5 then you can sell $1000 \times \$5$ worth STN. The daily commission that will be distributed every day comes from Bitsten market income

When the Saving contract is completed you can withdraw Steneum or renew your contract at will

You can save all the coin in your wallet. All the coins in the Saving program then will be stored in Bitsten market and will not be traded. The purpose of this System is to diminish the coin circulating in the market. The scarcity will raise the STN price in the market

For example, 20 million of STN supply has been circulated with 8 million of them in public (such as mining, bounty and ICO) and 5 million coins on Saving. It means that the coin circulation on exchange is 3 million

This scarcity will significantly escalate STN price, the fewer coin circulate the more price increasing will happen

The amount of coin in Saving program will not exceed the number of coins in public and the commission of each coin comes from clearly trusted source. By applying this system there will be no money game takes place on Steneneum Saving Program.

Steneum is created to support bitsten.com exchange project, it is used to pay trading fee or enlist new coin and as profit from trading fee on market bitsten. Saving Program is Fluctuated depends on total coin Saving and market bitsten volume.

Formula calculation of profit Saving

Daily profit each 1 STN = $(MV * FEE * 20\%) / \text{Total STN on Saving}$

Example

MV (market bitsten.com volume) = 2000 BTC

FEE market bitsten.com = 0.3%

Total STN on Saving = 2,000,000

$$\frac{2000 * 0.003 * 0.2}{2000000} = 0.00000060 \text{ BTC each STN per Day}$$

With this estimation if STN price is 0.00005000, the daily Saving profit is 1.2%. The daily profit Saving results can change according to the number of Saving and volume market, t h e more bitsten.com market volume the more profit generated.

SAVING RULE

1. There will be no minimum or maximum limitation of coin amount. All coins in your wallet can be saved.
2. Contract of 30,45,60,90 days depend your Saving amount. During Saving contract STN cannot be withdrawn.
3. Daily commission is allotted based on Saving formula
4. Commission is distributed in BTC.
5. Daily commission is available to be withdrawn every day.
6. STN will be given back at the exact amount as which has been deposited when the Saving contract is completed.

AFFILIATE PROGRAM

We prepare Affiliate Bonus to our diligent member in promotion to introduce Steneum to the world.

10% affiliate commission from referral ICO purchase can be withdrawn anytime within BTC or ETH.

4.2 Roadmap and Development

December 2017

- Initial Coin Offering (ICO)
- Beta Test Local Exchanger

January 2018

- Windows Wallet
- Mining
- Available Local Exchange

February 2018

- Saving program
- Available in other exchange
