## 1. DISCLAIMER

THE PURPOSE OF THIS WHITE PAPER IS TO PRESENT THE FOX TRADING PROJECT TO POTENTIAL TOKEN HOLDERS IN CONNECTION WITH THE PROPOSED TOKEN LAUNCH. THE INFORMATION SET FORTH BELOW MAY NOT BE EXHAUSTIVE AND DOES NOT IMPLY ANY ELEMENTS OF A CONTRACTUAL RELATIONSHIP. IT'S SOLE PURPOSE IS TO PROVIDE RELEVANT AND REASONABLE INFORMATION TO POTENTIAL TOKEN HOLDERS IN ORDER FOR THEM TO DETERMINE WHETHER TO UNDERTAKE A THOROUGH ANALYSIS OF THE COMPANY WITH THE INTENT OF ACQUIRING FOX TRADING. NOTHING IN THIS WHITE PAPER SHALL BE DEEMED TO CONSTITUTE A PROSPECTUS OF ANY SORT OR A SOLICITATION FOR INVESTMENT, NOR DOES IT IN ANY WAY PERTAIN TO AN OFFERING OR A SOLICITATION OF AN OFFER TO BUY ANY SECURITIES IN ANY JURISDICTION. THIS DOCUMENT IS NOT COMPOSED IN ACCORDANCE WITH, AND IS NOT SUBJECT TO, LAWS OR REGULATIONS OF ANY JURISDICTION WHICH ARE DESIGNED TO PROTECT INVESTORS. CERTAIN STATEMENTS, ESTIMATES, AND FINANCIAL INFORMATION CONTAINED IN THIS WHITE PAPER CONSTITUTE FORWARD-LOOKING STATEMENTS OR INFORMATION. SUCH FORWARD-LOOKING STATEMENTS OR INFORMATION INVOLVE KNOWN AND UNKNOWN RISKS AND UNCERTAINTIES WHICH MAY CAUSE ACTUAL EVENTS OR RESULTS TO DIFFER MATERIALLY FROM THE ESTIMATES OR THE RESULTS IMPLIED OR EXPRESSED IN SUCH FORWARD-LOOKING STATEMENTS. THIS ENGLISH LANGUAGE WHITE PAPER IS THE PRIMARY OFFICIAL SOURCE OF INFORMATION ABOUT THE FOX TRADING TOKEN LAUNCH. THE INFORMATION CONTAINED HEREIN MAY FROM TIME TO TIME BE TRANSLATED INTO OTHER LANGUAGES OR USED IN THE COURSE OF WRITTEN OR VERBAL COMMUNICATIONS WITH EXISTING AND PROSPECTIVE CUSTOMERS, PARTNERS, ETC. IN THE COURSE OF SUCH TRANSLATION OR COMMUNICATION, SOME OF THE INFORMATION CONTAINED HEREIN MAY BE LOST, CORRUPTED, OR MISREPRESENTED. THE ACCURACY OF SUCH ALTERNATIVE COMMUNICATIONS CANNOT BE GUARANTEED. IN THE EVENT OF ANY CONFLICTS OR INCONSISTENCIES BETWEEN SUCH TRANSLATIONS AND COMMUNICATIONS AND THIS OFFICIAL ENGLISH LANGUAGE WHITE PAPER, THE PROVISIONS OF THIS ENGLISH LANGUAGE ORIGINAL DOCUMENT SHALL PREVAIL. FOX TRADING DOES NOT ALLOW USERS TO AVOID CAPITAL CONTROLS OF ANY KIND AND DOES NOT ALLOW THEM TO INVEST IN ANY FOREIGN ASSETS. PURCHASE OF FOX TRADING TOKEN MAY INVOLVE A HIGH DEGREE OF RISK. SEE RISK SECTION IN THE TERMS AND CONDITIONS OF TOKEN GENERATION EVENT (THE "TERMS"). BEFORE TAKING A DECISION TO PURCHASE FOX TRADING, MAKE SURE YOU ARE CAPABLE TO PROVIDE REPRESENTATIONS AND WARRANTIES SPECIFIED IN THE RESPECTIVE

SECTION OF THE TERMS. THE DISTRIBUTION OF THIS DOCUMENT AND THE OFFERING AND SALE OF FOX TRADING IN CERTAIN JURISDICTIONS MAY BE RESTRICTED BY LAW, AND THEREFORE PERSONS INTO WHOSE POSSESSION THIS DOCUMENT COMES SHOULD INFORM THEMSELVES ABOUT FOXTRADING-WHITEPAPER.PDF AND OBSERVE ANY SUCH RESTRICTIONS. ANY FAILURE TO COMPLY WITH THESE RESTRICTIONS COULD RESULT IN A VIOLATION OF THE LAWS OF SUCH JURISDICTION. FOX TRADING SHALL NOT BE OFFERED OR SOLD TO, OR FOR THE ACCOUNT OR BENEFIT OF, A CITIZEN OR PERMANENT RESIDENT OF UNITED STATES, SINGAPORE AND PEOPLE'S REPUBLIC OF CHINA OR RESIDENT OF A COUNTRY WHERE AMERICAN EMBARGOES AND SANCTIONS ARE IN FORCE, NAMELY IRAN, NORTH KOREA, SYRIA, SUDAN, OR CUBA (TAX OR OTHERWISE), OR TO AN INDIVIDUAL HAVING A PRIMARY RESIDENCE OR DOMICILE IN THE COUNTRIES MENTIONED ABOVE (TAX OR OTHERWISE). IF YOU ARE ONE OF THE AFORESAID, YOU ARE NOT ELIGIBLE TO BUY FOX TRADING IN ANY FORM AND/OR BY ANY MEANS. IT IS YOUR SOLE RESPONSIBILITY TO ENSURE THAT YOUR PARTICIPATION IN THE TOKEN SALE IS NOT PROHIBITED UNDER THE APPLICABLE LEGAL RESTRICTIONS IN YOUR COUNTRY OF RESIDENCE OR DOMICILE.

## 2. INTRODUCTION

### 2.1. Trading revolution with Cryptocurrency

Cryptocurrency trading is growing fast and has expanded to almost every part of the earth.

The cryptocurrency exchange market is similar to that of the stock market, where investors can trade in shares of a company, commodity or fiat currency. However, the stock market proffers many limitations such as trading duration, stock trading regulations, investing rules, and law principles of individual countries. This makes it hard for an ordinary person to gain access, and there will always be a third party with high fees in between you and the market.

The cryptocurrency exchange market has no access restrictions; it is open to any individual, language, region, and country of the world.

The cryptocurrency exchange market can have fluctuations from 5 to 30 percent daily, so cryptocurrency moves considerably up and down each day, and there is no limitation.

As cryptocurrencies market can vary from 5 to 30 percent each day, traders can take advantage of this volatility and make profit. It's just like earning gains on the stock exchange, but with increased free trading because trading in stock markets must occur within the same country.

### 2.2. Automatic trading with robots

A trading robot is created using a computer program based on a set of Forex trading signals to determine whether to buy or sell a currency pair at any given time.

Forex signal systems can create a manual or automatic execution. A manual system includes an operator sitting on a computer screen asking for signals and interpreting whether to buy or sell. The automatic trading system means that the

trader "teaches" the software what signals to search and how to interpret them. It is believed that automated trading operations eliminate a psychological element that is challenging to many traders.

Forex robots are automated algorithms that generate trade signals. Most of these robots are built with MetaTrader using the MQL scripting language, which enables signal trading generation and 100% automatic order placing

## 2.3. Advantages and disadvantages of trading with an algorithm

### 2.3.1. Self-trading

- Low volume of transactions and position fees for each transaction.
- A good trader can earn approx. 20% of annual revenue income.
- You must have a great deal of trading experience.
- You have to waste time monitoring the market.
- Take a higher risk of loss than Robot Trading.

### 2.3.2. Robot Trading

- In automatic trading of cryptocurrency, if trading volume is high, the trading fee will be equal to 0%. For example, Poloniex and Kraken.
- With a good algorithm and a limited number of people using it, Robot Trading has greater profits than self-trading.
- It is a stable trading system for profit, so you do not have to waste time watching your screen 24 hours a day.
- There are no psychological factors that affect your trades.
- There are no psychological factors that affect your trades.
- Everything is automated, including stop loss. In this case, losses are being reduced to a minimum level giving the opportunity to gain more profit than self-trading.

### 3. FOX SIGNALS, A REAL SUCCESSFUL SERVICE

**Yes, Fox Signals is real, and it's already working.**

The majority of ICOs are companies that are just starting up and the viability of the project is not always reached. In our case, we started our project in 2014 and now we want to improve the business and establish ourselves as a company.

In 2014, **after years of experience trading Forex market**, the Fox Team started to work on an algorithm based on technical and fundamental analysis. Some months later, in 2015, Fox Signals started giving trading signals. The platform is specialized in binary options, where the algorithm (with the supervision of our traders) send to the users signals of market opportunities with high accuracy.

In 2016 the platform was improved, offering our customers auto-trading, where the binary signals are executed by a broker automatically, trading signals while you are sleeping, working or in your free time.

From the beginning of 2016 to now, the signals and auto-trading service have given good revenues to our more than 1.5K customers of around 350%.

In the next table you can see the results (**you can also check them on our website <https://foxbinarysignals.com>**). Please notice that the revenues increase depending on the initial investment.

MONTH	ACCOUNT GAIN	MONTHLY PROFIT BASED ON INITIAL BALANCE			
		3.000€	1.000€	500€	250€
YEAR 2016					
February	+ 44 %	1.314 €	438 €	219 €	126 €

### 3.1. If it works, why do you need an ICO?

#### 3.1.1 The next step for Fox Team

After years working on our first project, Fox Binary Signals, we finally decided to expand our service to offer Forex and Cryptocurrencies trading.

From the beginning our goal was to offer a complete service for Forex, as in this market we don't have the limitations of capital and the disadvantages that Binary Options have.

Also, most of our current users are requesting us to change to trading Cryptocurrencies following the recent trend.

Since some months ago, we realised this was the time to change and we want to continue using our algorithm and our traders in the Cryptocurrency and Forex markets. Now is the moment to take this ambitious step forward. Welcome to Smart Trading, welcome to Fox Trading ICO!

### 3.1.2. Most of our current users are requesting a change to cryptocurrency

We receive a lot of requests from our users wanting to receive signals and use our automated system trading Forex and Cryptocurrencies. We are currently developing and testing the algorithm in order to be able to satisfy both our current customers and potential new ones.

The ICO will allow us to improve our service structure and trading algorithm, register our company, comply with all regulations, pay our traders team, be advised from experts on cryptocurrency trading, and also hire a big development team; being able with all to reach customer demands in a timely fashion.

### 3.1.3. Blockchain technology significantly lowers costs to participants

Contributors of Fox Trading ICO will have all the advantages of other cryptocurrencies along with the benefits of the Fox Trading Platform.

- Lower fees for trading on cryptocurrency are directly increasing the profits.
- Transparent distribution, all extra tokens not sold are going to be burned.
- With Blockchain technology the earnings of the robot are completely transparent.

In addition, in the future we planning that the platform is being decentralized, and any user can include their signals/algorithm to by copied.

## 4. FOX TRADING PLATFORM

We want to provide our contributors with a **trading service that will be limited and exclusive**. Ensuring that the algorithm of the robot is not used by many people will maintain the correct performance.

### 4.1. User dashboard and app

With Fox Trading token investors can access the exclusive signal service for Forex and Cryptocurrencies, sent through the web dashboard and the IOS/Android app. Users will receive notifications with all information about the signals when our traders place each order.

In the dashboard, users will also see the global performance of the robot and the profit/loss generated by the Pool.

*Fox Trading BETA platform - Desktop and App*

## 4.2. Algorithm Trading

Fox Trading system is built on one algorithm created by programmers and traders, based on two years of results in the Forex industry, which has been renewed and adapted to Forex and Cryptocurrencies trading. The algorithm is based on MetaTrader 4 (main Forex trading platform) and programmed in MLQ4.

The algorithm provides our traders with clear market opportunities, but they're the ones who finally validate and execute the orders, and send signals to the customers.

**To avoid losing performance on the algorithm, the service is only going to be provided to a limited number of customers.** The algorithm will also work with an amount destined to the Trading Pool.

## 4.3. Trading Pool

Users will be able to deposit in FOXT on the platform, to be managed by our algorithm to generate profits. Profits will be paid as a monthly or quarterly fee in ETH to their assigned wallet - depending on number of investors and funds that we can allocate on it. Users will receive 90% of the profits generated by their funds. *Trading carries risk and you can lose your investments.*

## 4.4 Lifetime membership for ICO investors

**All participants in the ICO will have free and lifetime access to the signals service as long as they hold the tokens.** On the other hand, new users will have to buy tokens to access the service.

All users will have access to the signals, but the **Autotrading service access promotion will only be for Premium users who buy more than 0.5 ETH\* worth of tokens.** This VIP or premium access is given to them, in addition to premium signals, access to future exclusive promotions and extended access to the service.

To benefit our investors, this Premium access will only be available during the ICO, after which there will be no more available slots of this type for sale (they will be able to sell this membership).

\* Can be reviewed at the start of the ICO Presale depending on the ETH price

#### 4.5. Autotrading Service

As we already did in our service for Binary Options, our goal is to offer users an Autotrading platform to enable **copying all of our trades 100% automatically**.

We understand the need of users to be able to follow our performance without sitting all day in front of a computer. That is why, using the APIs that offer the most important cryptocurrency exchanges, **we are going to develop a tool able to generate trades while you sleep or enjoy your free time**.

Of course, by also offering trading signals for Forex, the system will be compatible with the MetaTrader platform, the most common for the majority of standard Forex traders. In turn, due to the current high demand, these brokers have the additional possibility of trading with some of the main cryptocurrencies, offering to trade pairs like BTC/USD or ETH/USD.

**POLONIEX**

 **Kraken**

**BITFINEX** 

**MetaTrader**

## 5. WHY I SHOULD INVEST IN FOX TRADING ICO?

Fox Trading ICO is a way to invest in an algorithm that's already working! **With the initial investment you will receive premium membership and one of the limited access passes to the service.** Once you have this special membership, you are able to earn money combining the different options detailed below. The membership can also be sold to another investor.

The main idea of Fox Trading is to provide all investors with trading options. Depending on your experience in trading, and the time you are able to dedicate to trade, you can choose one of the following options or combine them to optimize your earnings.

1. **Use the signals for trading**, you will receive BUY/SELL signals for Forex and Cryptocurrencies that you can use for manual trading with your broker.
2. **Use Autotrading service.** Users can use some of their Cryptocurrency or Fiat funds with Autotrade algorithm, with all benefits going directly to the investor.
3. **Use Trading Pool.** Users will be able to invest on our algorithm platform with FOXT to make profit with full configurable software.

### 5.1. Platform profitability

Based on the experience on Fox Binary Signals, where we have seen increased interest in the service once it was running, and combined with the exclusive platform, it is a cocktail that will create big demand for the service.

We call Fox Trading an exclusive platform because investors with access to the algorithm signals and autotrading are limited, this exclusivity being controlled by the number of tokens. **If you want to receive the signals or utilize Autotrading, and you did not participate in the ICO, you will need to buy tokens every month.**

Once the algorithm is performing well, increased numbers of investors are going to be attracted to the project, and in that case they must then buy the tokens. **The exclusiveness is also beneficial because it ensures better performance of the algorithm, avoiding large volumes of transactions taking place at the same time.**

## 6. FOX TRADING TOKEN (FOXT)

The Fox Trading Token and Crowdsale smart contracts are deployed on the Ethereum mainnet. FOXT is an UTILITY token, required to access to the service and purchase products on the platform (indicators, robots, guides...). Both contracts have been built on open source library repository and this repository contains all critical logic for both contracts.

These active libraries on all Ethereum networks are responsible for the security of millions of dollars in cryptocurrency assets, and there has been no successful hacking attempt. The source code itself is MIT Licensed and open for review by all developers at all times. No critical security bugs are known to exist in any of the contracts. Compiler Solidity v0.4.18 has been released, but both contracts were compiled using Solidity v0.4.15. Although this is an older version, the compiler chosen is known to produce stable and secure bytecode.

**Fox Trading Token Contract is a standard ERC-20 contract.** The contract uses the TokenLib library and follows the standard with an additional feature, a burn Token function. This function facilitates the ability for any owner to reduce the total supply of Fox Trading Tokens. Additionally, Fox Trading has incorporated this ability to burn unsold crowdsale tokens.

The crowdsale contract uses timestamps and not block numbers. This does not present any significant vulnerability. This may result in the crowdsale ending a few seconds later than advertised. All funds sent to the crowdsale will be made available to Fox Trading upon completion of the sale. Participants should keep in mind that there is a risk of loss if they send Ether from an exchange. Exchanges do not offer the ability to interact with crowdsales in general. A wallet should be created outside of any exchange and Ether should be sent from that wallet to the crowdsale contract.

## 6.1. Token Sale

The launch of Fox Trading and the corresponding Fox Trading token (FOXT) creation process is based on the Ethereum Blockchain.

**The distribution process will consist of two stages**, a Presale of tokens with extra 50% bonus reward and the Main token sale stage. **The process will start with the Presale of the token, which begins on Wednesday 7<sup>th</sup> February 2018 at 15:00 UTC.** For more information on 2 stages, see the DETAILS and PRICING section below.

Participants who want to purchase Fox Trading tokens can do so by sending ETH to a specific contract address (verify it on <https://www.clearify.io/>), and they will automatically receive it into their wallets. In order to finally have these tokens, all users must pass the KYC validation. Comprehensive instructions on participating in this process will be ready before the start of Presale at <https://foxtrading.io>.

Be advised that we'll never send the Crowdsale Contract address via email or direct messages. By participating, the investors are requesting to receive FOXT tokens at the prices listed in the price section below.

As utility token, the number of FOXT distributed depends on the number of users interested in access to the platform. **Really during the ICO contributors are "purchasing" a lifetime license to the service.**

**Extra contribution will do better the platform**, allow us to hire more developers/traders, listing token to more exchanges due their high prices, improve and develop more trading algorithms adapted to different type of investors, add more indicators, introduce trading guides/courses, etc.

## 6.2. FOXT Allocation

There will be a total supply of 10,000,000 Fox Trading tokens, all of which will be issued during the distribution stages. This is the final amount of tokens, and no further tokens can be issued.

**70% of the FOXT tokens** will be awarded for sale to public contributors during token Presale and Main sale.

**15% of the FOXT tokens** will be allocated to the Company's reserve. This reserve will be a source of income for the organization and will be used to cover development and operations. **These tokens will be held for 6 months from the end of the ICO.**

**10% of the FOXT tokens** will be assigned to consultants and partners working on Fox Trading platform.

**5% of the FOXT tokens** will be distributed through our Bounty Program as a marketing initiative reward, bug report and advertisements.

### 6.3. FOXT Pricing

FOXT prices will be nominated in ETH one day before the beginning of the token presale phase. The ETH price of one FOXT token will be calculated using the ETH/USD exchange rate at that time.

#### Token Presale – 7<sup>th</sup> February 2018 at 15:00 UTC:

There is going to be a maximum of 1,000,000 FOXT, at a price of **\$0.34**, sold during this first stage. During the stage, a **50% discount** will be applied to all FOXT tokens, compared to the end of the token sale stage.

The presale will last for 30 days or until the fundraising cap is reached, whichever happens first.

There will be a maximum fundraising cap of \$340,000 for this stage. In case there are any unsold FOXTs remaining from this presale phase, they will be added to the Main Sale cap.

Minimum transaction amount in Ethereum is 0.1 ETH.

#### Token Main Sale – 12<sup>th</sup> March 2018 or at the end of Presale:

During this phase, a maximum of 6,000,000 FOXT will be sold, unless there is FOXT that was not sold out during the previous stage, in which case that would be added to this cap.

At the beginning of this stage there will be a **20% discount** on the first 1 million tokens sold for a maximum of one week.

The next stages will have a decreased award, **15%** for the next 1 million tokens, then **10%** for the next 1 million, and the final price of **\$0.68** for the final ~3 million tokens. Each stage will last a maximum of one week.

There will be a maximum fundraising cap of ~\$4,000,000 for these stages.

Minimum transaction amount in Ethereum is 0.1 ETH.

**Token sale stages details:**

Tokens for sale	Price	Discount	Price with discount	Total
1,000,000 FOXT	\$0.68	50%	\$0.34	~\$340.000,00
1,000,000 FOXT	\$0.68	20%	\$0.54	~\$544.000,00
1,000,000 FOXT	\$0.68	15%	\$0.58	~\$578.000,00
1,000,000 FOXT	\$0.68	10%	\$0.61	~\$612.000,00
3,000,000 FOXT	\$0.68	0%	\$0.68	~\$2.200.000,00
<b>7,000,000 FOXT</b>				<b>~\$4,200,000.00</b>

**There will be a minimum cap of \$500,000** to develop this project. If this is not reached, all investors will have the full amount of their contributions returned to them, minus the transaction cost (GAS) and ICO costs.

The FOXT Token sale phase ends either eight weeks after launch or when the maximum FOXT tokens market cap has been reached.

After the end of token sale phase, if the minimum cap was reached, but not all FOXT tokens were sold, **the remaining unsold FOXT tokens will be burned**. Additionally, **the percentage burned of the token sale will also be matched with other allocations** (exception of the Company Reserve, used to provide liquidity and guarantee access to future users) to balance its distribution.

## 6.4. Crowdsale Distribution

All the token sales income will be used to fund the product launch, ongoing platform development, and user acquisition:

**40% - R&D.** It also includes team development with about 7-12 engineers and programmers. We'll proceed with web dashboard development, robot algorithm improvement, testing, development of iOS/Android applications and robot funding.

**15% - Trading Pool.** Investment fund will be used to try to generate profit with the Fox Trading algorithm. Not related to dividends.

**15% - Marketing expenses** with ad campaigns, presentations and roadshows specific for the region. Participating in commercial digital currency exhibitions, customer tests, etc.

**25% - Capex,** operational costs, study new strategies, algorithm improvements, crypto traders advisors.

**5% - Legal** and compliance fees.

## 7. ROAD MAP

The roadmap is divided into several stages showing the route that the team has taken and expects to have in the following months after the ICO. There is a pre-ICO phase where the initial trajectory of the team is shown to provide investors a more global vision of our success, and the post ICO phase detailing the future stages that will be developed once it ends successfully.

### January 2014

#### **Project Founded**

Fox Binary Signals was a project created by traders for traders. We wanted to contribute our experience on trading to the Binary Options Signals services to provide a quality product at an affordable price so we can help as many traders as possible.

### February 2015

#### **Launched Trading Binary Signals**

After months of hard work developing a real profitable and stable trading method, we finally decided to start with the trading signals. We created a web platform and an iOS/Android app that allows users to receive notifications wherever they are.

We operate directly on the MetaTrader 4 platform and orders are immediately copied to the server to reach all users through our platforms. This system ensures that you receive the signals at the exact moment of execution.

### October 2016

#### **Launched Autotrading for Binary Options**

Once we established the initial service of trading signals and our community started to grow, we decided to add this functionality due to the need of the users who do not really have the time to trade all the signals that we send.

Also, with this system they copy and make profit 24 hours a day while they're sleeping or enjoying free time.

We take advantage of the APIs offered by some Binary Options platforms to do that, and we also programmed an Expert Advisor (EA) to make copy-trade of all our trades on the MetaTrader platform.

### September 2017

#### Starting trading with our algorithm on Cryptocurrencies & Forex

We had planned to upgrade the service to Forex Trading and we were working on the project, but due to the Cryptocurrency boom we also empathize with trading these assets, with which we can generate much more% daily due to the high volatility. Then we started to work to adapt the current algorithm/method to the Forex and Cryptocurrency markets.

We wanted to limit this service to a controlled number of users, so, in turn, we decide to take advantage of the Blockchain revolution to create our own ICO.

As we already said, in the future we planning that the platform is being decentralized, and any user can include their signals/algorithm to by copied to really take advantages and make sense the use of Blockchain technology.

### 7<sup>th</sup> February 2018- 10<sup>th</sup> March 2018

#### ICO Presale

As detailed in this Whitepaper, during this stage the ICO will be opened for the sale of a part of the tokens with an amazing bonus to reward the early investors. A total of 4.5M FOXT tokens that would signify around \$1.5M with which, completing this phase, we would ensure the development of the Project because the Soft Cap is reached at \$500,000.

### March-April 2018

#### ICO Main Sale

Here the rest of the ICO tokens will be sold, also with some % with which we reward our investors. **Everyone who wants to secure a slot in this service, should acquire part of the tokens during this stage.**

## Q2-Q3 2018

### FOXT Token listed on Exchanges

One of the priorities of the team is to list Fox Trading token in most of the exchanges! Social media will be updated once we have new agreements with the exchanges. We are not expecting issues on the listing as we have ERC20 structure which is common in most of the exchanges.

## Q2-Q3 2018

### Final development and improvement of trading algorithm

As we have already mentioned, we have been testing our algorithm for months (mainly in Forex currencies), but we will continue for much of 2018 in the definitive and improved development of this algorithm so that it adapts perfectly to the needs of our investors to take full advantage of cryptocurrency trading.

We will begin to make contact with the APIs of several exchanges to be able to perform algorithm tests directly on their platform.

Results and performance of the algorithm trading will be shown.

## Q4 2018

### Desktop platform and app release (BETA)

In this phase a **first version of the platform will be released** with which you can already access the signals generated by the algorithm, it will be a BETA phase in which users can report problems or provide improvements to the platform.

## Q1 2019

### Launch Autotrading Service (BETA)

Once the web platform and the applications are working correctly, the next stage, following the corrected steps made in our previous service, will be to offer the Autotrading service for our Premium users.

This service will be developed with the maximum possible compatibilities, depending on availability and compatibilities with our trading method, using the APIs offered by the main cryptocurrency exchanges.

In addition, for users who use the MetaTrader platform, a renewed Expert Advisor (EA) copy-trader will still be available with which to copy all the signals in this platform so used by the standard Forex brokers.

## Q1-Q2 2019

### **Final Platform Versions release**

Once several tests have been carried out, possible errors have been fixed and the improvements proposed by the contributors implemented, the final platform will be released.

It will be from this point, where users interested in accessing the service can do so, only and explicitly by purchasing FOXT tokens.

## 8. LEGAL ASPECT

Fox Trading is developing a global platform based on the Ethereum Blockchain where it is possible that certain jurisdictions will apply existing regulations on, or introduce new regulations, which may be contrary to the current setup of the smart contract and which may result in substantial modifications to the smart contract and/or the Fox Trading Platform.

Regulation of proposed activities of the Fox Trading is currently uncertain and there are not only disparities in lending regulatory frameworks in different countries but also may be distinctions within the same country. Fox Trading, in its capacity as intermediary, is not responsible for the activity that its users perform among themselves.

### **Contractual relationship**

Due to the lack of specific cryptocurrencies regulation, the agreement between the users and the company would be conducted on the basis on contract civil law.

### **KYC**

We are neither a financial institution nor a financial intermediary. We are not subject to Anti Money Laundering regulations and additionally ETHER and ERC-20 tokens are not defined as currency, they are considered as a representation of value or means of exchange. Notwithstanding with the foregoing, due to the fact that regulation might follow sooner or later Fox Trading shall conduct On-boarding KYC (know your customer) compliance through the company Sum & Substance, also to verify that the user who wants to purchase tokens does not belong to any of our restricted countries.

Contributions will be converted to FIAT when needed. This being the case, it is vital for Fox Trading to be able demonstrate that we are compliant with anti-money laundering and counter financing of terrorism regulations. The interaction with contractors who are ruled in their work by KYC demands could imply the disclosure of Users KYC information.

## Privacy Protection

Protecting the privacy of Users is a critical element for the Fox Trading.

The General Data Protection Regulation (GDPR) demands greater accountability and transparency from organisations in how they personal information is collected, processed and stored, Fox Trading is developing its own privacy compliance framework to provide a structure for managing personal data we can use to comply with the GDPR.

## Tax

Any amounts that you pay for FOXT Tokens are exclusive of all applicable taxes. You are responsible for determining what, if any, taxes apply to your purchase of Tokens or to any other action or transaction related to the Fox Trading Platform. It is also your solely responsibility to withhold, collect, report and remit the correct taxes to the appropriate tax authorities in such jurisdiction(s) in which you may be able to pay tax.

## 9. CONCLUSION

Based on the information you have read, by investing on Fox Trading, you are investing in a successful service in 2016 and 2017. Now Fox Trading aims to improve and modernize the automatic trading platforms using Blockchain technology, and at the same time share the benefits with the community.

In this way, we will keep the Fox Trading benefits only to a few investors, ensuring the performance and profitability of the service in the future.

Based on our experience, taking into account the current community users of Fox Binary Signals and the boom on cryptocurrencies trading, **we can anticipate that there will be a large number of users interested in investing in Fox Trading.**

***Risk Disclosure.** Trading Forex or Cryptocurrency carries a high level of risk and can result in the loss of all of your investment. As such, trading cannot be appropriate for all investors. You should not invest money that you cannot afford to lose. Fox Trading doesn't retain responsibility for any losses as a result of using our services.*
