DISCLAIMER

The purpose of this White Paper is to present the StreamIt Coin project to potential coin holders in connection with the proposed cryptocurrency launch. The information set forth below may not be exhaustive and does not imply any elements of a contractual relationship. Its sole purpose is to provide relevant and reasonable information to potential coin holders in order for them to determine whether to undertake a thorough analysis of the company with the intent of acquiring StreamIt Coin cryptocurrency and services.

Nothing in this White Paper shall be deemed to constitute a prospectus of any sort or a solicitation for investment, nor does it in any way pertain to an offering or a solicitation of an offer to buy any securities in any jurisdiction. This document is not composed in accordance with, and is not subject to, laws or regulations of any jurisdiction which are designed to protect investors.

Certain statements, estimates and financial information contained in this White Paper constitute forward-looking statements or information. Such forward-looking statements or information involve known and unknown risks and uncertainties which may cause actual events or results to differ materially from the estimates or the results implied or expressed in such forward-looking statements.

This English language White Paper is the primary official source of information about the StreamIt Coin cryptocurrency and platform launch. The information contained here may from time to time be translated into other languages or used in the course of written or verbal communications with existing and prospective customers, partners etc. In the course of such translation or communication some of the information contained herein may be lost, corrupted, or misrepresented. The accuracy of such alternative communications cannot be guaranteed. In the event of any conflicts or inconsistencies between such translations and communications and this official English language White Paper, the provisions of this English language original document shall prevail.

STREAMITCOIN

Whitepaper

INTRODUCTION

StreamIt Coin was created for today's vloggers, video channel owners, and streamers as a modern service, allowing them to reward their subscribers based upon their subscription tier. The StreamIt Bot will shower them coins at regular intervals, allowing channel owners to reward their followers and build their platform 24/7. These coins can both be bought and sold for other cryptocurrencies or fiat money on several crypto exchanges.

CRYPTO SOCIAL MEDIA MARKET RESEARCH

Blockchain technology has revolutionized the internet and many applications of blockchain have been integrated into enterprise solutions, offering more efficiency and transparency.

Social media itself is one of the world's fastest-growing sectors and it has created some huge companies like Facebook, Youtube and others.

Yet, the recent controversy about popular social media platforms, like de-monetizing and shadow banning has ignited a revolution that will lead to more free-speech platforms.

StreamIt Coin aims to be such an innovative player within the broader social media market, a market embedded in our daily lives and growing rapidly. In this market, several blockchain developers aim to become the market leader, offering a vast array of social media-related cryptocurrency projects and platforms.

There are blockchain-based social media platforms like Steemit, where you can earn Steem for posting, curating and commenting. We can say that Steemit pioneered within this market and several spin-offs soon followed.

One of those spin-offs is Narrative.org, a platform that improved on the shortcomings of Steemit and uses KYC (know your customer) technology. Similar to Narrative, Japan's ALIS focusses on niche interest groups and successfully allows people to find content that is not ranked by google, often offering mainstream news.

Memo.cash, an on-chain social media site, launched in 2018, successfully interacts with the Bitcoin Cash network. Honest.cash soon launched a similar project, also using the Bitcoin Cash blockchain.

After researching the social media market, StreamIt was ready for its own and unique platform.

STREAMIT BRINGS CRYPTO TO LIVE VIDEO MARKET

Within the broader social media industry, we now focus more specifically on the live video market, in which Facebook Live claims the biggest market share. It is followed by Instagram Live, Youtube Live, Twitter/Periscope Live, and finally Twitch.

- Facebook Live
- Instagram Live
- Youtube Live
- Twitter/Periscope Live
- Twitch
- Not using

STREAMIT BOT AND PLATFORM

Unlike many developers, who decided they could easily make a brand new social media outlet and combine those efforts with the integration of the innovation that blockchain offers, we, the StreamIt developers chose wisely to offer existing social media platforms access to our technology: the StreamIt Bot and Platform.

STREAMIT BOT

To make streaming or vlogging a full-time career, there are some challenges to be met. Besides each platform's strict content rules, one of the biggest hurdles for the streaming community is to get the involvement of their following base and subscribers.

StreamIt Bot will help you to keep your base excited by allowing them to receive StreamIt Coins as a reward for them to watch your channel's content. None of today's market players the likes of Facebook Live, Youtube Live and others offer their content creators' followers any rewards.

Instead rewards only go to the content creators. StreamIt now offers a much-needed solution to this gap in the social media live video market. StreamIt's Video Bot @streamit tips and rains anybody watching your channel, as ordered by you, the content creator.

People do not need to register their emails, only you, the content creator need to register on our web dashboard in order to successfully grow into a registered streamer. When you register, your account is given a unique StreamIt wallet address and a private key. We do offer an extra layer of security by offering the option of Two Factor Authentication (2FA) via email thus ensuring your account's security.

STREAMITCOIN

Whitepaper

STREAMIT PLATFORM

As a registered StreamIt streamer, you can use our StreamIt Platform and set rewards for your subscribers, grouping by tiers 1-3. You are also able to set rewards for your non-subscribers who come by to watch your stream.

This will allow you to grow your channel. StreamIt is very user-friendly:

- ✓ Set the amount
- ✓ Set the tier
- ✓ StreamIt Bot will now work for you

The dashboard also allows you to view the statistics and all transactions and allows you to set up a time-ban or permanently ban trolls. You can run competitions and tip active participants. Check out the Idle vs Watch time, set rewards for multiple channels, tip an individual person, make surprise or planned rains in your channel, view transactions and make deposits or withdrawals.

- ✓ You can ban trolls
- ✓ Run a competition
- ✓ View statistics
- ✓ Make deposits and withdrawals

THE STREAMIT BOT WORKS FOR YOU

How does the StreamIt Bot serve you?

Registered StreamIt streamers will be able to let the Bot work for them, 24/7. You simply buy StreamIt Coins on an exchange and send them to your StreamIt account coin address. Once they show on your balance it is time to make your money work for you. You simply set the rewards for your subscribers and viewers, allow the StreamIt Bot access to your channel and he will now work for you.

What does the Bot do?

The StreamIt Bot monitors your channel's activities 24/7.

As soon as a stream goes live, it starts counting every user's view time by checking their presence every 30 seconds. After every 30 seconds iteration, if a viewer is still viewing your channel, they are given an additional 30 seconds as their idle time for that channel.

Let us show you an example:

if you have set 2 StreamIt coins for a nonsubscriber,
10 StreamIt coins for a Tier 1,
20 coins for Tier 2
and 30 coins for Tier 3,
with an hourly reward time,

once a viewer with non-subscription or a Tier-subscription idle time reaches 1 hour they are gifted the coins released to them from your deposited funds.

Every time a reward is paid, a log is registered in your dashboard for both Streamer and receiver. The viewers will receive Direct Messages (DM) via Youtube Super chat or Twitch chat, showing they received the reward. They can then withdraw their coins to their wallet and exchange them at any time in a crypto exchange.

STREAMIT DASHBOARD - ANALYTICS

For optimal results when using the StreamIt Bot, a wide range of analytic data is available.

You will be able to use analytic data by:

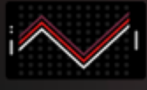

- demography;
- view time;
- traffic source;
- popularity;
- action;
- spent vs earned.

This data is important for you to calculate the ideal settings, allowing your channel the optimal return on investment.

STREAMIT DASHBOARD – ANALYTICS & MORE

Analyze By Demography – StreamIt dashboard gives you in- depth analysis of the traffic that follows you by age, location, gender, country, etc.

Analyze By View Time – StreamIt dashboard gives you in- depth analysis of your content views by duration of each video watch time, thus making it easy for you to understand the sentiment of your viewers.

Analyze By Traffic source – StreamIt dashboard gives you in- depth analysis of the source of traffic to your videos. Whether your video was recommended by the platform or if it was through external sources, this insight lets you strategize your marketing spend for upcoming streams.

Analyze By Popularity– StreamIt dashboard allows you to see how your video has been fairing by giving you an insight of the number of shares your video link had.

Analyze By Action – StreamIt dashboard helps you understand the actions that further boosted your videos like viewer response to your end links or clicks on your tagged links, etc.

Analyze Spent vs Earned – StreamIt dashboard allows you to have complete analysis of the coins earned vs spent along with suggestions to how you can earn more or when you need to top up the wallet for more giveaways.

Whitepaper

STREAMIT MASTERNODE AND PROOF OF STAKE

What is StreamIt Proof of Stake?

StreamIt developed Proof of Stake (PoS) which is an algorithm that allows a cryptocurrency's blockchain to achieve distributed consensus without relying on the vast computation required in Proof of Work (PoW). Theoretically, this protocol has two main advantages over PoW: It's more energy-efficient and immune to centralization.

StreamIt allows up to 30% of the Block Reward for Staking, allowing people without a MasterNode to earn a passive income if they hold STREAM in their wallet.

What is a StreamIt MasterNode?

Without nodes, a blockchain can not function. A masternode is a special full node and typically processes transactions that occur on the blockchain, 24/7. To continuously process transactions, a masternode requires a lot of computer memory and collateral. The StreamIt MasterNode requires a collateral of 20.000 STREAM. The memory is simply computing power, the collateral is the number of coins required to run the masternode. To run a masternode, most people turn to a VPS server, to set up a dedicated IP-address.

What is a VPS and dedicated IP address?

A VPS, also known as a Virtual Private Server is a virtual machine provided by a web hosting company and runs on its own operating system (OS). It provides admin rights and root access to clients who can install almost any required software, for example, a masternode.

A dedicated IP address is a unique Internet Protocol (IP) address and is assigned exclusively to a single hosting account. It offers you access to your website even when the DNS is not set up, it provides increased speed during high traffic load and brings increased security.

If you decide to buy a StreamIt Coin MN, the Team of StreamIt will help you set it up properly so you can start earning a passive income!

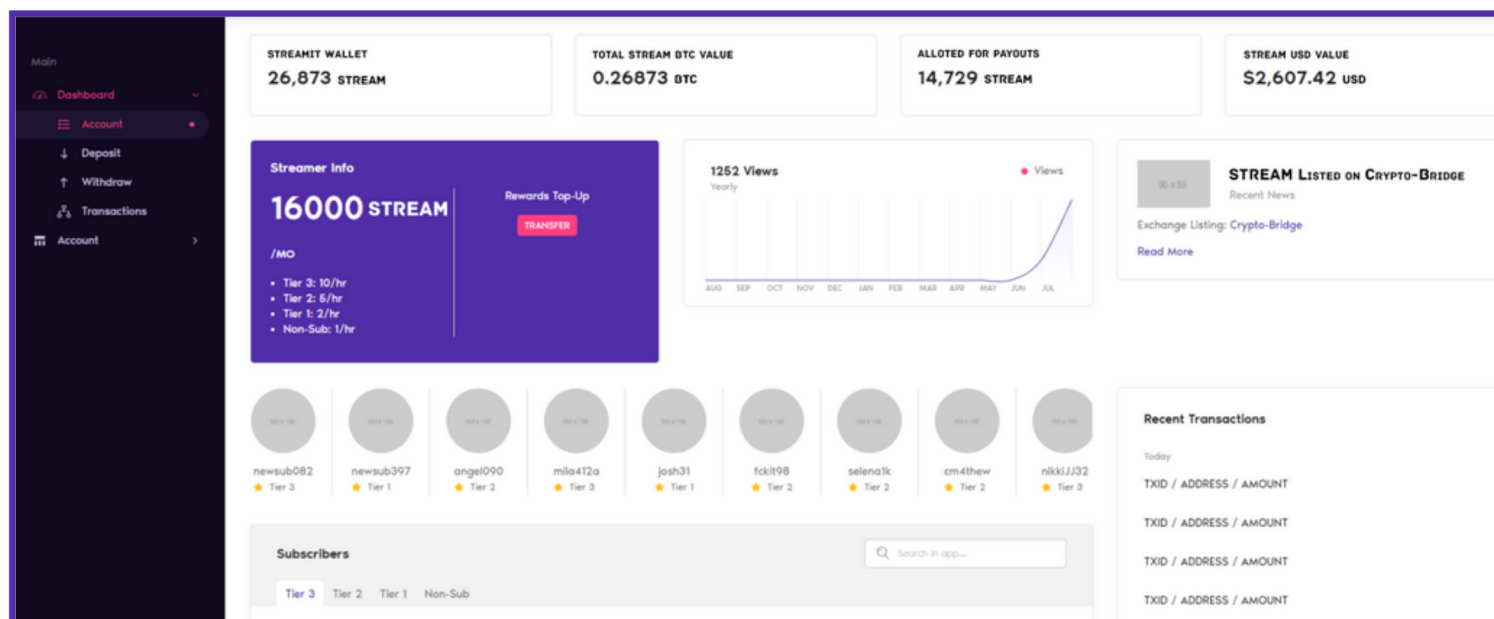

STREAMITCOIN Whitepaper

STREAMIT TWITCH BOT

The StreamIt TwitchBot is already alive and kicking. In the below image you see the TwitchBot Dashboard.

The TwitchBot Dashboard is a powerful solution for growing your channel. It offers you all the necessary data you might need to set up an ideal campaign.

Available Dashboard Data:
Total STREAM Wallet balance in STREAM;
Total Wallet Balance in BTC;
Total STREAM allocated for Payouts;
Total Wallet Balance in USD.

Furthermore, you can check all transactions, related to its Tiers, (tiers go from non-subscribers to tier1, tier 2 and tier 3);
You can check the total views infographic;
and even select individual people.

The TwitchBot Dashboard is your personal channel optimization tool!

STREAMITCOIN Whitepaper

STREAMIT TWITCH BOT COMMAND LIST

The StreamIt TwitchBot comes with an easy-to-use set of commands. You simply put in the desired commands and let the bot work for you, 24/7.

The screenshot displays the Streamit TwitchBot interface within a Twitch chatroom. On the left, a sidebar shows 'Gevolgde kanalen' (Following channels) with 'streamit_bot' listed as 'Offline'. Below it, 'Aanbevolen kanalen' (Recommended channels) lists 'Asmongold' (82,304 followers), 'shroud' (14,353 followers), and 'NICKMERCS' (27,188 followers). The main chat area is titled 'streamit_bot' and shows a 'Command List' on the left and 'STREAMIT COIN OFFICIAL BOT' on the right. The 'Command List' includes commands like \$help, \$reg, \$bal, \$addy, \$w, \$t, \$r, \$s, \$dis, and \$rain. The 'STREAMIT COIN OFFICIAL BOT' section explains that Streamit is a service for streamers to give rewards to subscribers based on their subscription tier. It also provides instructions on how to add the bot to a channel using the \$reg command and how to remove it using the \$dis command. The chatroom title is 'Welkom in de chatroom!' and there is a 'Chat' button at the bottom right.

A successful Streamer needs to be able to multitask: from handling content production, ensuring product quality, talking to the chat, and more, the utilization of TwitchBot enables this in a consumer-friendly way.

With a set of commands, located in the Command List, our TwitchBot offloads some of your workload, allowing you more time to entertain and grow your audience.

As Streamers integrate interaction with their audience to fully profit from their work's potential, we designed short bot commands, making their usage fast, as well as taking in account the amount of space available in the chatbox.
