1. Abstract

In this bustling of life, everyone needs different entertainment areas to make life spend easier.
On the other hand, the cryptocurrency is very interesting not only in terms of blockchain technology but also making income for everyone.
Therefore, we decide to combine these things together and we generate 808TA token to satisfy all.

2. Introduction 808TA Token

808TA token is a standard ERC-20 token and based on ETH network. Ethereum smart contracts execute the financial transfers of 808TA token and all sub-tokens. They are driven by all events from the 808TA token and all sub-tokens.

808TA is also supported by a lot of wallets such as: MetaMask, Trust Wallet, MEW wallet, Enjin wallet,... Therefore, people can manage their assets easily with only one interface.

Our plan is making 808TA become a central token with many other sub-tokens. Each sub-token will be used on specific decentralized application (Dapp). And 808TA will become the main token that generate all sub-tokens through staking 808TA progress.

These things will make our 808TA Ecosystem bigger day by day without any inflation, more secure and fast.

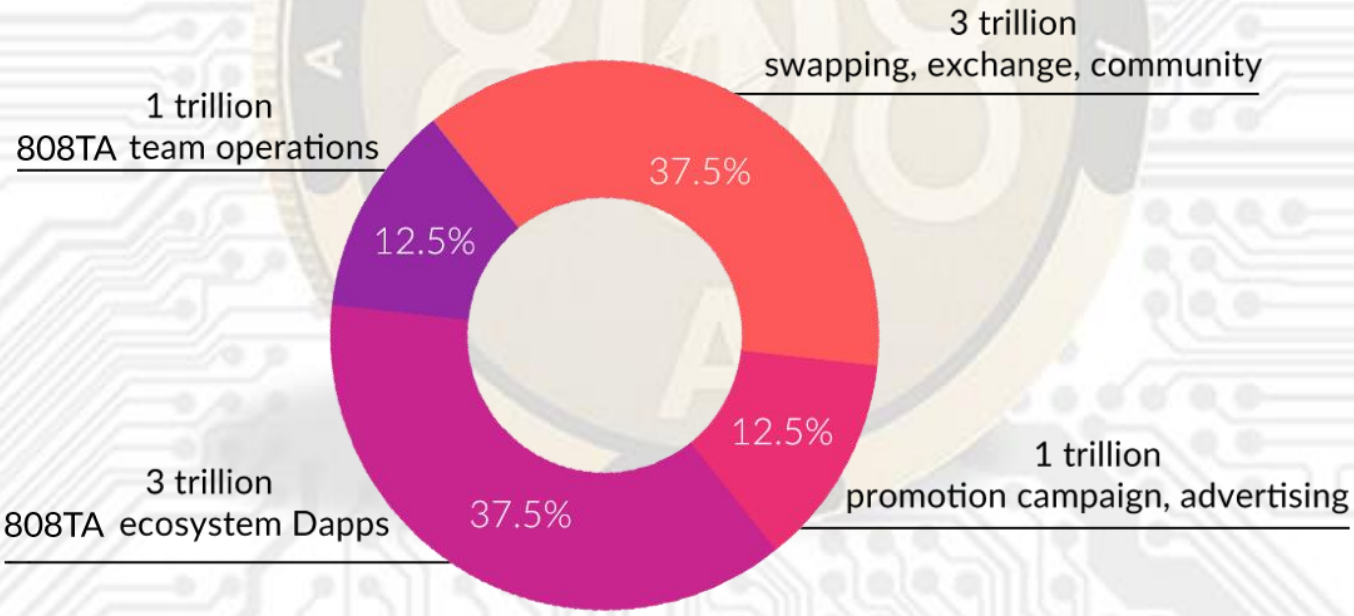
And we also need a large amount of 808TA for all passions we aim:

- Payment method.
- Trading on Exchange.
- Game Dapp, Entertainment Dapp.
- Betting platform.

3. 808TA Token distribution

The 808TA token max supply is 8,080,808,080,808 (8 trillion) and we plan to distribute following:

- 3 trillion for swapping, exchange, community.
- 1 trillion for promotion campaign and advertising.
- 3 trillion for 808TA Ecosystem Dapps development.
- 1 trillion for 808TA token team operations.



4. Our roadmap to launch and scale up

Q1 – 2019: Oganization and Development

- Oganize the 808TA team.
- Orientation and planning for 808TA project.
- Develop 808TA token smart contract.
- Design new website and logo.

Q2 – 2019: Announcement and Rebuild 808TA community

- Deployment 808TA contract to main network.
- Announce new official logo and website.
- Grow 808TA community by swapping the old 808Coin to new 808TA Token.
- Find operation partners for using 808TA on their services.

Q3 – 2019: Listing on exchange and Planning for Dapps

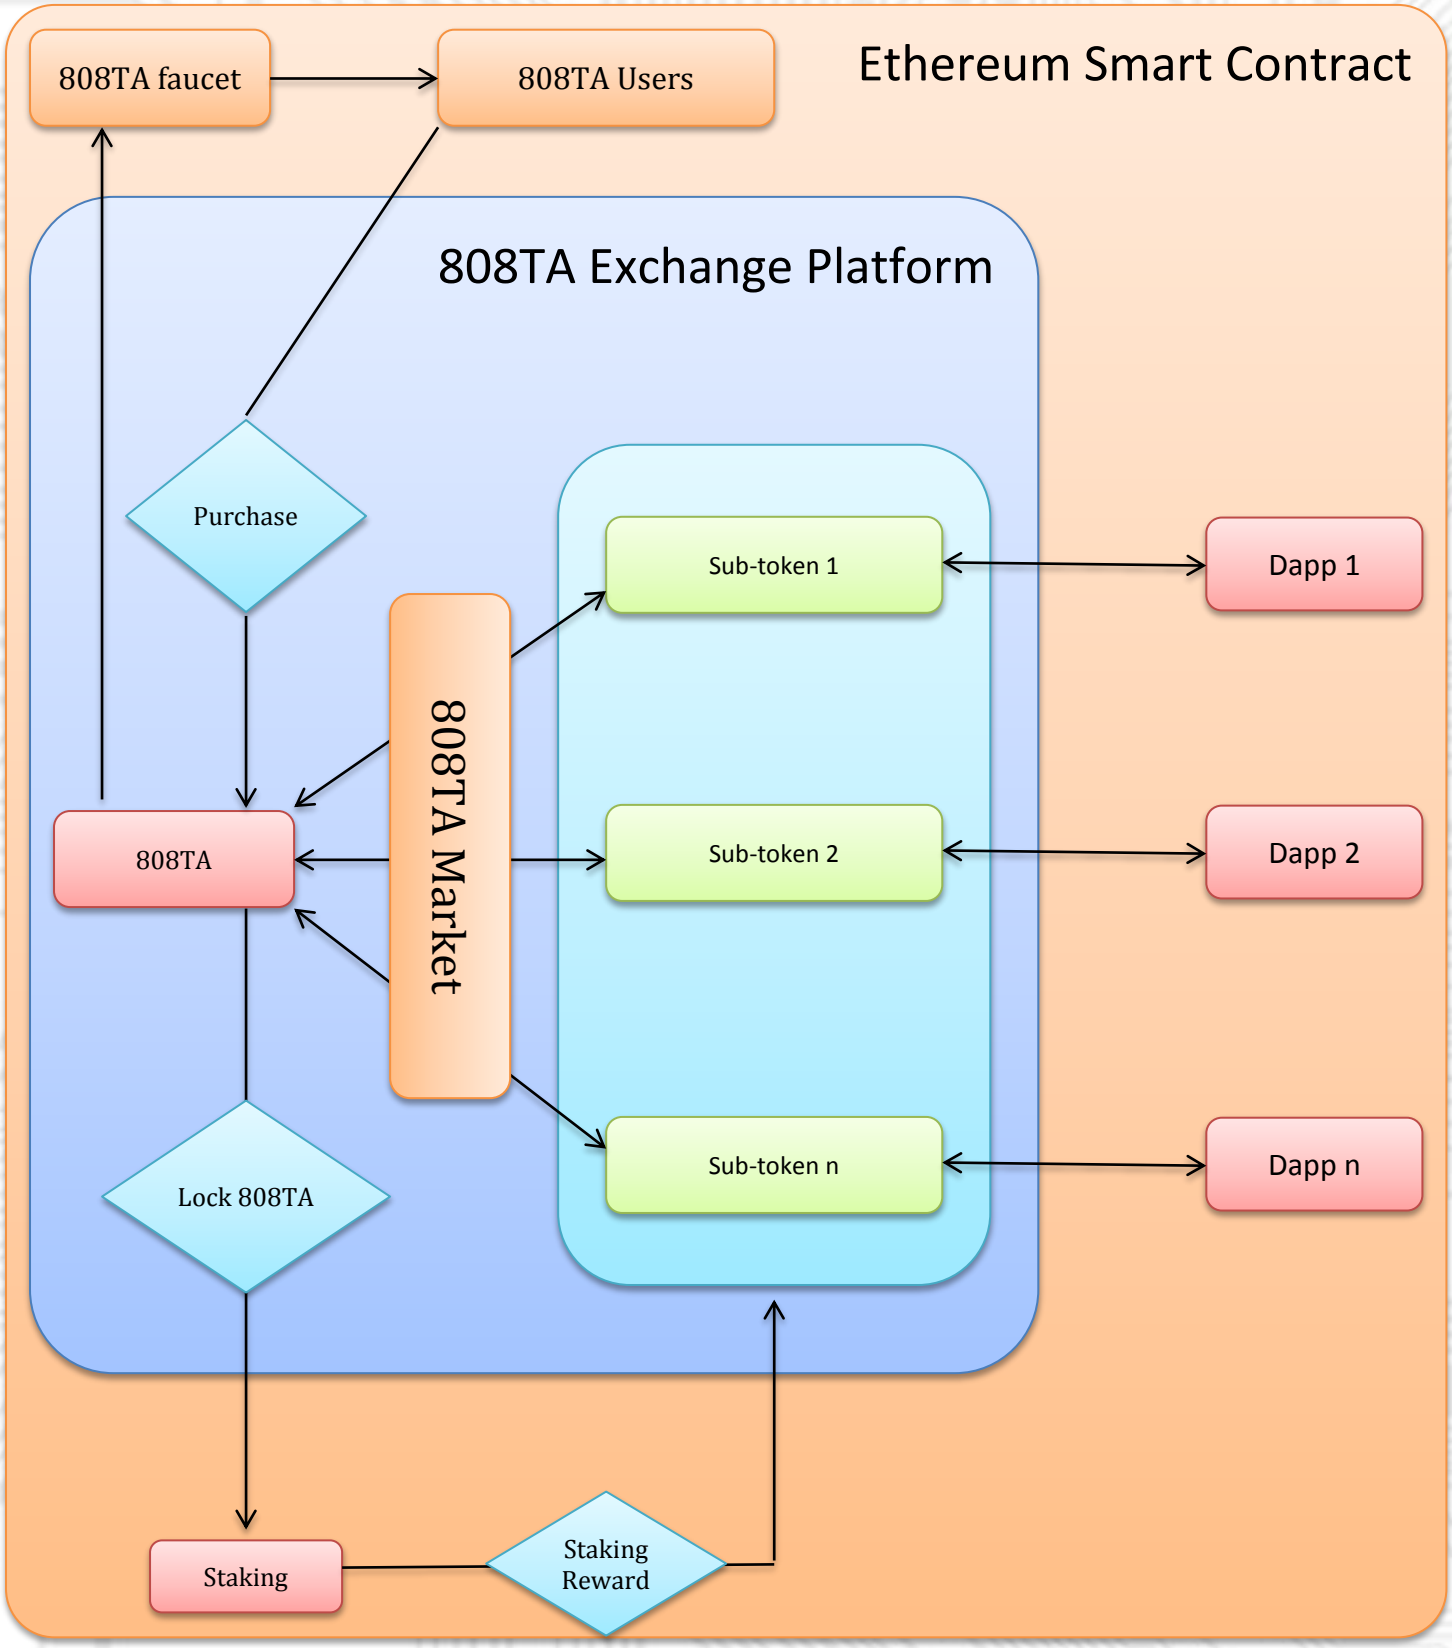
- Planning for listing on exchanges.
- Develop our 808TA faucet for community.
- Planning our Dapps.

Q4 – 2019: Update 808TA Ecosystem

- Update our 808TA smart contract for staking.
- Develop our sub-token Dapps.
- Develop our own exchange platform that allow trading between satellite-token and 808TA.

Q1 – 2020: Announce 808TA betting platform
Coming soon…

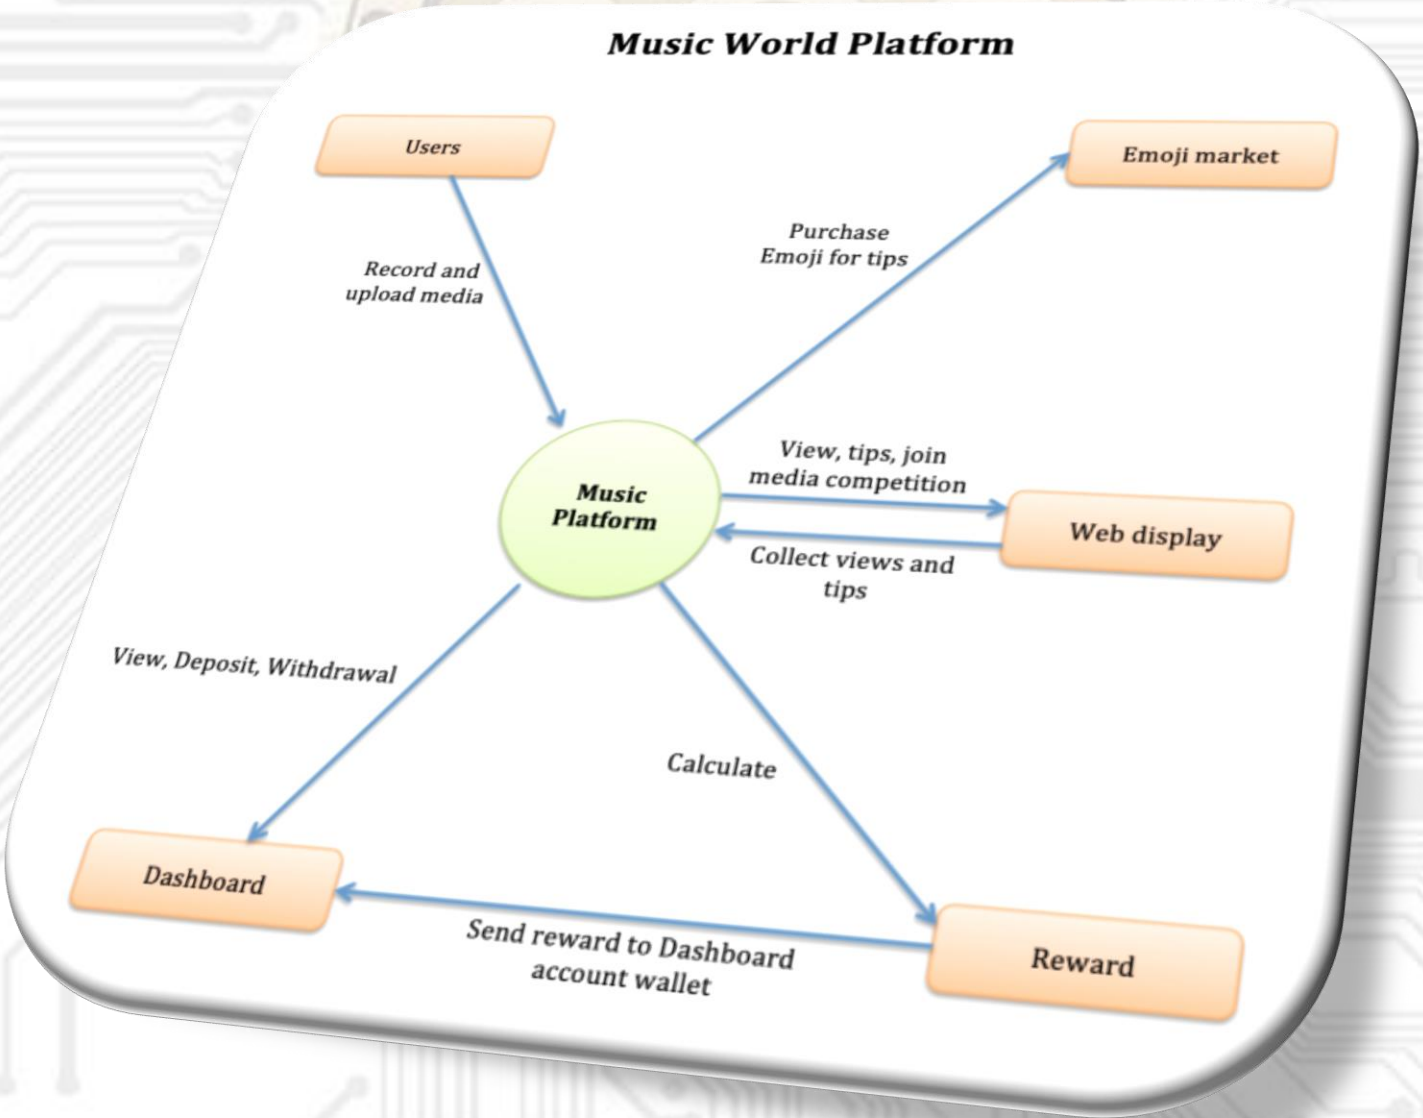
5. How does 808TA model works?



6. Our Dapp plans

We announce 3 big Dapps and 3 sub-tokens in this phase:

a) Music World Platform (808TM sub-token):



b) Betting World Platform (808TB sub-token):

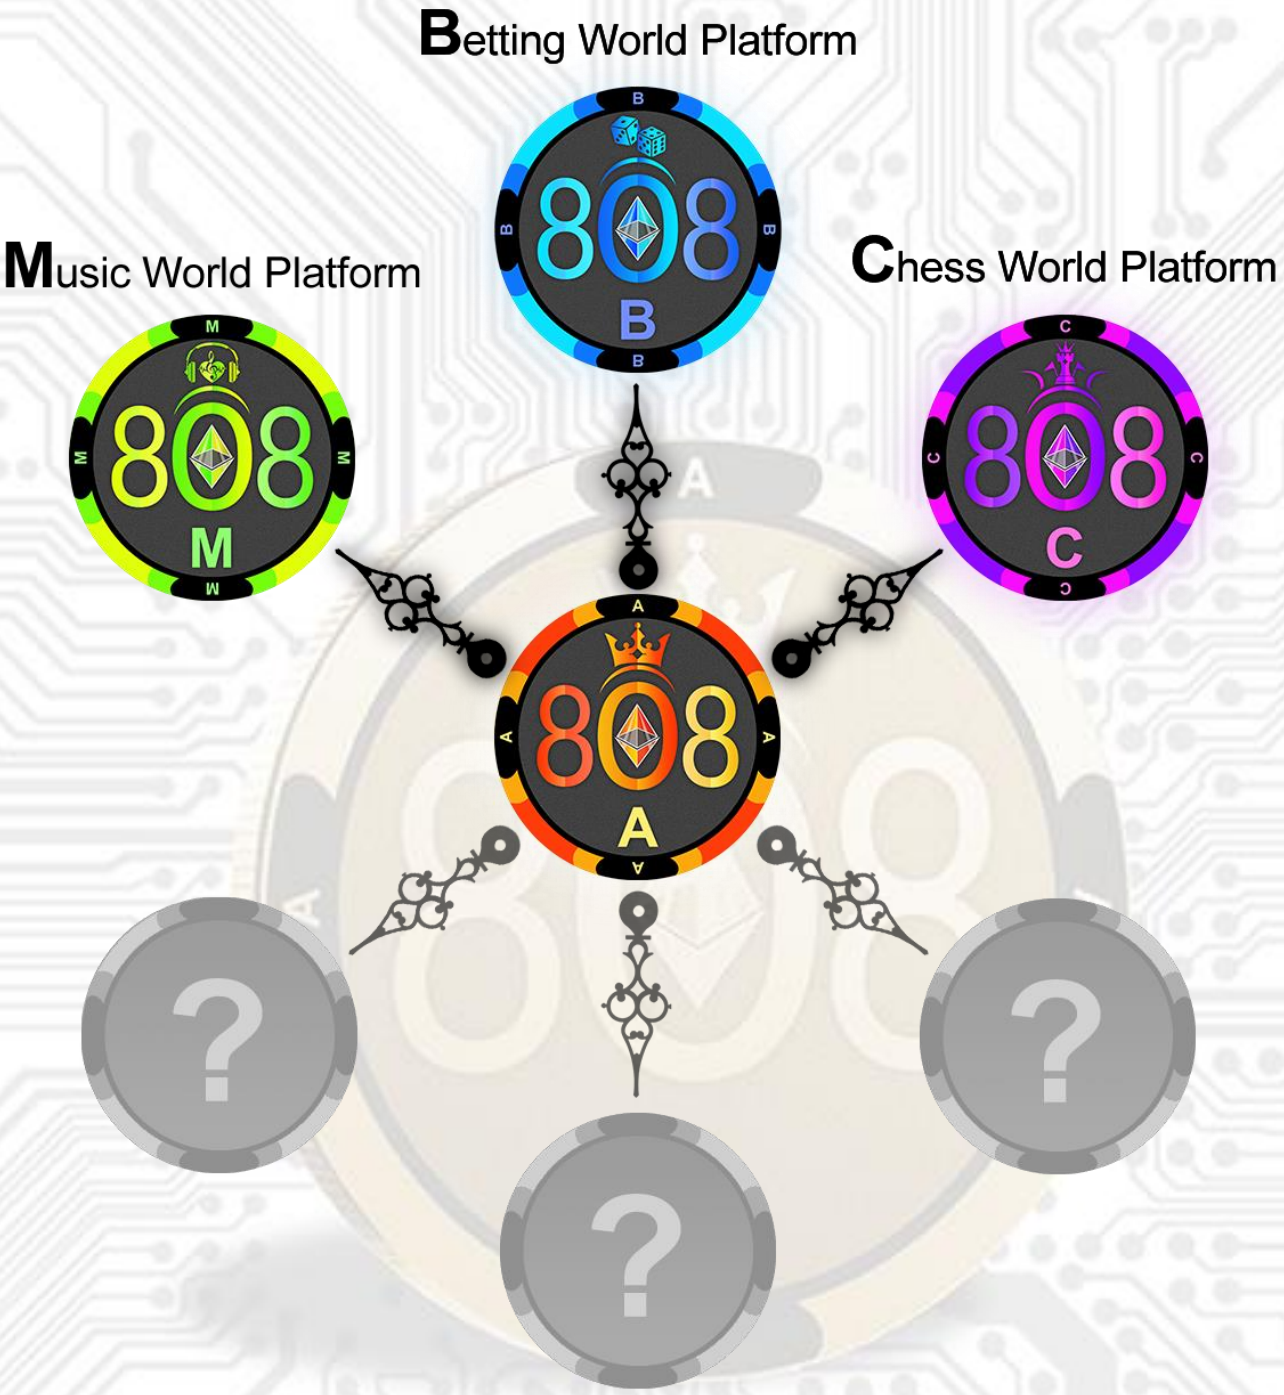
This is an decentralized application that allows people use their 808TB tokens to join all betting deals around the world through 808TB smart contract. People can earn more 808TB tokens if they stand on WINNER side after betting deal ended.

We will announce more details about this Dapp soon on our website…

c) Chess World Platform (808TC sub-token):

This is an decentralized application that allows people use their 808TC tokens to join all challenges around the world through 808TC smart contract. People can earn more 808TC tokens if they win their opponents or our competitions with their chess skill.

We will announce more details about this Dapp soon on our website…



We are working on our internal exchange for main 808TA token and other sub-tokens.

People can trade between all of them easily through our internal exchange. That means 808TA token will become the main token martket for all sub-tokens and people also trade 808TA token with other top cryptocurrencies as well.

7. Our 808TA team

Kampot – Creator
7 years of experience in service and computer repairs. Fan of blockchain technology!

luckyDJ777 – CEO
Business owner and entrapreneur with more than 5 years experience. Big fan of crypto space!

Den_Ano – Back-end developer
Has been working in web development, frontend, backend, coding for more than 6 years. Engaged in development of different projects. I really like the blockchain and everything connected with it.

Alt – Management
2+ years of project management assistance and a big fan of crypto space!

Opash999 – marketing
More than 3 years of experience in marketing and advertising. Crypto space lover!

Taibt - Front-end developer
More than 10 years working on software engineering and mobile development.
Expert skill in Java, .Net Framework, Android, Xcode.
Web development, Database development, Graphic design.
Spent many years as Head of development group in many companies. Recently, he has great passion in blockchain technology.
