Problem on Airdrop and Bounty Market

At present, there are around 10-15 new Airdrop markets every day. Most of them are Airdrop fake. Some unscrupulous people use these airdrop to grow followers on Twitter and the Telegram. And they try different ways to deceive people. They cheat ordinary people by collecting money through ICOs and private sells. Most investors invest in verifying which is the real one and which project is the best. But there are so many ordinary people that they do not understand this light. As a result, they invest in higher profits and suffer fraud. People spend their valuable time on these airdrop and get no money in return. Currently, there are many platforms for airdrop listing that give them a little money only because they list fake airdrop on their platform. The confidence of the people is rising from Airdrop. Most people do not want to join the airdrop anymore. As a result, the market for airdrop is getting smaller. If the problem is not resolved quickly, no one will join the airdrop in front. And for this, many new good startups will come to

the market and their project will fail due to lack of publicity. The role of airdrop in making the crypto industry big is huge. Many ordinary people are first introduced to crypto via airdrop. People like to make free income, but now a lot of Scamer and Fake Airdrop people are losing confidence in Airdrop. So we have taken the initiative to bring people's confidence back to the Airdrop. On our platform we only add real airdrop. So that people can earn free money in exchange for their valuable time.

Solutions to the Problem

Currently, there are many websites and telegram channels that are constantly adding new airdrop. But the irony is that these websites and telegram channels do a faked airdrop list for a little money. As a result, the common people are deceived. The main reason for making our platform so that no one is victimized is fraud. We just add real airdrop to our platform so that no one is victimized. Our team thoroughly verifies that project before adding an airdrop. We do not add a fake airdrop to our platform at all. We provide maximum service to our customers. And with the new Idea, we try to make the most of the companies that start their airdrop. Our platform is different from any other airdrop listing platform.
