

CryptoUserBase

Say hello to CryptoUserBase (CUB), we finally have hope for a truly **decentralized, censorship-resistant** social platform. Check out our prototype at cryptouserbase.com

Crypto
UserBase

PROJECT

LITEPAPER

“Forget About Facebook's Censorship”

CUB is a utility token that will be used on the CryptoUserBase social platform and other CUB products. CUB will develop and use Proof Of Voted Decision (POVD) to deal with any misconduct. The community handles all the reports and people get rewarded in CUB! We won't be able to control you like Facebook can.

CUB Uses

1. Advertisers will use CUB to buy ad spots on the platform.
2. Users will use CUB to host contests, send tips for posts they like, and more.

Scarcity

1. Tiny supply of 1 million tokens. After presale, 15k CUB will be burned every month for 10 months, further increasing scarcity.
2. Unsold presale tokens will be burnt,
