

AUG 2020

A DECENTRALIZED HUB FOR GAMERS

Project Overview and Greenpaper ver 1.1
Approved & published by development team

DECENTRA
HUB

ONLINE GAMING IN COVID-19

Gaming has seen a huge surge post the corona virus hit the world, forcing people to stay indoors. Non-crypto IT giants ranging from Microsoft to Steam have seen a major increase in their users with US video game sales hitting the highest level in over a decade in March. Analysts expect more growth and boost till the stay-at-home orders remain in place.

SCOPE OF THE PROJECT

Who says gaming is a waste of time? With the pandemic spread, we bring you a decentralized hub where you are spoilt with choices between playing solo or challenging thousands of other players like you while you win real money and grow your winnings simultaneously. Our aim is to optimize your time with a mix of serious earning and fun activities while you make new friends. Our platform API is built to search a similar player to your style and experience points, so that its a serious competition while your funds grow. Punters, you are not left out too! If gambling and taking chance is your style, Our blockchain is absolutely decentralized thus allowing you to play your favorite games and rest easy knowing that everything will be smooth and fair.

THE GAMING AND BETTING HUB

Trusted and transparent decentralized hub where we take gaming Serious!

EXPERTISE OR LUCK OR BOTH?

A new platform in the blockchain industry we are a hub of single and multi player digital games. Our games are developed to engage you as a gamer across mobile and online platform. As the name suggests, we are not limited to only gaming or challenging other players but also bet and take a chance at punting. Whether you are a gamer or punter, we keep you engaged by spoiling you with choices and also let you earn serious money.

ENGAGEMENT AND EARNING COME TOGETHER

“

*Video games
foster the mindset
that allows
creativity to grow.*

”

HOW TO PLAY

A few words from our Dev and UIX Team

Register, choose your avatar or user name, edit your profile and start competing with others around the world. Place your stakes before every game and when as the Winner you collect all staked bet. The more you win, the more you collect XP and go up the expertise level. Every level gives you an option to compete with people similar, higher or lower XP and the higher your opponents XP, the more you win in DCNTR coins. You can use your winnings for further game play or setup your masternode or grow your coins with cold staking or trade in exchanges with the crypto of your choice.

Enjoy engaging graphics and lighthearted style of the games. Use your keyboard or mouse to control your character, making moves or simply taking action.

TOURNAMENTS AND CHALLENGES

After all, it is all about winning!

Still not sure how to make the best utilization of your skills?

CHALLENGE

Join teams and compete against other players in daily, weekly or monthly tournaments or you can choose to go solo and enjoy playing games against the bot.

WIN

Beat levels and win XP and DCNTR coins. The tougher the game the higher the stakes. Get to participate in bumper jackpot tournaments with higher stakes and payouts periodically.

GROW

Utilize your winning bounty by joining a masternode pool or keep them in your platform wallet and see them grow or trade your winnings with the coins of your choice in the marketplace.

Punting and trying your luck

"When life is gets hard that means you leveled up"

Casino games are enjoyed by millions of people all over the world and have been one of the oldest gaming style of the world. Ever since the first online casinos began offering their services over the internet, this form of gambling has grown even further in popularity. It's now easier than ever before to play, and you don't even have to leave the house.

DecentraHub offers you transparency, trust, reduced fraud, payment using cryptocurrency, anonymity, MN holder and casino membership with increased accessibility and reduced house edge costs, decentralization of prediction markets, thus revolutionizing the gambling industry of today in the lock down period.

GAMES OFFERED

You name it and we have it!

"Life is a
game,
Play to
win."

Casino Games – roulette,
blackjack, pachinko,
baccarat, etc.

Sports Betting – Predicting the
outcome of sporting events
and putting bet on the result.

Bingo – Matching numbers
with different arrangement of
5x5. A player wins a Bingo
when the selected numbers
are called by the host.

Animal Racing – Horse or
equestrian racing involving
two or more horses ridden
over a distance.

In- Play Betting – In-play
betting a.k.a Live Betting is
wagering a game after it has
started.

Cara Y Cruz – The game
involves picking a side and
once the coin is flipped, if the
face of the coin you chose
appears, then you win. It's a
bet where your victory
depends upon chance.

MULTIPLAYER GAMES

You name it and we have it!

"Home is
where
you are
player
one."

Ludo, Chess, Backgammon,
Ice Hockey, Mortal Combat,
Checkers, Monopoly, Game of
Life, Scrabbles, Mahjong,
Carrom, Chinese Checkers,
Reversi, Soccer, Boxing,
Klondike, Snakes and ladders,
UNO, Yahtzee, Rummy, Cart
Race, Racing Games *and
more added with days.....*

We plan to include the most popular video games for serious gamers and will include but not be limited to:

1. **PUBG:** Well, who does not know about PUBG! This prominent online multiplayer battle game lets you fight for survival on an island with 99 other rivals.
2. **Call of Duty:** Another battle, Call Of Duty is designed exclusively for mobile phones.
3. **PES- Pro Evolution Soccer:** Soccer fans, PES is the game where you can play real-time online matches or local match play with a friend.
4. **Clash Of Clans:** A combat strategy game, Clash of Clans is where you build your village, train your troops and go to battle, competing in epic clan wars.

MULTIPLAYER GAMES

You name it and we have it!

"Money is never a big motivation except as a way to keep score. The real excitement is playing the game."

5. Candy Crush: If you think Candy Crush has lost its charm, try it again, and we're sure you'll be addicted. Switch and match candies in this tasty puzzle to progress to the next level for that sweet win.

6. Asphalt 9 Legends: For all you racing enthusiasts, a high-octane racing game like no other where you drive all over the world and take down opponents in style.

7. PES- Pro Evolution Soccer: Soccer fans, PES is the game where you can play real-time online matches or local match play with a friend.

8. WCC2 - World Cricket Championship 2: Play Test cricket, T20 and even live tournaments. A game for both amateurs as well as advanced players, it comes with a practice mode which can help you considerably.

THE DCNTR COIN

- Coin Name : Decentrahub Coin
- Coin Ticker : DCNTR
- Block Distribution : MN 95% + Stake 5%
- Total Supply (50 M) : 50,000,000
- Premine (0.5 M) : 500,000
- Block Time : 60 Sec

Cold Staking and DCNTR:

With cold staking technology start staking while you win without any internet connectivity or running a wallet. Lock your coins in the gaming portal and start staking offline. Staking needs the owner of the node to keep their wallet running to receive rewards, however, this can be of risk too as your funds are open to breach of security and can even lead to a loss of entire fund through human error or hacking.

Just like any hardware wallet like a trezor or ledger nano, a cold staking facility gives you the security features without having to buy a separate hardware. Move your wins to cold staking, they become locked and offline and yet keep growing and generating block rewards, all in the platform itself.

THE DCNTR COIN

Dandelion++ technology and

DCNTR: Welcome to the new and advanced security of the Dandelion++ feature, which acts as an added layer to the network enhancing transactional privacy by guaranteed anonymity. Ideally any cryptocurrency transaction is broadcasted across the network using the Gossip protocol, where every node broadcasts the transaction to all the running or active nodes that are connected to it. Though, this gives lightening speed to transactions and is very efficient in generating blocks, the risk of transactions getting revealed always lingers.

Dandelion++ is a simple solution to this problem and can be implemented on DCNTR coin for an added layer of anonymity by simply sending any transaction first to any node instead of all connected nodes.

This node then randomly decides if it will pass it to another node or will broadcast to all existing peer nodes. Since the decision is unpredictable and does not follow a pattern and is more on chance, the broadcast pattern becomes random making it almost impossible to trace any transaction back to the original tx broadcaster's IP address. This feature completely de-risks your chance of traceability thus making all your transactions super private by completely masking your IP address.

MASTERNODE REWARDS

START BLOCK	END BLOCK	COLLATERAL OF MN	BLOCK REWARD	MN REWARD	STAKE REWARD
1	200	POW	2500	NA	NA
201	25,000	1,000	1.00	0.9500	0.0500

7,275,038	7,275,038	6,000	1.00	0.9500	0.0500

THE JOURNEY AHEAD

Plan of growth as we move forward

Phase I - The Start

- Blockchain launch
- Website launch
- BTC ANN Release
- Litepaper ver 1.1 release
- Beta platform Launch for Playing games

Phase III - Marketing

- CMC listing
- Community engagements
- Bounty programs to promote platform
- Marketing campaigns targeting crypto and gaming platform users

Phase II - The Development

- Exchange #1 listing
- Masternodes.online listing
- Advertisements of Decentra hub among gamers
- Presale of DCNTR
- Staking Wallets release
- Implementation of Masternodes VIP community
- Addition of new games

Phase IV- The Way Ahead

- Web and Android Wallets release
- Mac wallet release
- Partnership with established gaming websites and social media platforms to add and promote games
- Launch of trending video games
- CMC marketing
- Coingraph marketing
