DISCLAIMER

TRADING DIGITAL ASSETS AND INVESTING IS A HIGH-RISK ACTIVITY. THE PRICE OF DIGITAL ASSETS IS VERY VOLATILE, WHERE PRICES CAN CHANGE OVER TIME. WE ADVISE USERS TO USE RISK MANAGEMENT, FINANCIAL MANAGEMENT, AND YOUR OWN STRATEGY BEFORE INVESTING OR TRADING DIGITAL ASSETS. PT. EDUKASI DIGITAL ASET INDONESIA DOES NOT REQUIRE USERS TO INVEST, SELL, BUY OR TRADE CRYPTO ASSETS. ALL DECISIONS ARE MADE INDEPENDENTLY BY THE USERS THEMSELVES.

Background

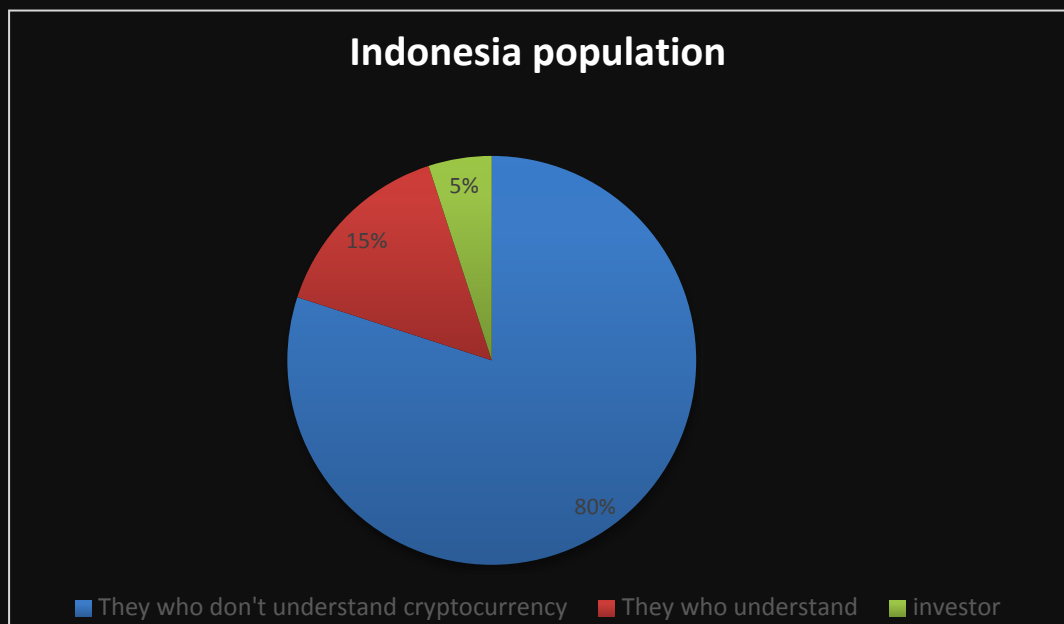

In this modern era technology improves rapidly and bring us to the number of changes in all aspects. Cryptocurrency is one example of technology in Digital asset. Cryptocurrency improves quickly time by time.

Bitcoin is one example of around thousands of cryptocurrency. With the rapid growth of cryptocurrency, it proves that Cryptocurrency and Blockchain are increasingly in demand by many people for use in everyday life. The impact of this is that more and more people are curious and want to understand what exactly is cryptocurrency?. Before plunging into the world of cryptocurrency, of course people need to know in advance what exactly cryptocurrency is. People need education about cryptocurrency or just think education is the key to opening the gates to the world of cryptocurrency.

With the statement "Education is the key to the world of Cryptocurrency", ESCX is present as a pioneer to fill up educational needs in the field of Cryptocurrency and Blockchain in all aspects of trading, mining, or others. As a pioneer of Cryptocurrency education, ESCX automatically will continue to be needed along with the development of Cryptocurrency.

1. Description of problems wanting to solve
 - a. Lack of society knowledge in cryptocurrency

Those who don't understand cryptocurrency = a group of people who really don't know anything about cryptocurrency and blockchain

Those who understand = a group of people, traders, miners, or people who understand cryptocurrency / blockchain but they don't implement it in their lives

Investor = a group of people who understand or don't understand but have excess funds to invest in cryptocurrency

the data above is based on a benchmark between the total population of Indonesia in 2019, according to this data around 183 million people are more or less in productive age.

MENU CARI

Dkatadata.co.id

HOME / DATABOKS / STATISTIK / DEMOGRAFI

Jumlah Penduduk Indonesia 2019 Mencapai 267 Juta Jiwa

© 4/1/2019, 07:49 WIB

Jumlah penduduk kelompok umur 15-64 tahun (usia produktif) mencapai 183,36 juta jiwa atau sebesar 68,7% dari total populasi.

Berdasarkan survei penduduk antar sensus (Supas) 2015 **jumlah penduduk Indonesia** pada 2019 diproyeksikan mencapai 266,91 juta jiwa. Menurut jenis kelamin, jumlah tersebut terdiri atas 134 juta jiwa laki-laki dan 132,89 juta jiwa perempuan. Indonesia saat ini sedang menikmati masa bonus demografi di mana jumlah penduduk usia produktif lebih banyak dari usia tidak produktif, yakni lebih dari 68% dari total populasi.

And compared to Indonesia's largest exchange data, INDODAX (Indonesia digital asset Exchange)

Markets

Chat Room

News Flash

Total Member: 1754174

There are less than 2 million members in it, on the other hand the reason we compare this data with Indodax data is because in our opinion, any type of cryptocurrency will be largely liquidated or transacted within Indodax, so 99% of our estimates may be Indonesian residents must have an indodax account if he is someone who understands and plunges into the world of digital assets

And the fact is that the numbers are very far out, considering that Indonesia's population of productive age is around 180 million, and indodax members are only around less than 2 million, meaning that if the percentage is not more than 1% of Indonesians who understand what it's a digital asset.

Indeed lately the development of digital assets is quite rapid in Indonesia, but when compared to other countries that have really enjoyed the benefits of blockchain and the convenience of a large and small scale transaction without being bound by transaction regulations from conventional banks or other related institutions.

b. Decreasing the number of illegal investment

Along with the development of digital assets and activities of both the popularity of cryptocurrency activities both mining and trading, making the emergence of some irresponsible people who use non-compliance and the lack of knowledge of the general public to large investors as targets of money games, Multi Level Marketing, or PONZI resulting in losses of up to tens or even hundreds of millions in each individual victim.

According to the data we took from one of the web that lists the investment list bulging.

<https://sikapiuangmu.ojk.go.id/FrontEnd/AlertPortal/Negative>

at least there are more than 200 communities in the form of companies or certain groups that use cryptocurrency and claim to be able to double the

money with a sweet promise that leads to uncertainty and suddenly disappear, and it can be concluded that Indonesian people who lack knowledge about digital assets and human nature always wants to get rich instantly without learning more about the system and what is offered and the process of how that money can multiply. In the end, it results in wasted funds because of the money game system or the Multi-level Marketing system.

c. The difficulty of finding learning cryptocurrency place

Seeing from the 2 problems that we explained above, it can be concluded that the real problem is the absence of a place or facility that focuses on cryptocurrency knowledge both online and offline, resulting in confusion that occurs in the community because it does not know where and where an access or place that can be trusted. As a result, it will cause an easy effect to be influenced by irresponsible parties and lead to money games.

On the other hand there are groups of people who have thoughts and logic that cannot be influenced by the money game, but they are interested in cryptocurrency and again the problem is access and media which is confusing or it is difficult to distinguish which ones are true, creating a turnaround effect and in other words it does not go into the world of cryptocurrency, and some of the more alarming events are when the saturation point arises, and thinking is not wise then a strange decision will occur, that is, people who are too long searching for the truth of cryptocurrency will eventually meet with people or the wrong media and falling into money games.

The circle of Indonesian people's misunderstanding will continue to spin and most will fall into something that they should avoid becoming a big problem considering that there are hundreds of investment companies, and

each company must have many members, how many there will be the victims of the money game, MLM due to lack of knowledge about cryptocurrency ??

2.Problem solving

With a description of the problem that has unconsciously become a fact in Indonesia, it is necessary to have an educational movement structured and managed structurally from rural to urban, to a larger scale that makes little by little the Indonesian population will understand digital assets and blockchain and will join in it with sufficient knowledge and be able to minimize the risk of being trapped in a money game and can plunge into the world of cryptocurrency itself without the presence of other parties.

1. Through offline

LEARNING BUILDING "PT. EDUKASI DIGITAL ASET INDONESIA"

In accordance with the old adage that says "when you want to change something big, then change from the smallest structure first" which means that when we have a big concept, then fix from the most basic first.

If all this time the target market for crypto is millennials, entrepreneurs and people with education levels in the middle to upper levels, then the growth of the transaction / volume level will develop at just one point, it is not wrong to develop and start from the scope of villages, cities small and so on until it is known by the wider community.

Offline recognition and education is one of the basic logic for targeting very foreign communities about technology. With the existence of a facility or place which aims specifically and is well structured to educate, implement, and directly engage in / direct practice will make little by little a warm conversation in an area, where the fact is if there is something positive in the community both regional and city , will quickly spread as well and the effect

will continue to increase the number of people who want to learn and are curious about what is being discussed by other communities.

Even though it can't be done instantly because something that most of them will have instant effects, we are aware, the offline education project does not directly cause a big effect, but considering that in Indonesia is still very minimal about educational facilities like this, it is likely in an area we believe at least be able to attract the attention of more than 60% of the community, because something new is sure to attract attention. Added to the existence of an active building, enough for educational media, and comfortable to share one individual with other individuals and with groups certain.

In more detail we have educational facilities within the company consisting of several classes for the community we educate. We will classify each class based on the ability of these communities ranging from beginners to experienced. Of course, each class will be guided by experienced mentors in the world of Cryptocurrency. So, for people who do not understand or who already understand about Cryptocurrency can get knowledge from this educational tool. In order to make people who don't understand being understand, and who understand can become professionals.

We all know, all information can be obtained easily in today's world. Therefore, we utilize this by educating crypto online to a wider range of people, even unlimited. Education is the key to jumping into the world of Crypto, without crypto education. there's no way people can jump into the world of Crypto.

Education is the most basic need for everyone. The need for education seems to never run out. Likewisewith crypto education. Along with the development of cryptocurrency many means or social media groups that discuss and study

cryptocurrency, but there are very few media that really study inches and guide step by step about the procedure for cryptocurrency to one person at a time.

In seeing this opportunity, we have launched an application called EXPERT STUDENT CLASS. This application, of course, aims to provide education to the wider community online and reach a wider target market. This application is already available in the Play Store. With this application we hope people who do not understand and who already understand a little about Crypto can increase their knowledge.

This application is a paid application. Before making this application we surveyed several people, and the most common response was why should I pay? Isn't knowledge free? What will we get? So that's the general response we get. The logic is like this, Let's just say there is a Professional trader who is willing to provide his knowledge for free to the public online. Of course, the professional trader will get tens or even hundreds of questions from people people about the world of cryptocurrency. It is impossible to feel that traders can answer one by one the questions that are constantly being asked. In the end people only get makeshift knowledge. to be a master in one thing requires a thorough understanding right? If it is not comprehensive or only half-measures, this will cause ignorance or even loss in the world of cryptocurrency trading. With the payment of this application, of course we will develop it well and the problems mentioned earlier can be resolved.

We have made this application as comfortable and as good as possible for its users. To make it easy for users to use this application, we have prepared various features as follows:

1. Easy and simple interface

As an application that will be used continuously, of course we make this application look so comfortable and simple when seen and used.

2.Choose your login account

To make it easier for users, we have provided a login using a Google account or use the EXPERT STUDENT CLASS account itself.

3.The varieties of experienced mentor

We have provided many experienced mentors. These mentors have their own specialist fields. This will make it easier for users who will consult our mentors according to the needs of the users.

4.Chat room features

Chat room in our application is made as comfortable and as easy as possible for users. Some of the features are that users can send files in the form of images and sound recordings in realtime to our mentors. This will greatly facilitate the user because users can consult specifically and to avoid misunderstanding too of course.

5.The varieties of payment method

We have several payment methods that users can choose from. Remembering that in this day and age many people use different payment methods. Therefore, to overcome this we have provided various payment methods.

Before reading to the next page, please understand the terms below so there are no misunderstandings.

- **INSTANT BUYING WITHOUT SELLING** is a strategy that is only owned by ESCX tokens, wherein the fund income from all projects will be used to buy ESCX tokens without reselling them and stored in a special wallet which can be seen by all people, so that there is transparency of the project and not mere nonsense. The core of this project is to make rare all ESCX token demands so that they are increasingly limited, resulting in a large number of requests, but there is little stock on the market, as a result the price of ESCX tokens is more expensive..
- **MUTUALISM SIMBIOSIS** referred to here is a strategy to make the ecosystem forever and ever greater where revenue from all projects will play a role in raising the price of ESCX tokens. And the number of buying and selling transactions in the market resulting in fluctuating prices to rise significantly because this ecosystem is accompanied by "INSTANT BUYING WITHOUT SELLING". After the price rises, automatically makes the ESCX token more interested by people and results in the development of all our projects with the presence of these people. In the end, the price of ESCX tokens will increasingly rise. This will happen continuously over and over again forming like a mutual benefi simbiosi.
- **PARTNERSHIP** are people from outside, for example YouTuber joined the ESCX token to get additional income through his contribution in all ESCX token projects. Through the application provided by us. So that he earns more from YouTube and of course has a positive effect on our project.
- **USERS** are people such as airdroprs, traders, and ordinary people who participate in enlivening all ESCX projects through their contribution in using ESCX applications. in the application provided by ESCX.

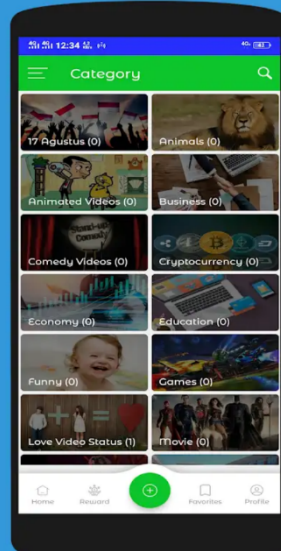

ESC STATUS REWARD APPLICATION

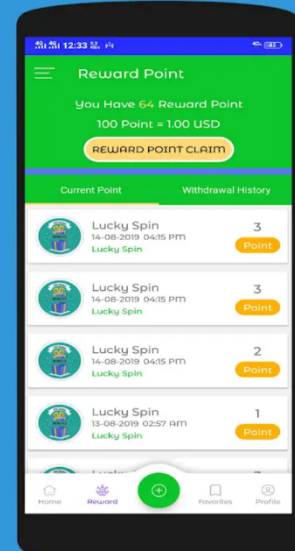

ESC Status Reward

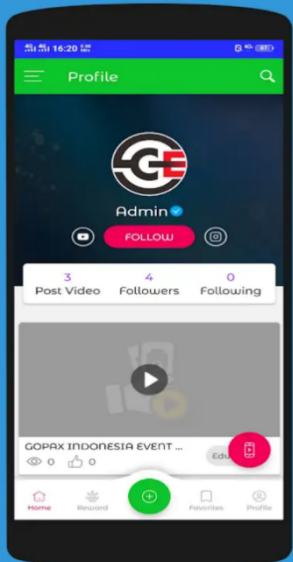

See Video by Category

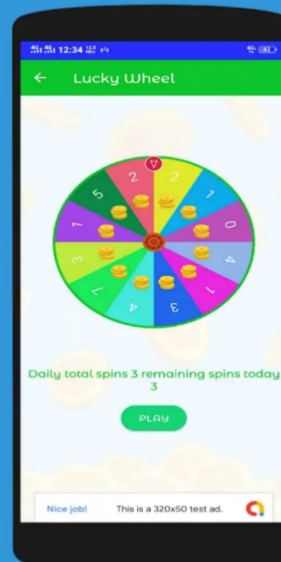

Earn And Claim

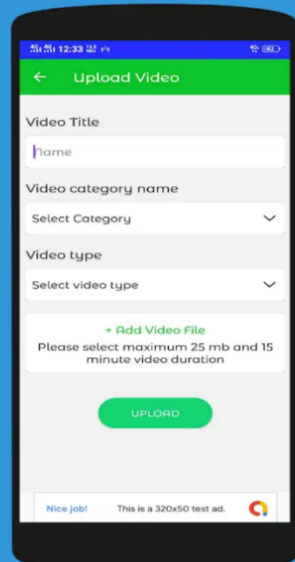

Profile page

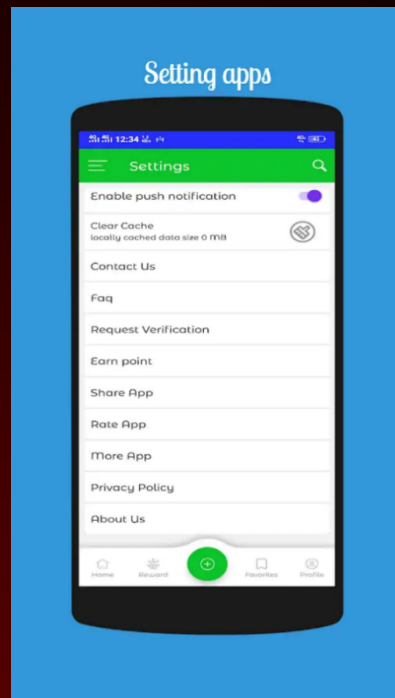

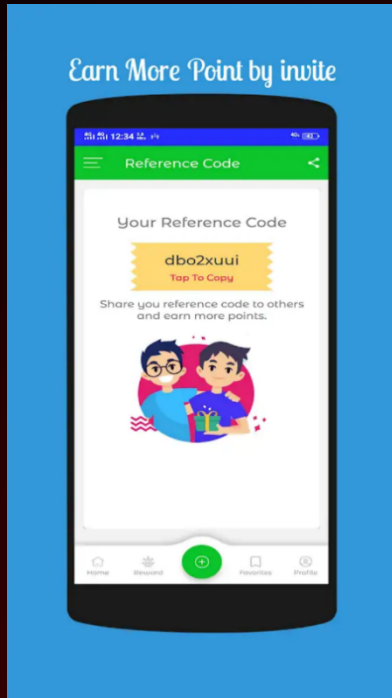

Daily Lucky Wheel

Upload Your Video

To make it easier to get airdrops on our tokens, we have launched an application called ESC Status Reward which is an application used to get ESCX airdrop tokens by collecting as many points, then these points can be exchanged with ESCX tokens.

ESC Status Reward is an application where users can upload and watch videos to get points. It's easy to get points at ESC Status Reward. Users can upload videos and get viewers to get points. Users can also watch existing videos to get points. The more viewers and the more videos that are watched, the more points will be automatically obtained.

BENEFIT FOR USERS :

1. GET POINTS ONLY BY WATCHING THE VIDEO
2. COLLECT POINT AS MANY, THEN EXCHANGE WITH ESCX TOKEN

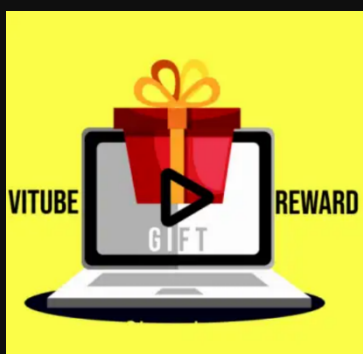

3.GET MORE POINTS BY INVITING NEW USERS

BENEFIT FOR PARTNERSHIPS :

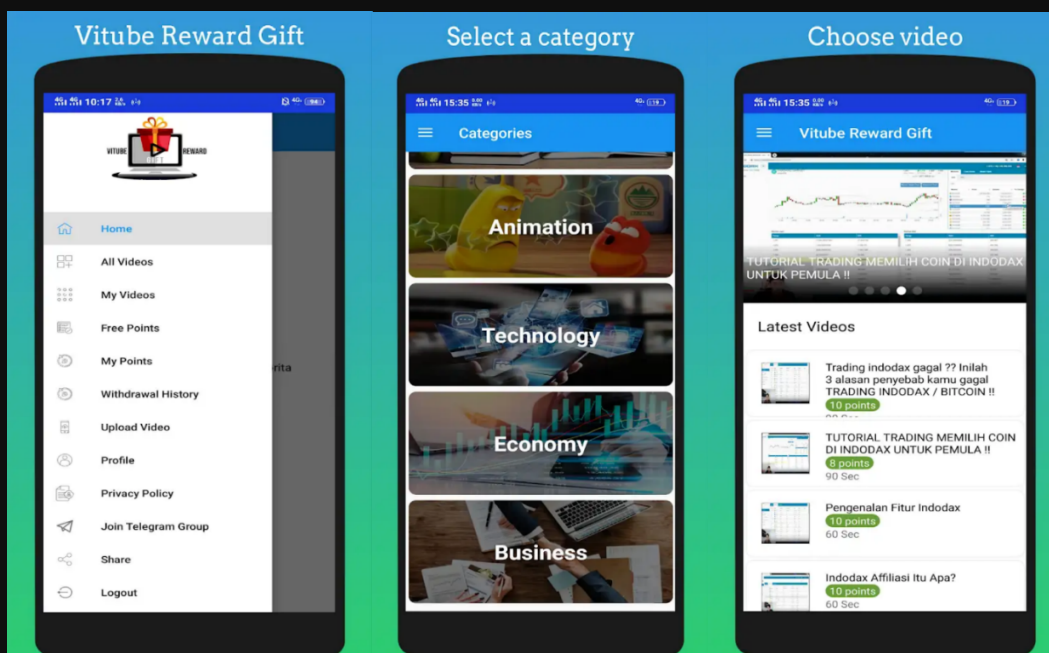

1. EASY TO GET POINT, ONLY BY UPLOADING VIDEOS
2. GET MORE WATCHERS FOR MORE POINTS
3. THEY CAN PROMOTE YOUTUBE CHANNELS AND INSTAGRAMS THROUGH PROFILE

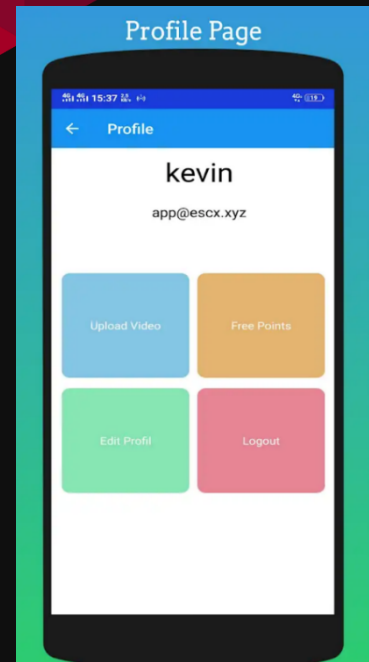

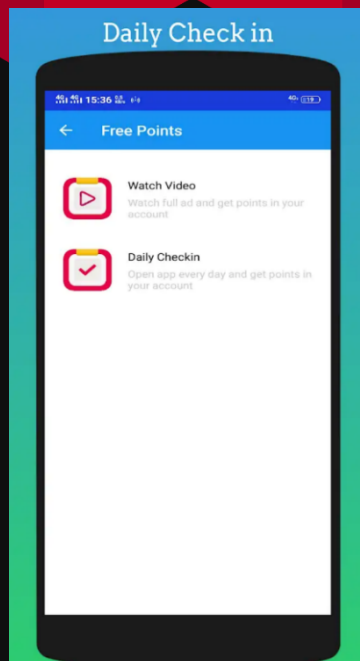

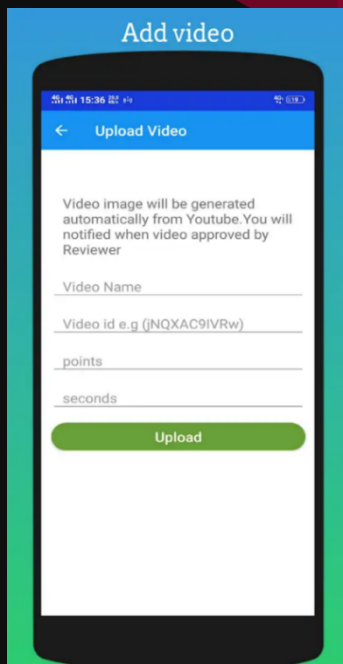

BENEFIT BAGI ESCX :

ESC Status reward is one of our projects for the "INSTANT BUYING WITHOUT SELLING" strategy. With revenue through adsense that we have installed on the application. With that, the more users who are active in ESC Status reward, the more adsense will enter. All incoming adsense will instantaneously buy ESCX tokens without reselling them. Like that, if there are more and more users on the app and the ESCX price will automatically increase continuously, right? We can say this is a strategy of "SIMBIOSIS MUTUALISM" that is mutually beneficial between developers and users. Developers get lots of adsense to buy without selling and users get ESCX through the application so that the circle of demand and trading volume on the exchange will continue to exist and increase with time. . If this symbiosis runs without stopping, it is quite possible the price of ESCX will soar.

VITUBE REWARD GIFT APPLICATION

VITUBE REWARD GIFT

The next application that we have launched is vitube reward gift. This application is similar to ESC Status Reward, but the difference is this vitube reward gift is connected directly to YouTube. The point is that when users open this application, there will appear a variety of videos that are connected directly from YouTube. So it cannot be just any video can be entered in the vitube reward gift. To get points, users just watch the video or connect the video on their YouTube channel to the application This is very interesting, isn't it? With this strategy that we are using, we are very confident and it is very possible that YouTubers will connect the videos to this application.

BENEFIT FOR USERS :

1. VIDEO DISTRIBUTION FEATURES BASED ON CATEGORIES THAT EASY TO USE TO CHOOSE WATCHED VIDEOS
2. WATCH VIDEOS AS MUCH TO GET MORE POINTS
3. LOGIN EVERY DAY TO GET DAILY CHECK-IN

BENEFIT FOR PARTNERSHIPS :

1. CONNECTED DIRECTLY WITH YOUTUBE SO WHEN UPDATING VIDEO ON VITUBE, PARTNERSHIP WILL GET ADSENSE FROM YOUTUBE ITSELF AS WILL GET POINTS FROM VITUBE THAT CAN BE EXCHANGED WITH ESCX TOKEN ITSELF
2. CAN IMPROVE YOUTUBE VIEWERS
3. WITH THE CONNECTION OF YOUTUBE AND VITUBE, AUTOMATICALLY BENEFIT WILL BE ADDED

BENEFIT FOR ESCX :

We made this application with the aim of getting more adsense and increasing revenue on our YouTube channel (EXPERT STUDENT CLASS). Another goal is to make it easier for the airdroper to get ESCX tokens by getting points that can be exchanged.

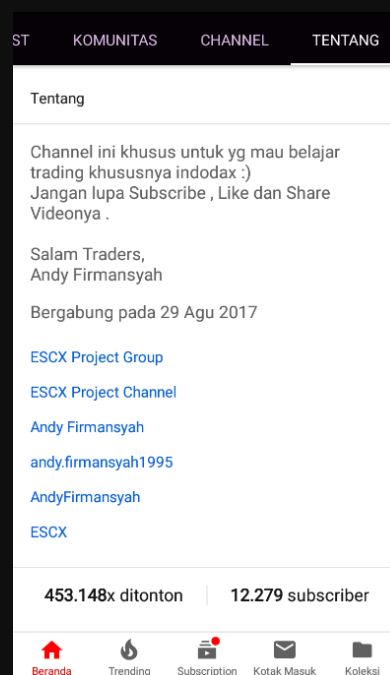

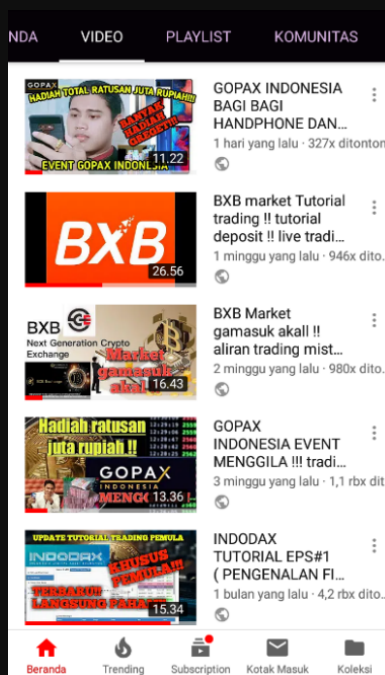

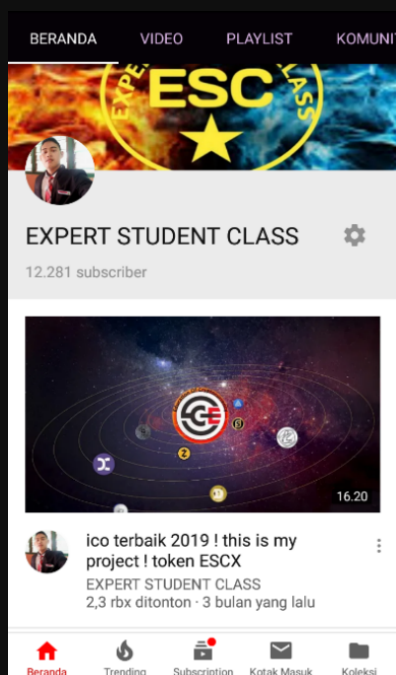

In the future, we are sure that the users of this application will continue to increase considering that this application is connected directly to YouTube, which will result in a lot of YouTubers and Airdroppers who will symbiosis to get points. Of course, Adsense revenue for developers will increase as well. All of that is only aimed at boosting ESCX token prices, through the "INSTANT BUYING WITHOUT SELLING" strategy.

EXPERT STUDENT CLASS YOUTUBE CHANNEL

Youtube EXPERT STUDENT CLASS channel is a youtube channel which is engaged in the field of cryptocurrency education. This channel discusses all matters related to cryptocurrency. Since the beginning of this channel in 2017, this channel has increasingly increased the number of subscribers. people are starting to take interest in cryptocurrency and continue to grow. This channel facilitates those who have just involved into the world of cryptocurrency and who have long involved in to add insights and abilities in the field of cryptocurrency.

This channel will, of course, also be a tool to boost ESCX prices. Through the "MUTUALISM SIMBIOSIS" mentioned earlier, the development of this channel will be faster. this will continue to be developed so that later, cryptocurrency players will be easier to find education and of course to INSTANT BUYING WITHOUT SELLING.

WHY SHOULD ESCX

1. THE KEY TO CRYPTOCURRENCY

Education is the key in all fields and also the needs that will always be needed at any time. Education is the most basic thing to start something. Without education how might you start? Have you ever started something without education? What did you get? Of course only failure for the sake of failure that you can. Try to compare, by starting with education, of course the things you start will be more directed towards success.

ESCX is a token that focuses on educational projects in the field of Cryptocurrency, which will automatically be the key for everyone before plunging directly into the world of Cryptocurrency. We will provide, all matters of education relating to Cryptocurrency broadly. Of course, this will greatly facilitate and be beneficial for people who want to learn Cryptocurrency.

As we have explained before, that the knowledge of the Indonesian people is very minimal about the existence of Cryptocurrency. This is because, there are still very few places that really complexly explain Cryptocurrency. Therefore, to introduce and educate the ESCX community, it is present as a forum for education. Cryptocurrency to the public both offline and online.

2.DEMAND THAT WILL ALWAYS AVAILABLE

Projects on other tokens only target people who already understand the world of cryptocurrency. And if we compare the number of members of Indodax (the largest market exchange platform in Indonesia), only about 2 million people with a comparison of Indonesia's productive population if the data is around 150 million people, where the data makes a huge difference, isn't it? Logically Cryptocurrency will only spin around only to 2 million people, even though there are still many people who do not understand Cryptocurrency. This results in demand for these tokens will decrease continuously because remembering the character of Indonesian traders are mostly hit and run (if they have already got profit, they will leave and look for other tokens / coins)

Seeing this opportunity ESCX is a token that has a project in the field of education, will target a market where people who do not understand Cryptocurrency can understand about Cryptocurrency. This will automatically create demand that will continue to increase over time.

With the projects that we run, of course the community will increasingly be involved in the world of Cryptocurrency and ESCX will be increasingly known to many people. So that it automatically creates a continuous growth circulation and it is certain that prices will gradually rise consistently. This is also supported by several projects such as INSTANT BUYING WITHOUT SELLING & LAWS OF MUTUALISM SIMBIOSIS where it causes the circle of ecosystems and the volume will never break and even continue to increase over time.

3. BENEFIT FOR PROFESSIONAL TRADERS IN EDUCATION

In terms of providing education, we need people who are experts in their fields, right? What if the educator is not a professional? Understanding

will happen. Therefore, we will really need professional cryptocurrency traders to give education to the public both offline via education in the PT. EDUCATIONAL DIGITAL ASSET building or online through the EXPERT STUDENT CLASS application.

Because all our projects are engaged in education, of course we need professional traders who will be mentors and provide education to the community.

4. BENEFIT FOR PROFESSIONAL TRADERS IN TRADING

We can imagine, if all ESCX offline and online projects are running and forming SIMBIOSIS, of course the ESCX volume will be higher and cause prices to fluctuate. The advantage for professional traders is that this can be used to trade with scalping methods quickly due to higher volume on earlier. Or long-term trading. As a result, the professional traders get maximum profits in trading both the short-term consistently and the long-term so that the maximum profit.

5. INTERCONNECTED CIRCULATION

All of our educational projects will be formed as a circulation of interconnected ecosystems. This is because, most of the income we get from offline and online projects will be used for INSTANT BUYING WITHOUT SELLING ESCX tokens. Of course, this will result in ESCX prices continuing to rise. as our entire project goes on.

This circulation will continue and be interconnected because all our projects are engaged in education which we always mention is that Cryptocurrency education, will always be needed like a key to enter the world of

Cryptocurrency, coupled with the application facilities offered by ESCX as the main ecosystem.

With this circulation, we automatically will always try to run and develop our projects as well as possible. So that will generate trust and interest that is always there from new people or the traders themselves.

6. BENEFIT FOR TRADERS IN THE FUTURE

Considering the comparison mentioned earlier, the number of people who understand Cryptocurrency compared to people who don't understand Cryptocurrency is very different. With all our projects, it will directly bring in new people in the world of Cryptocurrency.

They can take advantage of this as well as possible. Logically, people who learn Cryptocurrency will automatically form a network or an association which of course discusses Cryptocurrency. This will greatly facilitate them to share about the problems they face in the world of Cryptocurrency and it is possible that in the future blockchain technology will be utilized to the maximum and be born of new innovations that are unimaginable. Supported by Projects both online and offline they can find answers to the problems they face.

Education is a basic need for those who want to or have just engaged into the world of cryptocurrency. We (ESCX) are the answer for them. will benefit from this which will be useful in the future scope of Cryptocurrency and blockchain.

WHY SHOULD FULL AIRDROP?

1.ONLINE AND OFFLINE PROJECTS THAT HAVE BEEN REALIZED

If on other coins which mostly rely on ICO funds to realize all of their projects or in other words all projects are still in the form of discourse, ESCX token has already realized and matured all of our projects without relying on ICO funds or can be called FULL AIRDROP. Why is that? Okay, of course we have heard a lot of news about scam coins or other words when they have gotten a large enough ICO fund, failing to run the project. It might be the practice of money games. Only take profits. Or other problems. This is a very bad problem, given the emergence of a statement of distrust from the cryptocurrency players themselves. The impact is that new coins will be difficult to develop to run the project.

To prove that we are truly serious and have different features from other coins, we have realized and fully matured the seriousness of all our projects using ESCX token personal funds. This is only aimed at capturing the confidence of cryptocurrency players.

2. ATTRACT INTEREST OF CRYPTOCURRENCY TRADERS

With the FULL AIRDROP program running, it's clear that cryptocurrency players will be very interested in getting ESCX tokens. We all know that everyone must like something free, right? Plus something free is useful and promising, so the effect is that the cryptocurrency players themselves will be hilarious to contribute to the entire ESCX token project.

3.THE ESCX COMMITMENT OF ALL ITS PROJECTS

We have proven our commitment by running all projects using ESCX token personal funds. In addition, we have proven that we have carefully considered all our strategies in all projects about the continuation in the future. We will keep this commitment with run all our projects with full responsibility to develop as well as possible. With all the strategies and projects that we have we are very confident and of course our main goal will be achieved. Being a token with a reputation at the level of BITCOIN is not impossible if all of our projects reached.

TOKEN UTILITY

1.PAYMENT GATEWAY APP

ESCX tokens will later serve as a means of payment in obtaining education in the EXPERT STUDENT CLASS application. With the existence of this payment gateway, of course this will add strength to the price of ESCX on an ongoing basis. We know that ESCX is the key to the world of cryptocurrency, and ESCX will always be needed going forward. Of course, the EXPERT STUDENT CLASS educational application will continue to increase in the number of users. This will be in line with the increase in ESCX token enthusiasts because it can be used in payment in the application, very interesting right?

Other benefits are as explained earlier, we all know that something new will attract the interest of the community. If this continues to occur endlessly and accompanied by all the projects at ESCX, of course we will be increasingly known by the wider community. reiterate the umpteenth time the need for education has also increased, the users of the EXPERT STUDENT CLASS application have also increased, and again ESCX token has also been increasingly needed and ultimately our main goal is rising significantly the rate of ESCX token.

2.MEDIUM OF TRADING RECOMMENDATION

In the offline project we have provided comfortable learning building facilities as well as qualified mentors in their fields so that cryptocurrency education seekers feel at home for a long time seeking knowledge in our building. Later, in cryptocurrency education, it will definitely recognize the name of the trading world. Automatically, we as a facility provider will introduce our products ESCX tokens as the main recommendation tool in the trading world. In the future, of course, the more crowded people who take offline education, the more crowded people will get to recognize ESCX tokens. All of this focuses on the final destination point namely, the well-known extent of ESCX tokens in the community. If, all of that happens according to the expected results, coupled with the "INSTANT BUYING WITHOUT SELLING" strategy in our offline project, then the price of ESCX on the market will rise significantly continuously all the time.
