## TECHNICAL SPECIFICATIONS

## SERVICE OVERVIEW

## CONCLUSION

# GHOSTPRISM
# PROJECT SNAPSHOT

Ghost Prism is a privacy based platform and API service for developers and users to acquire sms-based phone verification for social media accounts. Our **GHOST** coin paves the way for quick and easy access to phone numbers in over 50+ countries and over 30+ social media platforms. No E-Mail address is required when you register your account with us, as we will provide you with our own private E-Mail service **(****@ghostxprism.com)**. With Ghost services you can be rest assured of your presence and identity on the internet will nothing more than the footprints of a ghost.

# VISION & MISSION

GhostPrism envisages to create a safe and private digital experience for you, keeping your identity hidden like a *'ghost'* in this ever growing digital world. Use GHOST coins to purchase sms or email packages that suit your needs and requirements.
We aim to keep your digital footprints absolutely Private & Secured against spammers, scammers & phishers in the digital world, thus ensuring a safe browsing experience. Create social media accounts, download content, browse websites with utmost safety and privacy with our verification, SMS, E-mail and Proxy Server services.
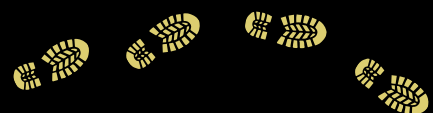

# GHOSTPRISM SUMMARY

Here are some key features offered by our API safeguarding your identity and digital footprint:

## 1 / PROXY SERVERS

We offer VPNs in multiple locations across the globe thus providing you the best connection available

## 2 / PRIVATE E-MAIL

Own a private email (****@ghostxprism.com) with us without having to link your existing email addresses with any service

## 3 / SMS VERIFICATION

API services to acquire sms-based phone verification for 30+ social media platforms

## 4 / OBSCURE IP ADDRESS

Keep your data safe and IP address obscure with Ghost Prism VPN services

## 5 / TOTAL PRIVACY

Be assured that your presence and identity on the internet will nothing more than the footprints of a ghost.

## 6 / 50+ LOCATIONS WORLDWIDE

Easy access to phone numbers in over 50+ countries and over 30+ social media platforms

# ADVANTAGES OF GHOSTPRISM

No more sharing of your personal number for social media accounts. Hide your real phone number from customers, clients or others while sending or receiving marketing or promotional texts and A2P SMSes.

Create and access e-mail accounts for sending and receiving e-mails absolutely private & anonymously with *'ghostxprism.com'*

Access the internet using private VPNs from across the world thus keeping your real location and IP address hidden from cyber threats.
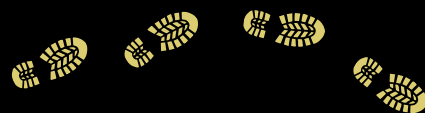

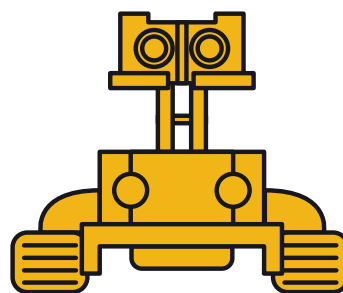

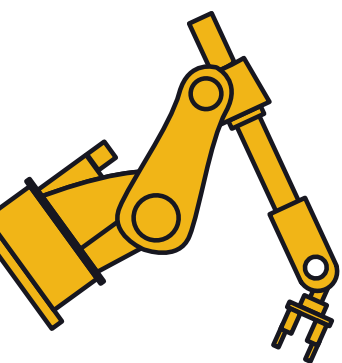

# ROADMAP

## WE ARE ON OUR JOURNEY TO ACHIEVE OUR GOALS,THIS IS HOW IT LOOKS SO FAR
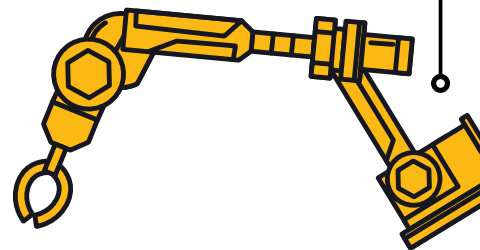

### QUARTER I

Project planning and Formalization of Team
Whitepaper Release
Blockchain Creation
Mainnet Launch
Platform Launch
Infrastructure Hosting
Beta Testing of Platform
Website Launch
Bitcointalk Ann Release

### QUARTER II

Marketing Phase I
User Outreach Programs Initiated
Social Media Pages Launched
First Exchange Listing
Masternode.online Listing
Masternode Wallet Launched for
Windows/Linux/Mac
Debugging of Platform
New Service Updates in Platform
Public MN Presale

### QUARTER III

Second Exchange Listing
Coinmarketcap Listing
Global Advertisement of Services
Marketing Phase II
New locations added to Platform Services
Debugging of Platform

### QUARTER IV

Android Wallet Release
Mac Wallet Release
Campaigns to onboard more users
User Analytics & Ratings
Reviewing the Platform performance and
planning new developments for the future
Marketing Phase III
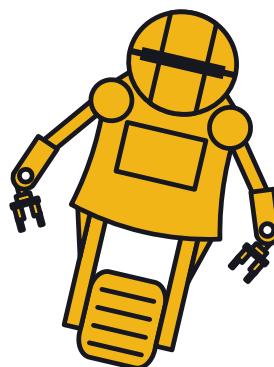

# NETWORK OVERVIEW

## HOW DOES THE PLATFORM WORK FOR USERS?

VPN / PROXY LAYER

DISPOSABLE EMAIL

PROXY SMS

RECEIVE ONLY SMS (FOR VERIFICATION)
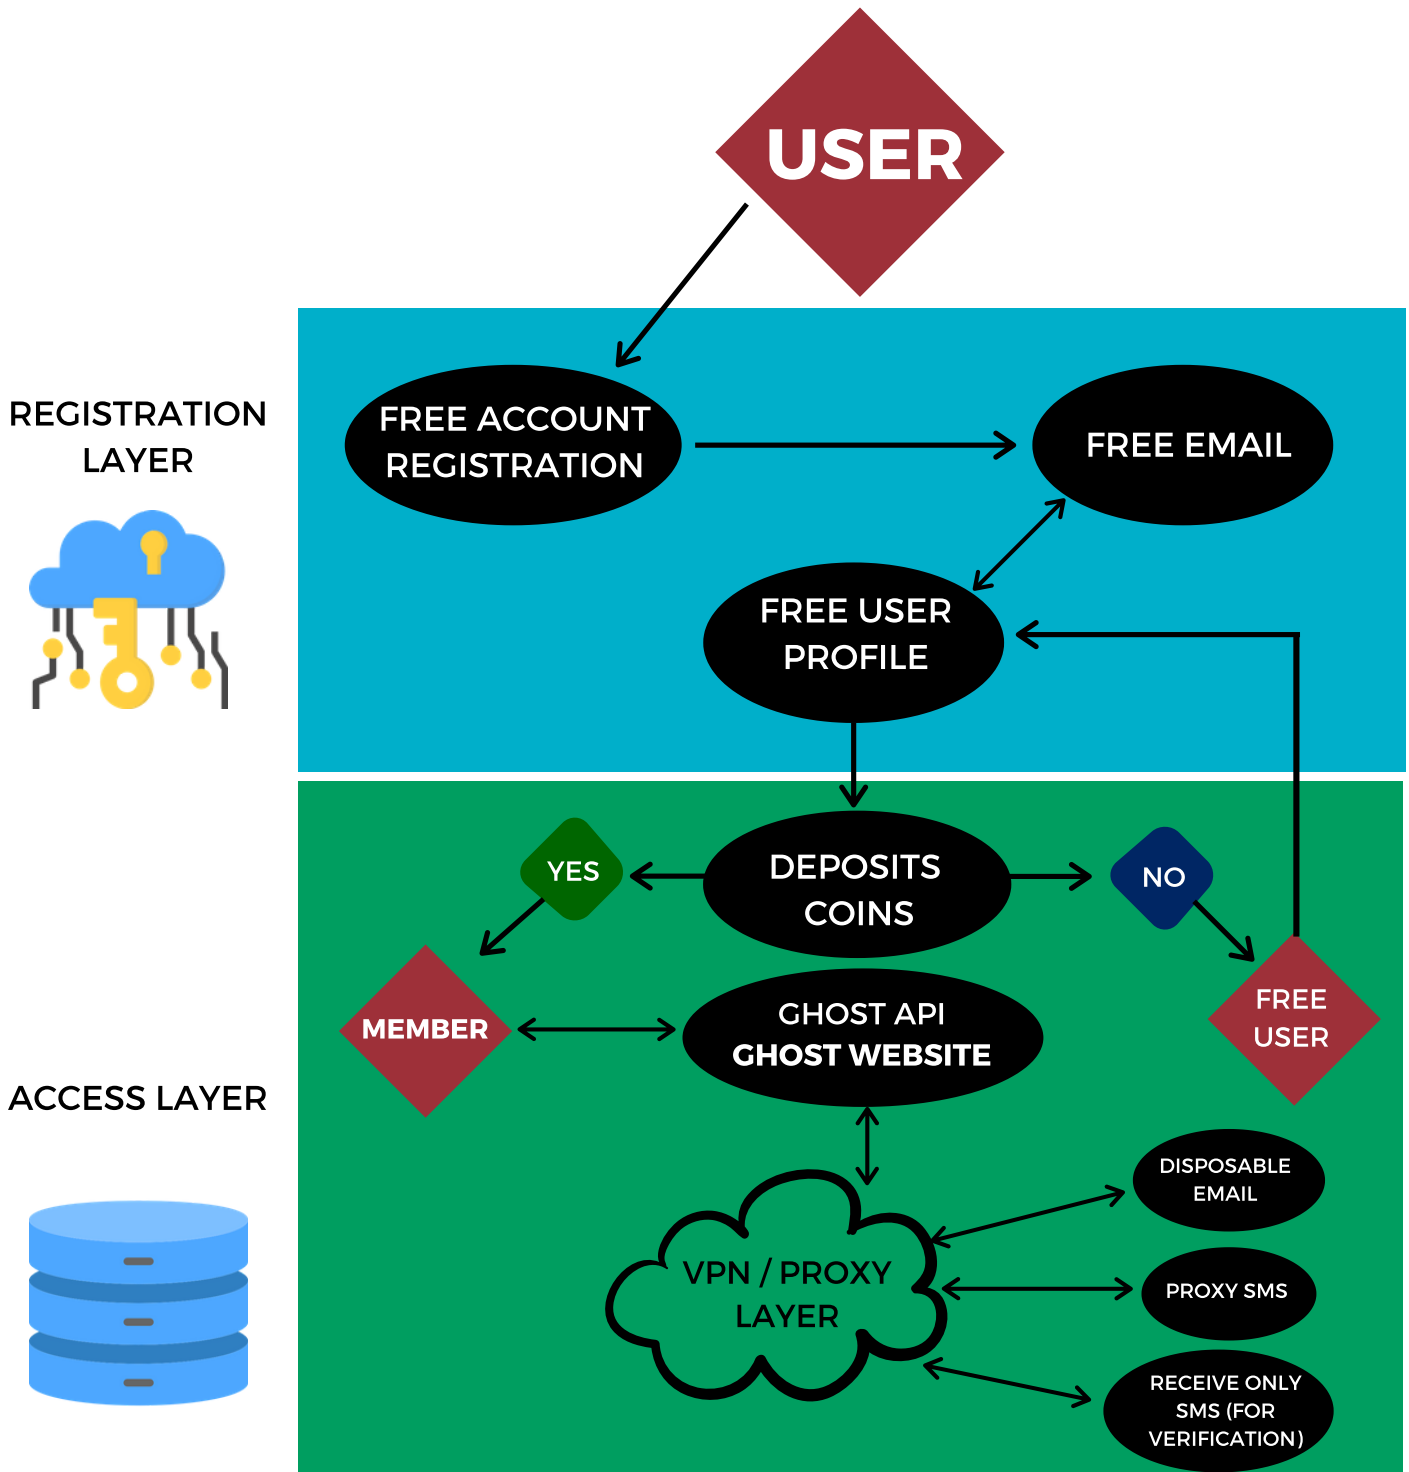

# GHOSTPRISM COIN

Ghost Prism Platform is fueled by **GHOST** Coin. Every service that you avail in the platform cannot be traced back to any fiat transaction as the payments are in Ghost Coin which is available in any established exchange with BTC pairing.

**GHOST COIN IS POWERED WITH MASTERNODES, GIVING YOU AN OPTION TO OWN AND GROW YOUR COINS TO ENJOY SEAMLESS SERVICES IN THE PLATFORM AND ALSO TRADE WITH OTHER USERS WHO DO NOT OWN GHOST COIN BUT NEED THEM FOR AVAILING SERVICES IN THE PLATFORM.**

Advantage to Masternode owners, GHOST is a 100% masternode coin with 0 staking reward, thus containing high inflation or reducing market fluctuation by controlling supply. High Masternode collateral also controls availability of coins to serious node owners

# GHOSTPRISM COIN SPECIFICATIONS

| 19 | 37703109 - 37703109 | 1 | 3.20 | 3.20 |

# APPLICATION TO PERSON [A2P] SMS SERVICE

An Application To Person (A2P) SMS is a message sent by a web app to a mobile subscriber usually to authenticate the user.

**SOCIAL MEDIA PLATFORMS USING A2P SMS FOR TWO-FACTOR AUTHENTICATION PURPOSES AND ONE-TIME PASSWORDS INCLUDE GOOGLE, TWITTER, FACEBOOK, INSTAGRAM, WHATSAPP, SNAPCHAT, TELEGRAM ETC.**

Currently SIM-based SMS is carried out via your service provider's SIM gateways. The SMS server hosted and maintained by professional SMS Aggregator companies in the countries where they are geographically located.

Most web based apps and online platforms have mandatory device or number authentication system for more security and to control multi account creation in their platforms.

With this feature comes risks and disadvantages like compromising on identity, phishing, etc.
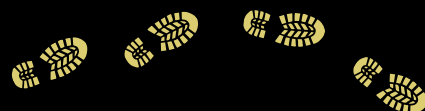

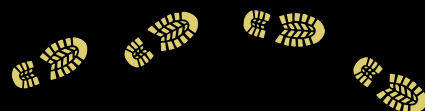

# PROXY SMS

## HOW DO YOU SEND MESSAGES WITHOUT COMPROMISING YOUR PRIVACY

GhostPrism's proxy SMS is an anonymous message system wherein you can choose the receiver, sender and the message. You also have the option to set the time of SMS delivery. All you have to do is to choose your sending number from a list of available phone numbers thus ensuring that your message is sent in absolute anonymity. You will have to apply to get a SMS number, once approved and after payment you will be able to use the new proxy sms number for your personal use.  Please note that phone numbers do not work for social media phone verification as social media platforms recognize the numbers as commercial. With our API for proxy-sms you will be able to automate messages needed for business, or personal reasons. However rate-limiting may occur in some cases and we do not allow usage of this service for harassment.

Use this service to surprise or prank a close friend or surprise a loved one on a special day. If you are a marketeer, send out messages to your database without having to declare your personal number.

The fun part is that the real sender or receiver cannot be traced. You do not need to register to send an SMS. Also you have the option to select your sending number from a list of available phone numbers. Also you can send SMS or receive SMS from anywhere across the globe as long as you input the international access code correctly for every mobile number - e.g. +1 for USA or +44 for UK. You can run a text campaign for any company from anywhere in the world. Once you select your number GhostPrism will receive your OTP or message and / or send your message to your selected list safely and completely anonymously.

All sending and receiving messages as a service are chargeable and will be bought using the "GHOST" coin.

# PRIVATE & ANONYMOUS EMAIL SERVICES

## CREATE EMAIL ACCOUNTS WITHOUT CONNECTING YOUR EXISTING EMAIL IDS

***@ghostxprism.com for your social media accounts and recovery email keeps you safe and secured from cyber risks

Create new pages and accounts to target more audience for your campaigns without compromising your privacy

No one wants to have their private information bought and sold to companies only to be added to yet another marketing list so that they receive even more SPAM than they already have to deal with. It is intimidating giving someone your phone number or email address because you never know where it might end up.

You should never have to worry about being spammed via email, text or phone because you elected to register on a website for a product or service.

Ghost is here to protect your private email, phone number and other UID from being abused by marketers and identity thieves.

Tired of constantly giving out your personal email to every site or services you register with knowing that those will likely be turned around and sold to marketers! The solution to this problem of unwanted marketing SPAM lies in a disposable email address. Proxy or throwaway email address is a great way to protect your real email address. GhostPrism's services help you proxy your email with a throwaway email account thus helping you keep your identity private.

Why many people are using proxy email addresses with days is to avoid having their main email address become a target for SPAM which after so many years is still a huge problem on the Internet. Newer threats like phishing & data leaks from social media platforms also pose a risk on our private information.

In Ghost platform you do not have to share your personal email address to register. Enjoy a disposable email account address and use it wherever you need a valid email address but don't want to give out your primary email.
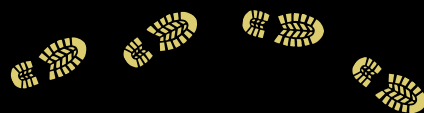

# PROXY IPS WITH VPN SERVICES

**50+** GLOBAL VPS LOCATIONS

**30+** COUNTRIES TO CHOOSE FOR SMS

**5K+** USERS

Hide your IP address and avail services like anonymous web browsing and prevent eavesdropping on your network traffic with *'Ghost'*

Protect and shield your true IP address and enjoy security-related benefits. Internet privacy is a growing concern for users. A VPN, or virtual private network can help you stay hidden and private when browsing the internet or downloading content.

Web proxy is a way to hide your IP address from the websites you visit. Web or online proxies are similar to search engines and so are easy to use. When you use an online proxy the websites you visit are unable to see your real location because the proxy makes it look like you're accessing the page from a different location.

# BENEFITS OF USING A VPN OR PROXY IP

**Your IP Address** - An IP address is your computer's unique address on the web and all your online activities can be linked back to your IP address. Don't leave your privacy to chance, a VPN hides your real IP address. Safeguard yourself from data capturing of ISPs, search engines, websites, marketers and hackers.

**Your Geographic Location** - VPN services offer different gateway servers around the globe, allowing you to spoof your IP address and location. This allows you to access geographically restricted content, government blacklisted websites and VOIP services.

**Your Web Browsing** - Even after deleting your browsing history and cookies, your web activities are open to anyone who wants to snoop. This is because everything you do online can be linked back to your IP address.

**Your Personal Data** - Public Wi-Fi hotspots come with serious security risks for instance hackers can use public Wi-Fi connections to steal your private information and distribute malware. They can steal your logins and passwords, and eavesdrop on private messages. Accessing the internet through VPN helps keeps your information private and safe when using hotspots in public places like airports, hotels or cafes.

**Your Identity on Social Media** - An active on social media handle will need more than a pseudonym to truly hide the identity on social media, blogs, and forums. Not only can the webpage admin see the details they can track user using the footprint of the IP address. So if you want to keep your comments and opinions private use a VPN to mask your IP address.

APART FROM KEEPING YOUR IDENTITY PRIVATE A VPS IS USED TO BLOCK ANNOYING ADS, COMPRESS DATA, SUPPRESS UNWANTED POP-UPS, REMOVE SCRIPTS AND DISABLE COOKIES WHILE YOU SURF
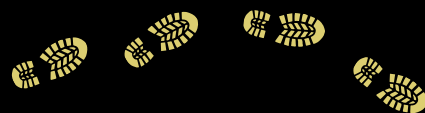

# BENEFITS OF USING A VPN OR PROXY IP

**Your Spending Habits** - Your online buying habits reveal a lot about your personal life. A VPN acts as a shield between your PC and the websites you buy from, thus preventing e-commerce portals from tracking your IP address and linking it to your buying activities.

**Torrents and Downloads** - Companies are increasingly cracking down on torrent traffic on peer-to-peer file sharing networks. If you are found violating any copyright, you could end up being fined heavily. Use VPN to hide your IP address and keep your torrenting activities private.

**Your Mobile Phone Activities** - As more people are using their mobile phones to access the internet, you are broadcasting your IP address, location, and activities for anyone to snoop. Similar to VPNs for home or office, a mobile VPN app also provides data encryption and privacy helping you to keep your mobile activities anonymous.

**Your Web Surfing From Others** - Many institutions and organizations do not allow employees or members to access the internet for private use. Using a VPN at work over your institution's network  helps to keep your browsing activities private.
