ABSTRACT

The boom of cybertelecom in the last decade emerged as a key disruptive innovation of the era and essentially shaped how individuals communicate in an increasingly digitalized world. However, central authorities across the globe have often come under fire for exploiting their power by blocking VoIP apps to promote political agendas and take away the voice of the people. The Blockchain-driven technology of GoalTime presents the ultimate solution to this prevailing challenge and leverages the unprecedented potential of crypto to operate a completely decentralized and serverless architecture. This document outlines the functionality of this framework as a solution to current challenges facing subscribers and highlights the potential of the GoalTime Network as a next-gen communications tool.

In Plain English: GoalTime Network is a blockchain driven solution to solve the issues and challenges facing the cybertelecom industry.

2 INTRODUCTION

Blockchain technology has the potential to disrupt a plethora of industries and inspire a revolution by permitting the execution of transparent and open exchange over the Internet. As the growth of the digital economy continues to transcend expectations, the communications industry stands at the forefront of this unprecedented progress

In Plain English: GoalTime Network seeks to start a revolution in the digital economy.

While Blockchain has successfully penetrated within the financial sector, its entry into the communications arena is yet to make an impact and gain exposure amongst the masses. GoalTime is a true end-to-end mobile network in the ever-growing Blockchain ecosystem which aims to equip users with the ability to connect via a completely decentralized and server-less architecture.

In Plain English: We aspire to integrate Blockchain technology in the mobile network industry.

GoalTime is designed with a vision to emerge as a stepping-stone in promoting the integration of Blockchain within telecom. GoalTime is a next-gen mobile network which improves the digital experience of subscribers by embodying the attributes of cost-efficiency, convenience and trust.

***Experience the future with GoalTime, a globally local
Blockchain-based mobile network which is here to transform the
way you connect.***

In Plain English: GoalTime Network provides numerous advantages to subscribers including cost efficiency, trust and convenience.

3 CURRENT OFFERING

3.1 The 'Customer Side' of Connectivity

The goal of GoalTime is simple; as a comprehensive platform it enables users to make calls by employing the features of a Blockchain-based network. Despite the progress in technology and the progressive digitalization of the industrial landscape, Internet and connectivity censorship continues to persist as a critical issue for customers across the globe. Owing to volatile political dynamics and the willingness of centralized authorities to impose their own agendas on the public, the blockage of VoIP services and messengers is often experienced by customers that are essentially left with inexistent options to engage in effective communication.

In Plain English: GoalTime Network is the solution to solve the blockage of VoIP services which is imposed by governments and central authorities.

3.2 Existing Challenge

GoalTime has different types of existing challenges. Those who win these challenges will be given various awards and honors from GoalTime.

Different types of platforms will be launched by GoalTime, and GoalTime will be informed about them through official social media about why a platform has been launched and what services the general public can use. We can say with certainty that the kind of platform launch by GoalTime will launch for the general public. And ordinary people will benefit greatly from doing these things. The social networking app and the GTX Token that we will give you can help you earn each other through Existing Challenge. We usually know that if one winner is challenged, the other loses. But if we lose the challenge here, InshaAllah will be able to recover the money lost through other services. So from now on, join us and help us grow our company with all our service and earn your own, giving others the opportunity to earn.

4 THE GOALTIME SOLUTION

4.1 GoalTime Subscriber

Boasting of a server-less architecture which is completely free from the intervention of any third-parties, the decentralized framework of GoalTime allows users to make calls over a Blockchain network. Upon becoming a subscriber of the GoalTime network, a user is granted with a public or private address and the call is initiated through a mobile number which is similar to that of a regular mobile carrier.

In Plain English: GoalTime Network allows users to make calls over the Blockchain network with conventional method of public phone numbers.

The process flow of GoalTime begins once a number available within the network is found in the Blockchain registry. From this point onwards, a random node is selected from a high speed network to act as a server. The node then proceeds to initiate the call and a time-bound session is established. Accordingly, the completion of session occurs once the call itself is disconnected.

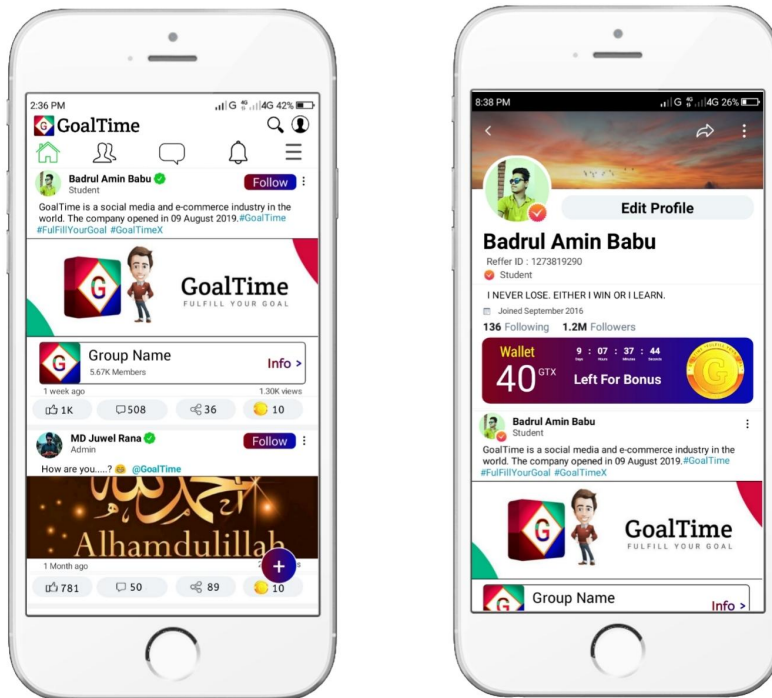

In Plain English: GoalTime makes use of a random node to make calls which plays the role of a server.

These contact numbers are served through the Blockchain and enable subscribers to make a call within the GoalTime network using random GoalTime nodes. The system operates in a manner whereby each node in the network acts as a mobile network tower like conventional telecom mobile network carriers and each call passes through a new node. Encrypted chats initiated on the network are handled through the algorithm of GoalTime Bone.

In Plain English: GoalTime enables each node to serve as a mobile network tower and allows users to call and chat.

4.2 GoalTime App

GoalTime - FULFILL YOUR GOAL

GoalTime App is a social networking app. This App is the goal of GoalTime. In this app you can share your pictures, videos, and your thoughts with your GoalTime friends. And by doing these things they will be able to make money. With this app you can earn GTX token for free. This app will be available on the Google Play store and App store.

4.3 GoalTime Token

GoalTime is powered by its own unique currency known as the 'GoalTime N'. This cryptocurrency enables users to make calls over the network and benefit from the value-added features provided by the platform. With cost-efficiency, easy usage, and transparency, the token price is expected to rise with the influx of users within the network as the maximum number for mining token is 30 million.

In Plain English: GoalTime revenue model is managed by GoalTimeN Token which is used to make calls.
