Minerlotto

KUBLACOIN

PRESENTATION

You must be wondering why the name **Kublaicoin**. The answer is very simple: it was the name of the first person to break an old paradigm and to create the first possibility of negotiating goods and services through paper. However, by that time we had reports that the money or this new way of negotiation only generated money to its creator. Now, we will break again a mental paradigm and create the currency revolution, generating revenue and financial income for people, independently of their social class, study level or nation, with the first decentralized mining company and lottery of the world the **minerlotto.com**.

In **2009** we had the opportunity of knowing a new technology called Blockchain, that has already become a reality and that will change the way we will negotiate in the future. With this new technology, emerged a currency named Bitcoin, however it is not serving the purpose it was meant to in its creation, that would be to give back the money to the people and distribute richness. With the pursuit of richness distribution through a smart lottery system, a group of intelligent visionary people created **Kublaicoin**

GLOSSARY

- **SMART CONTRACT**

Smart contract obtained by programming on the network Blockchain Ethereum.

- **ETHEREUM**

Decentralized network capable of execution of smart contracts Using the blockchain technology.

- **ERC20**

Smart contract pattern on the network Ethereum.

- **EXCHANGE**

Platform that intermediates the purchase and sale of Cryptocurrencies.

- **ICO**

Initial Coin Offering, consists in the pre sale of goods and services that a company intends to offer, through commercialization of tokens emitted.

- **MOEDA VIRTUAL**

Finite digital resources, that can be negotiated for free, among their own users, without the need of intermediates.

- **KUBLAICOIN - KUB**

Name and initials of our coin.

- **WALLET**

Online wallets to store virtual currency and tokens.

- **TRADING PAIRS**

Possibility of exchange between two Cryptocurrencies, For example, KUB/BTC.

- **BLOCKCHAIN**

It is a ledger. Different from just a book, a copy of the Blockchain can be stored on a computer or device by every single one of its users.

INTRODUCTION

A NEW ERA FOR THE NEW MONEY

Money was invented in an unusual way, in the mid 70's in Asia, and now one more time it is about to be recreated and distributed in a democratic and smart way. The question is: Are you ready for this new worldwide evolution?

CURRENCY DISTRIBUTION WITH A DECENTRALIZED LOTTERY

Beyond creating money to distribute richness, we are creating a new lottery model. This new lottery model is totally decentralized, without any governments or bank institutions. We propose taking the power of lottery to people, that will not need to pay anything to be part of this great community, and have the possibility to win millionaire prizes. The only requirement and effort needed will be leaving a computer turned on a few hours a day.

TRANSACTIONS AND SMART CONTRACTS

DISTRIBUTION OF TOKEN

ALLOCATION:

We are facing the only currency that does not exist to sell your coins in an ICO, and all of your currency will be distributed to members of the community.

100% distributed in the community

TOKEN

Name of the Token: Kublaicoin

Algorithm: **ERC20**

Initials: **KUB**

Token's maximum amount: **500,000,000**

KUB: available in the first distribution cycle: **1,000,000**

KUB: available in the second distribution cycle: **2,200,000**

KUB: available at the other cycles and it will be done in a scalable and planned way, always maintaining the growth of the currency according to the demand of the community and never letting the currency fall sharply.

MONEY DEMOCRATIZATION IN THE MODERN WORLD

Nowadays, governments control the economy and worldwide rules of trade and services. Many ideas come out as trends and tendencies in the financial sphere and some of them are not true, like the pyramid concept, in which everything that the population creates and has the potential to distribute richness among people, is taxed by governmental institutions like a pyramid. In this process, a lottery system is created, in which thousands of people have to lose in order to have only one winner, and through this, governments retain a great deal of the money. Who does that favor? With a Kublaicoin it will be totally different.

FINALITY

THE MECANISMS

One of the largest ecosystems and infrastructure ever seen in the world of cryptocurrencies is being set up. The applied ideas are simple and intelligent, with a single purpose: to distribute wealth among people in the world. We will have three major projects working full-time to generate real income and revenues making the entire ecosystem sustainable without human need. How is that possible? There will be a mining system that will operate **24 hours a day, 7 days a week**, generating revenue for the ecosystem.

GOALS AND GROWTH

OUR GROWTH

● FUTURE PROJECTION:

2020 - Q1, Q2
REACH 50 THOUSAND USERS

**TAKING CURRENCY
PRICE TO \$1.50**

2020 - Q3, Q4
REACH 100 THOUSAND USERS

**TAKING CURRENCY
PRICE TO \$3.00**

2021 - Q1, Q2, Q3, Q4
REACH 200 THOUSAND USERS

**TAKING CURRENCY
PRICE TO \$10.00**

2022 - Q1, Q2, Q3, Q4
REACH 300 THOUSAND USERS

**TAKING CURRENCY
PRICE TO \$30.00**

KUBLAICOIN Minerlotto

Minerlotto is a new form of income distribution, with a mining system through lottery and artificial intelligence. It is the world's first free lottery system.

Following global trends, **Minerlotto** aims to be the largest lottery in the world without actually having any mining machines. The bold concepts that are main references are Uber and Airbnb, huge companies in their segments, that do not have a high infrastructure cost. Minerlotto will have an intelligent ecosystem, thought of nowadays and a bright future. Anyone in the world can be part of **Minerlotto**, taking the **Kublaicoin** concept to several customers in a free and fun way.

Uber

largest transport company in the world, without the use of a motor vehicle.

airbnb

largest hosting network in the world, the company offers 4.5 million places to stay in 81 thousand cities, noting that Airbnb does not need to acquire these properties.

Minerlotto

we intend to follow the trends above, being the largest mining and lottery company, without having to purchase an obsolete mining machine, only using the largest network of people connected to a mining pool, generating in return a net revenue for Minerlotto, becoming the largest lottery company in the world, after all it will be the only free lottery in the world.
