1. Introduction

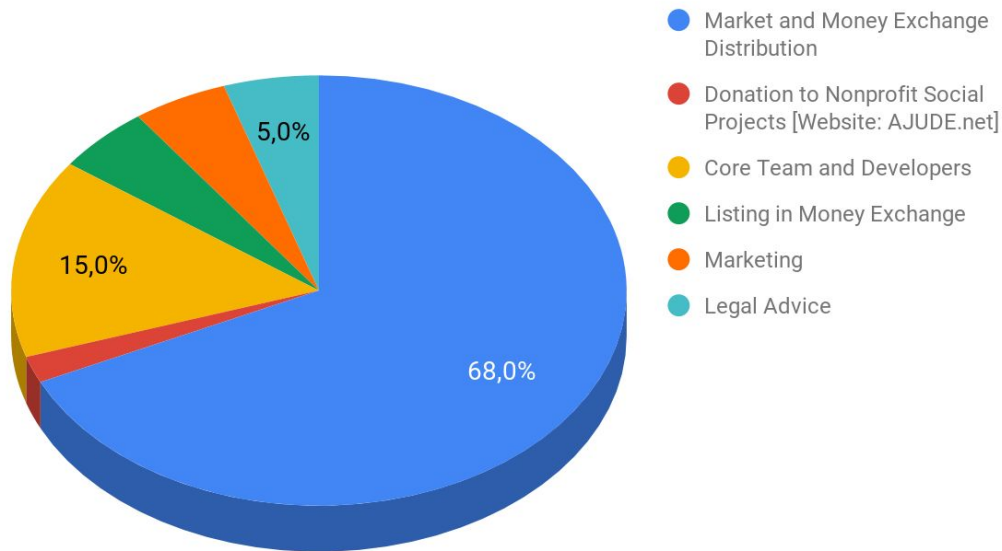

We present to the world MDToken a currency that must be used to buy and sell products and services developed by the team of MDInvest.nl and its partners, our organization works in the development of web applications and tools using blockchain technology with the objective of make the world a better place in a decentralized way, enabling a more just world.

MDToken was built on the WAVES currency platform enabling extremely fast transactions with the lowest market rates, making our token usage accessible to everyone and with lower transaction fees.

2. Token Distribution

MDtoken has 2,100,000,000.00 (Two Billion and One Hundred Million) units created, all of which are managed by WG through MDInvest, which will organize the distribution of these currencies as follows.

- 68% - Market and Exchange Distribution
- 2% - Donation to Nonprofit Social Projects [Website: **AJUDE.net**]
- 15% - Core Team and Developer
- 5% - Listing in Exchanges
- 5% - Marketing
- 5% - Legal Advice

3. Donation

MDToken is a decentralized project designed to be used by everyone wishing to have products and services created by MDinvest's team, with 2% of all profits generated by the purchase of products or services using the token, donated to non-governmental organizations which can register through the website ajude.net.

4. Conclusion

All tokens can only be acquired through the exchanges where we will be launched, there will be no ICO or token distribution, this asset can only be used in MDInvest applications and through its partners.
