MYPOKERCOIN
## THE ULTIMATE REWARDS PLATFORM™

Platform White Paper

The Ultimate Poker Rewards System (UPRS) provides software-based poker rooms and online casinos with a revolutionary rewards system catered to players of all levels of experience. Play More. Earn More.™ The UPRS leverages MyPokerCoin (MPC) as a reward token that is easily transferable across all participating venues and online casinos. This eliminates the need for players to have multiple reward accounts and provides them with the flexibility to use the same rewards program in multiple places.

MyPokerCoin is the ultimate player reward as it utilizes blockchain technology to provide safe, transparent and secure transactions. The token can be stored in your own personal digital wallet and can be traded for other cryptocurrencies in the exchanges.

POKER PLAYERS EARN MYPOKERCOIN AS REWARDS
### PLAY MORE. EARN MORE.™

The software is integrated to the tables in software-based poker tables and online casinos through API plug-ins. The software tracks numerous player metrics including time played and tournament wins. This lays the foundation for player earnings by providing a tiered roadmap to higher stakes earnings.

The system rewards players based on time played and tournaments won. The player navigates through different tiers which provide incremental levels of rewards throughout their career. Each tier level provides the player with better rewards — the more they play and the more they earn. Play More. Earn More.™ The tiers are incremental but also retroactive. If the playing frequency decreases or the player's reward accounts show inactivity, the

tiers downgrade or reset respectively. Higher tier poker players are protected from drastic tier downgrades by having safety-net tier levels of support.

To understand how the platform and token is used, it is important to understand the ecosystem.

THE UPRS ECOSYSTEM

MyPokerCoin revolutionizes the poker rewards system by providing players and establishments with numerous benefits. These benefits include:

Ease of use across multiple venues and establishments:

TRAVEL WITH ONE POKER REWARDS SYSTEM
PLAY MORE. EARN MORE.™

ONLINE POKER ROOMS   ULTIMATE POKER REWARDS SYSTEM   SOFTWARE BASED POKER ROOMS

Security:

SECURE YOUR REWARDS THROUGH THE BLOCKCHAIN

Transportability:

PEACE OF MIND WITH A SECURE USER WALLET

POKER PLAYER   PLAYERS WALLET

The UPRS platform allows MPC to be used in multiple physical and online establishments. The MPC is earned by the player and deposited to their personal digital wallets set up through the TronLink system which uses the TRON Blockchain. The blockchain provides cryptographically secure data transfers, providing players and establishments increased peace of mind through secure and transparent transactions.

MPC Token Economics

There are a total of 7,777,777,777 MPC Tokens in the MyPokerCoin blockchain of which 77,777,777 are currently circulating. Every three months, 77,777,777 will be added into the circulating aggregate amount. MPC will be held in the TRON network and can be exchanged towards BTC or ETH.

MPC Reward Conversions

As players accumulate MPC, they are offered free table time in select event locations. Furthermore, players can hold their MPC in their MyPokerCoin wallets and convert to BTC or ETH when the MPC token is available on Exchanges. Exchanges will be announced in the near future.

Project Timeline

The development and launch of the platform and release of MPC consists of three phases:

STAGE 1 (Launch: January 2020): Software Development & API Documentation are deployed in the licensed live poker rooms.

The development stage creates the platform that leverages MyPokerCoin's blockchain technology. The platform will be the backbone of MyPokerCoin's ecosystem allowing the players to use their rewards across the board in live and online poker casinos.

CREATING THE ULTIMATE POKER REWARDS SYSTEM

SOFTWARE DEVELOPMENT

API DOCUMENTATION

STAGE 2 (Launch: January 2020): MyPokerCoin (MPC) Launch

During this phase, we expect to launch MyPokerCoin to the public through various cryptocurrency exchanges. Players can obtain MyPokerCoin via rewards accumulated or through trading other cryptocurrencies for MPC in the exchanges.

MYPOKERCOIN AVAILABLE ON THE CRYPTO MARKET

STAGE 3 (Launch: February 2020): MyPokerCoin Circuit Series

MyPokerCoin Circuit Series is our signature event, providing players with the opportunity to play in high-stakes tournaments powered by MPC. Players will be able to cash-out their MPC at any given time and exchange the MPC for BTC and ETH in various cryptocurrency exchanges.

MYPOKERCOIN
THE ULTIMATE REWARDS PLATFORM™

CIRCUIT SERIES EVENTS

MYPOKERCOIN

The MyPokerCoin Circuit Series will allow users to use the MPC Rewards to enter tournaments and other games held by licensed Live Poker Rooms and Online Poker Sites.

STAGE 4 (Launch: TBA): Online Application Launch

MyPokerCoin Circuit Series via Live Poker and or the launch of MyPokerCoin Online Poker App. MyPokerCoin Digital App Technology Powered by MyPokerCoin.

MYPOKERCOIN MOBILE APPLICATION

The last and final stage of MyPokerCoin consists of bringing a digital platform to mobile users using MyPokerCoin Digital App Technology. Players from all over the world will be able to play with MPC on the go while accruing more as they play more. MPC is the only token allowed for use in the platform.
