What is New Year Bull

HIGH BURN RATE

We burn 90 % of the supply.

Maximum Supply in 2021 will be 21 million.

By New Year's evening of 2020, we will have a maximum supply of 21 million with maximum 10 million in circulation.

TEAM

We are a team of professionals from the Blockchain and Finance sector, who are passionate about blockchain technology and cryptocurrencies.

**Max. 21 million supply
& max 10 Million in
circulation 31-12-2020.
That is why we are
called
New Year Bull**

MEME

The New Year Bull is a token with a high burn rate but also a meme.

MISSION

To create a token with limited supply and increased value bringing returns to the community. By 2021, the remainder 11 million tokens will be unlocked and distributed to holders.

How does the burn work ?

WE BURN EACH DAY,
1 MILLION UNTIL NEW
YEAR 2020.
ALL IS 100 % TRANSPARENT
ON THE BLOCKCHAIN.

One of our goals is to be in the Top 5
of this Ethereum burn address.

When we are in this Top 5, we know that the Bull is
happy and one thing is important, you need to make
sure the Bull is happy

<https://etherscan.io/address/0x0000000000000000000000000000000000000001>

After this is met, will we go for the 0 address.

When we reach \$1, will we have daily \$1 Million Burns
and that will create some hype and Bull Marketing.

What is Defi Bull Insurance

Many DeFi projects are giving a monthly ROI of +200 %, we believe we are better off getting a piece of that and spreading the risk.

INSURANCE / BUY BACK

We are selling 2 million tokens in 2020 and 2021 and then converting these to other projects, mainly listed on Uniswap.

STATISTICS AND INSIGHT

Monthly statements about which coins we have bought and at what holding we have, will follow.

INSURANCE

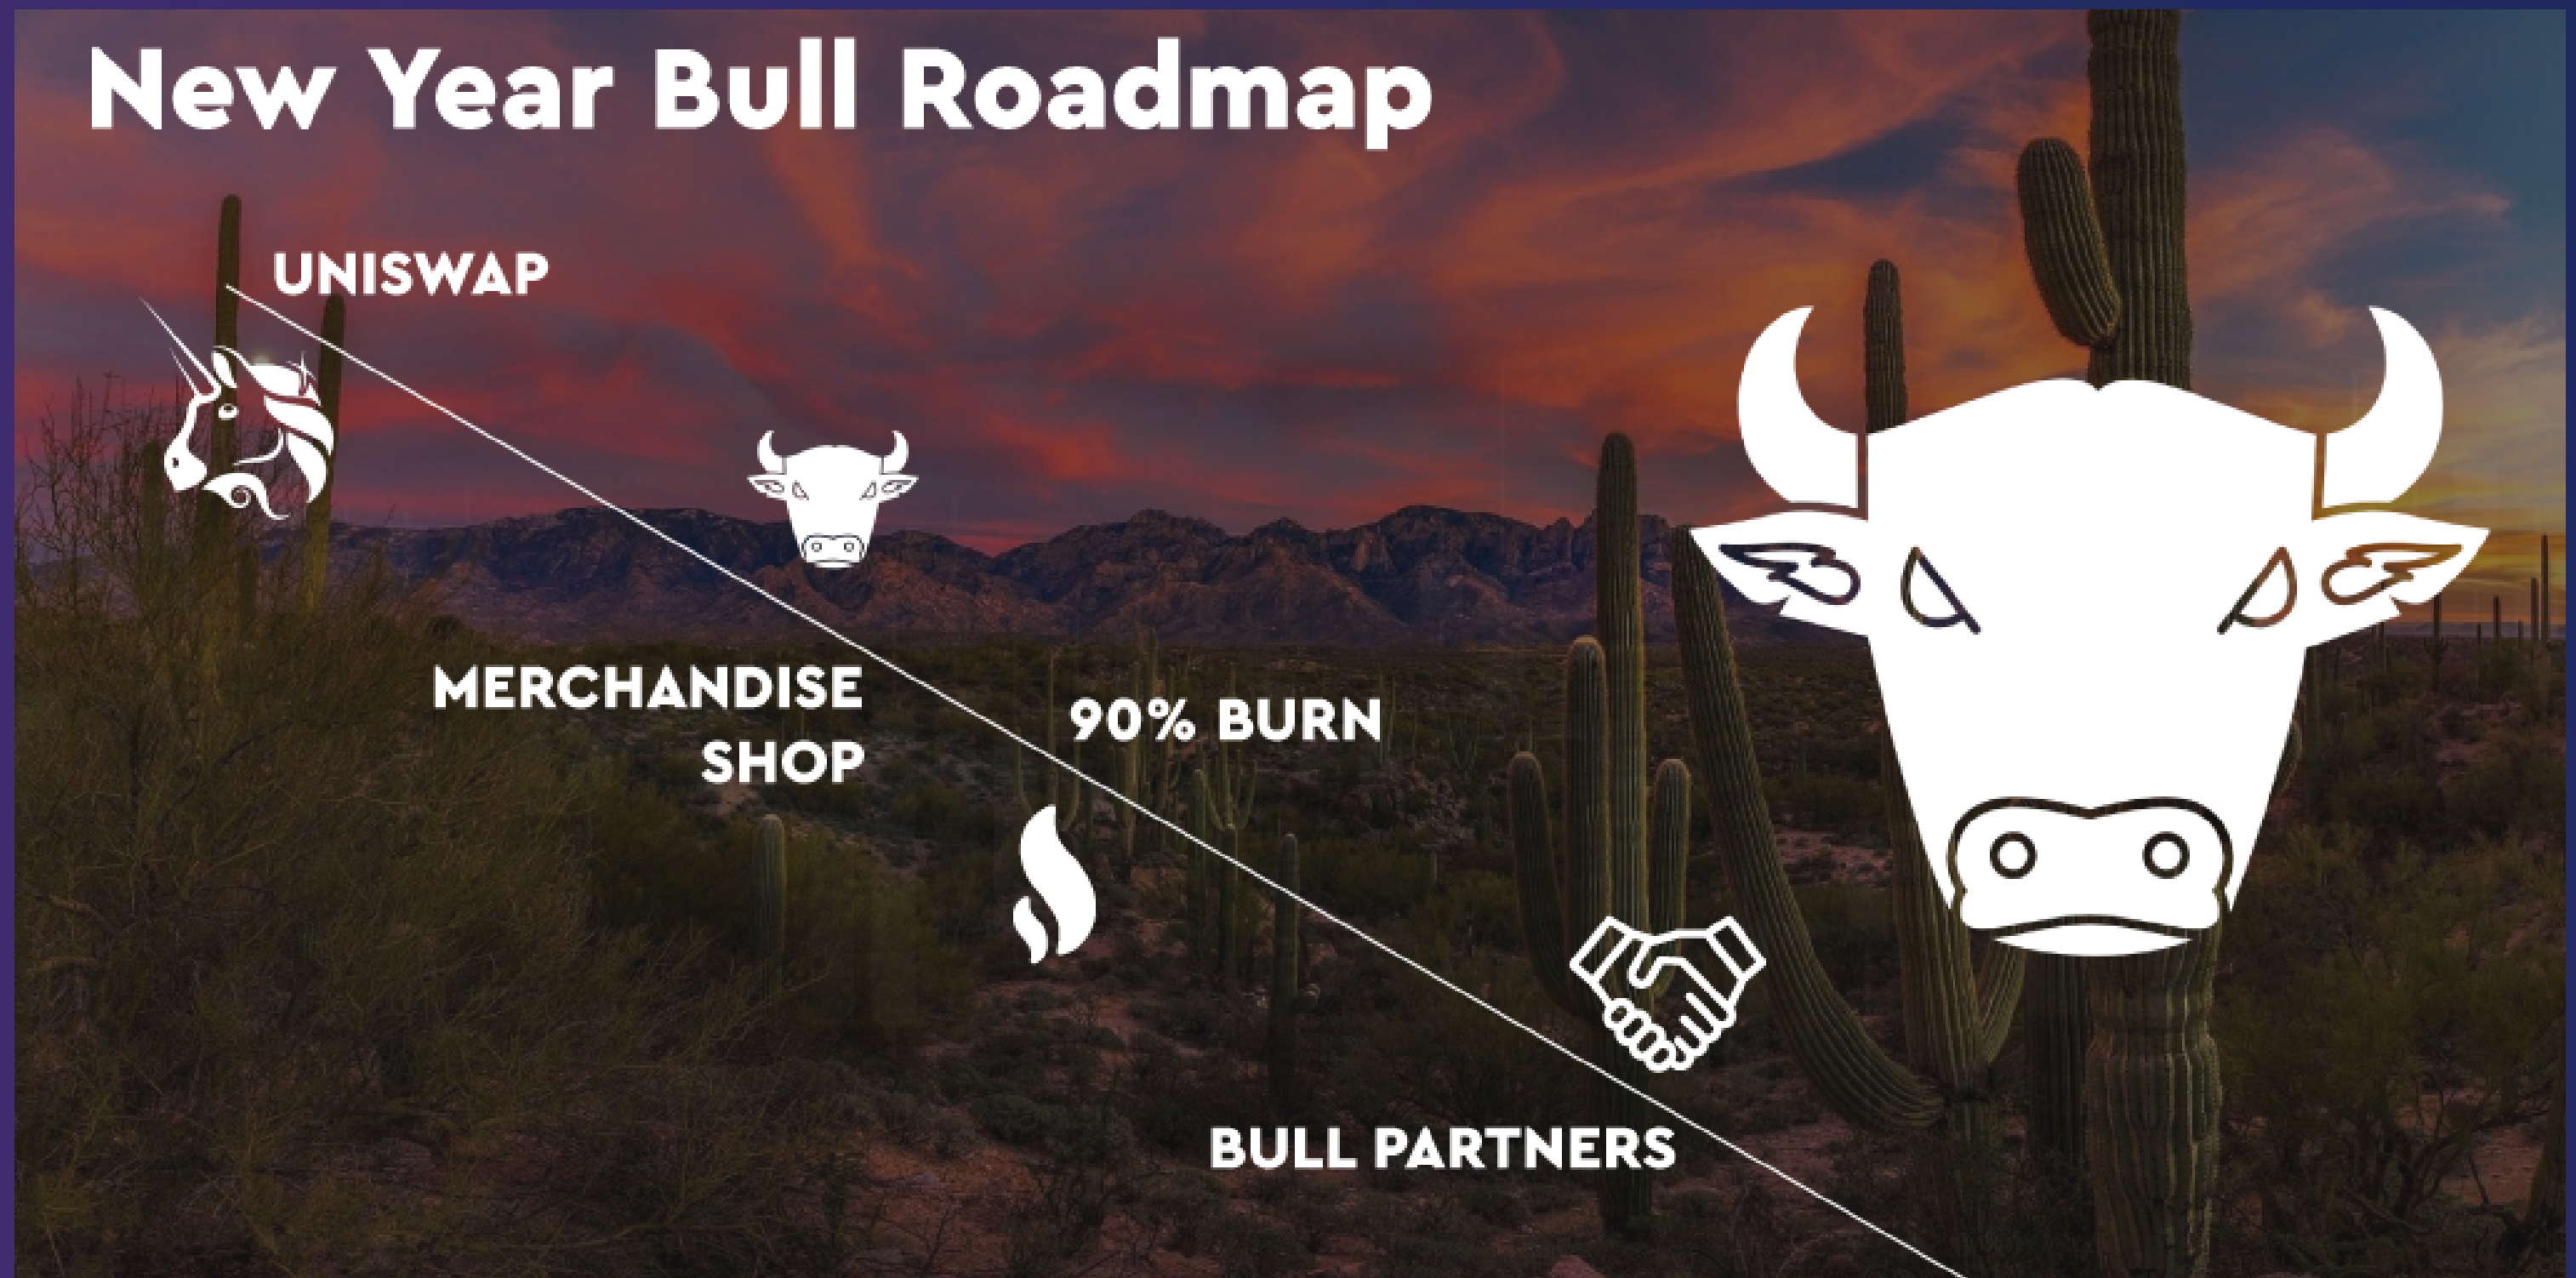

We have an extra security and riskprofile, when we hold 20 other projects as support for our project. We will spread the risk.

BUY BACK

We will start the first Buy Back on December 01-12-2020. Meaning that we would have to sell some of our holdings in other tokens.
