INTRODUCTION

Verza is a secure and anonymous cryptocurrency built on the ethereum blockchain to be used globally.

Verza is a cryptocurrency that helps consumers and businesses trade. Verza makes spending and accepting cryptocurrencies as easy as other currencies. Verza aims to be the world's most useable cryptocurrency, helping everyone enjoy faster, cheaper, and secure trading.

Verza will help overcome obstacles that stand in the way of business and general public from entering the cryptocurrency space. In particular.

Verza will focus on the following main areas:

1) **Private**
2) **Untraceable**
3) **Secure**
4) **Fungible**

Verza combines these four areas to create a large ecosystem, Verza is easy to use allowing anyone to get access to cryptocurrency.

VERZA DETAIL

Token Structure

Smart Contract:
https://etherscan.io/token/0xee2d318462fdb587b96f7e69606c6afd0e2ff633

Token name: VERZA

Ticker: ERC20

Token Symbol: XVZ

Decimals: 18

Total supply: 100.000.000

WHY VERZA

Digital Cash For Highly-Confidential Transactions.

Verza brings cryptocurency with new functions such as speed, privacy, security, efficiency, and lower costs.

Verza helps consumers use
Verza as a currency, provides tools for their business need to transact daily.

Private

Verza is created with a high level of privacy in mind, make it high resistance to blockchain analysis

Untraceable

Verza is untraceable, sending and receiving addresses are encrypted transacted amounts are obfuscated by default. Transactions on the Ethereum blockchain cannot be linked to a particular user or real-world identity.

Secure

Verza is a secure digital cash operated by a network of users. Transactions are confirmed by distributed consensus, and then recorded on the ethereum blockchain immutably. Third-parties do not need to be trusted to keep your Verza safe.

Fungible

Verza is truly fungible, thanks to built-in privacy features. Just like cash, all Verza are equal, changeable. It is extremely unlikely that coin will ever be blacklisted by any party due to its association in previous transactions.
