Disclaimer

Vision Software UG (haftungsbeschränkt) intends to always comply with laws and regulations and will always endeavour to obtain the necessary licences and permits.

Informational purpose only

The content of the whitepaper, such as texts and graphics created by Vision Software UG (haftungsbeschränkt) are made to provide more information about Vision, the Vision Crypto App and its features, as well as the Vision token and its utility.

No financial advice

The content is not intended to be financial advice, investment advice or giving recommendations. It is not part of any opinion or any advice to sell.

No securities

VSN tokens are not sold as securities, but only serve as an add-on in the Vision Crypto App. Owners of VSN Tokens are not entitled to any rights to Vision Software UG (haftungsbeschränkt) and its products, including equity, units, profit, revenue or income.

Third party references

This whitepaper contains third-party information and does not contain information expressed solely from our intellectual property. Any information that does not originate in our power is linked in the "References" section.

No transmission

This whitepaper or any copies may not be transferred to any country where the whitepaper and its contents are prohibited.

No approval

There was no approval of the white paper and its information by an authority. Whether this will happen in the future remains open. Accordingly, there can be no guarantee that every law and regulation has been complied with, but the best of intentions have been observed.

Executive Summary

Genesis

Crypto currencies and traditional currencies share two common characteristics: They enable smooth payment processing between 2 parties and serve as a value investment.

Nevertheless, the technology behind crypto currencies is revolutionary and is gaining more fascination and interest due to its unique system. Digital currency as a medium of exchange, which no bank or government needs to be regulated, is the future and the currency of the next generation.

Vision aims to make crypto currencies the currency of the next generations by introducing it to many people and making it easier to enter the new currency world.

The team behind Vision started their career together as Tron Society in 2018 and entered the Tron Network as Super Representatives.

During this time, more people have been attracted to Blockchain and the community has grown.

In November 2019 the work on and around Vision began.

The Vision Crypto App is another part that is intended to help to inspire more people about the Blockchain technology, to help them to make everything even more simple and compact, and to counteract the problems of the conventional money system.

Problem

The conventional money system is based on a centralized and highly controlled system, where you have to trust the government and banks.

Why is this a problem?

- The fiat money system is an inflationary system, since the central banks can print money endlessly.
- The bank uses service providers for the processing of transactions, in whom one must ultimately trust.
- After a transaction has been made, a chargeback is possible.
- National and international transactions may take a few days.
- Governments decide which currency is accepted in the country.

The traditional money system has worked well so far, and it is definitely not solely bad, however, there are more difficulties that will turn out to be problematic.

The decentralized money system is unfortunately not yet able to replace the central system. Nevertheless, the decentralized system offers solutions to many of the problems and might be considered as an alternative for the future.

Another problem is that many people are skeptical and fearful of the system, as it seems overwhelming and incomprehensible to many. People are creatures of habit and are reluctant to get involved in new things.

We should all have control over our own finances!

Solution

We have decided to work in the field of blockchain technology to solve the problems and be another part of the change!

We want more people to take an interest in their own finances, that they can trust themselves and don't have to give their trust to others anymore. We want to have control of our own and not have to give up control. We do not want our money to lose value, but to remain stable!

Most importantly, we want more people to have an understanding of how the technology works and what the possibilities and benefits are.

To achieve these ambitions, we have developed a crypto portfolio tracker with a multi-chain wallet, which is available for Android and iOS.

We have set itself the goal to make the Vision Crypto App as **simple and compact** as possible, so that everyone can use it, whether newcomer or advanced user, everyone should be able to understand it.

Product

The Vision Crypto App is a crypto currency portfolio tracker with an integrated multi-chain wallet with many more features. It is available for Android and iOS.

Features

Portfolio	Multi-Chain Wallet	Exchange
Buy Crypto	Referral Program	Market Overview
Staking	Display Different Fiat	Analytics
News	Visualization Modes	Connections
Payback	Lock Screen	Support Chat

More details about the individual features and what they are used for:

Portfolio: The portfolio shows you the total stock of your investments. It prevents the loss of the overall view of its finances

Multi-chain Wallet: A wallet that supports multiple blockchains

Exchange: To swap one currency into another currency.
The total fee is 0.9%, 0.5% for us and 0.4% for the exchange provider

Buy Crypto: A buy crypto widget, where you will be redirected to Binance to purchase crypto currencies

Payback: Receive Payback on every BTC, ETH and TRX transaction and swaps

Staking: Staking is currently supported for TRX and VSN.

Referral Program: The Referral Program gives users the opportunity to earn money by referring the Vision Crypto App to others

Market Overview: A complete overview of more than 500 crypto currencies and information about the individual currencies

Connections: Connect an Exchange or Wallet to automatically synchronize the portfolio with the transactions on them

Display different Fiat: You can view the portfolio, wallet and market overview in various fiat currencies

Analytics: Analytics of your own investment, a chart comparing individual currencies, diversification and where they are located

News: A news section divided into Bitcoin, Altcoin and Blockchain News

Visualization Modes: Different visualization modes, where you can choose between dark, light and OLED mode

Lock Screen: Lock the app with a pin or biometric authentication to protect it

Support Chat: For questions or problems a direct chat can be started

Vision supports over 500 crypto currencies to add to the portfolio and over 55 crypto currencies to add to the multi-chain wallet.

Exchanges

Support of 6 Exchanges

Swap

Support of 32 Cryptos to swap

Token Vision (VSN)

VSN Details

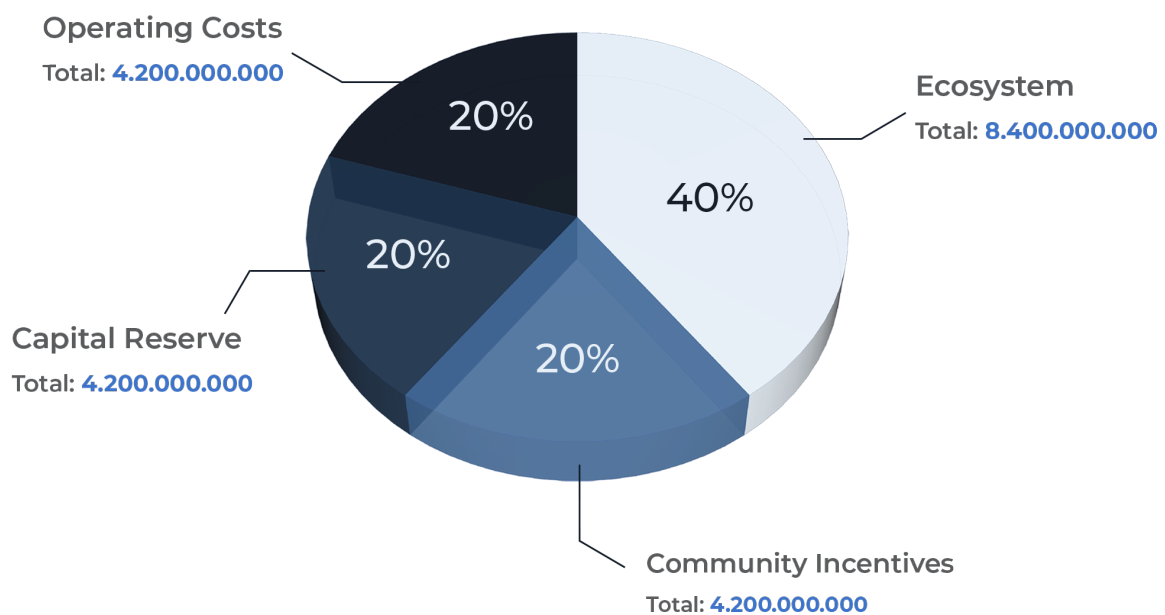

We have created our own TRC-10 token called VSN, which can be used in the app and is an addition to already existing and new features.

Token Details

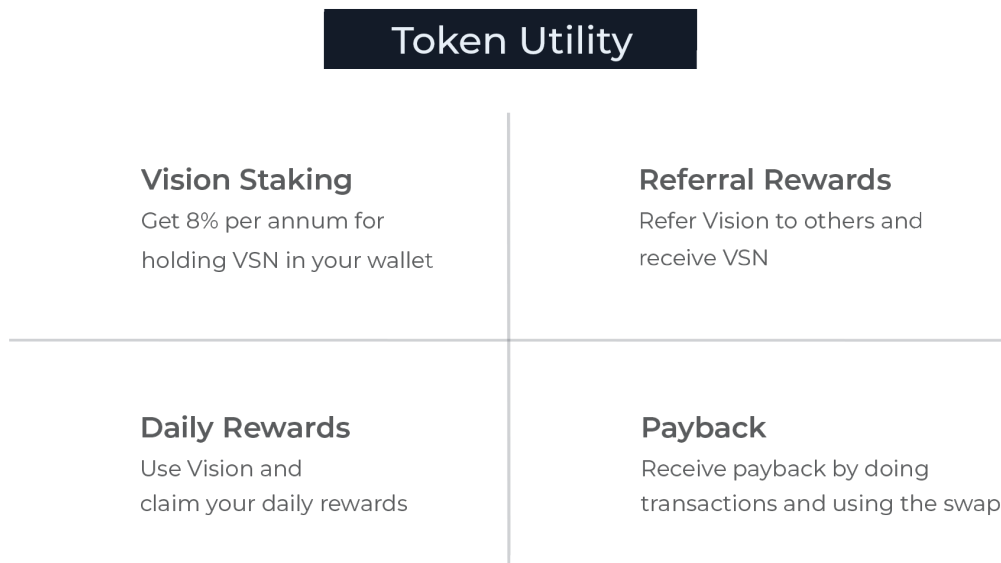

Token Name	Vision
Token Symbol	VSN
Token Supply	21.000.000.000

There is no pre-sale, no public sale and no ICO sale, VSN will only be distributed based on the features in the app.

Token Distribution

VSN Utility

Vision Staking

If you own VSN and hold it in your wallet, you will receive a total of 8% per annum on your amount.

If you are a PRO user, you will get 12% per annum.

Referral Rewards

Participate in our referral program and be rewarded for recommending Vision, you will receive VSN for referring.

Daily Reward

For daily use of the app you will receive VSN as a reward.

Daily Reward

Vision Stake	Reward	PRO
0	5 VSN	10 VSN
1.000	10 VSN	20 VSN
10.000	20 VSN	40 VSN
100.000	40 VSN	80 VSN
1.000.000	80 VSN	160 VSN

Payback

The percentages and limitations may change at any time, for example due to events.

Transactions

For each BTC, ETH and TRX transaction you will receive a payback in VSN.

Transactions

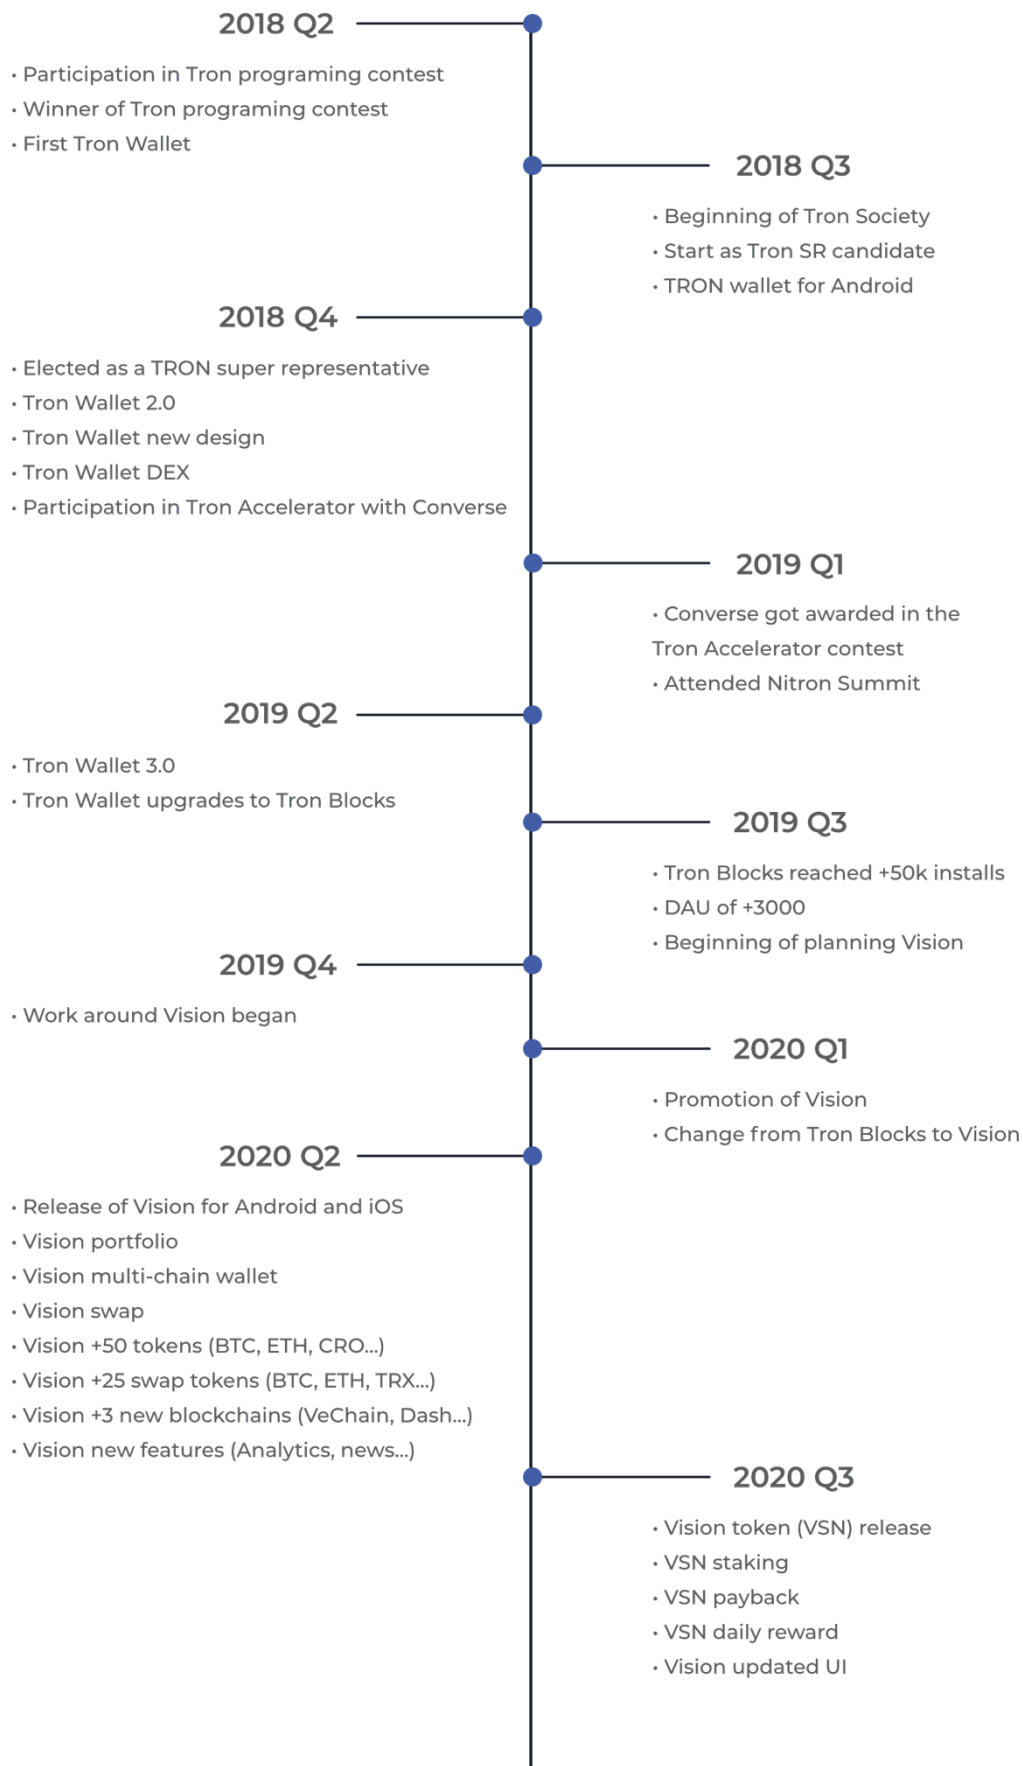

Vision Stake	Reward	PRO
0	1,00 % <small>Max. 0.5 USD</small>	1,20 % <small>Max. 0.6 USD</small>
1.000	2,00 % <small>Max. 1 USD</small>	2,40 % <small>Max. 1.2 USD</small>
10.000	4,00 % <small>Max. 2 USD</small>	4,80 % <small>Max. 2.4 USD</small>
100.000	8,00 % <small>Max. 4 USD</small>	9,60 % <small>Max. 4.8 USD</small>
1.000.000	16,00 % <small>Max. 8 USD</small>	19,20 % <small>Max. 9.6 USD</small>

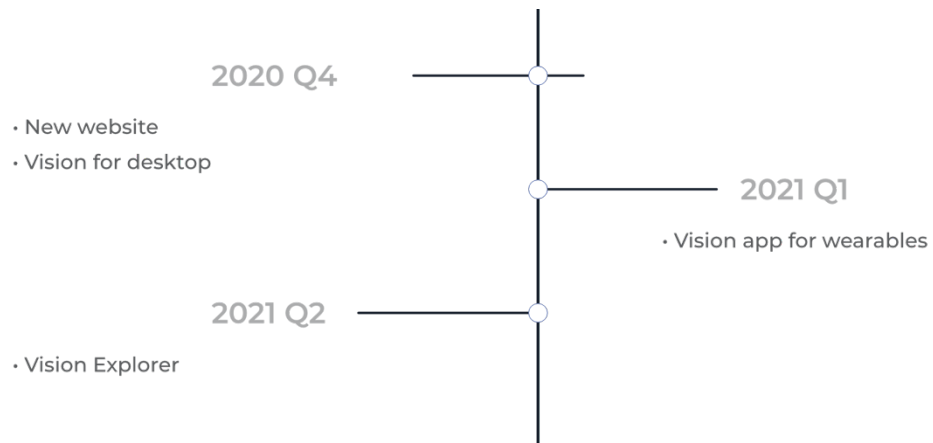

Swap

For each BTC, ETH and TRX swap you will receive a payback in VSN.

Swap		
Vision Stake	Reward	PRO
0	1,00 % <small>Max. 1 USD</small>	1,20 % <small>Max. 1.2 USD</small>
1.000	2,50 % <small>Max. 2 USD</small>	3,00 % <small>Max. 2.4 USD</small>
10.000	5,00 % <small>Max. 4 USD</small>	6,00 % <small>Max. 4.8 USD</small>
100.000	7,50 % <small>Max. 8 USD</small>	9,00 % <small>Max. 9.6 USD</small>
1.000.000	10,00 % <small>Max. 16 USD</small>	12,00 % <small>Max. 19.2 USD</small>

Roadmap

Team

Our team consists of 4 people who have together built up Vision. Each of us has been working in the crypto space for several years now, which has given us the opportunity to gain valuable experiences.

We all pursue the same goal and have the same beliefs. That is why the work between us works so well and a great group dynamic has developed.

Marius Gill (CEO and Co-Founder)

8 years software development experience, 3 years' experience in the field of blockchain and finances, founded his first company at the age of 20

Luca Marie Kliese (All-Round-Manager and Co-Founder)

Manager around finances, organization, goal setting,
Media Creator, founded her first company at the age of 20

Dave Broomfield (Community Manager)

Responsible for community interaction and community building, 7 years' experience in the field of blockchain

Pascal Ehis Akhidue (Software Developer)

8 years software development experience, certified software developer, responsible for the backend development

Glossary

Blockchain - It is a new technology that makes it possible to store, process, share and manage any kind of information in a publicly accessible database. In a continuous list of data records (called blocks) these are linked by cryptography.

Crypto Currency – A digital currency produced by a public network, rather than any government, that uses cryptography to make sure payments are sent and received safely.

Decentralization - Moving control from a single place to several smaller ones.

Fiat Money - Fiat money is government-issued currency that is not backed by a physical commodity, such as gold or silver, but rather by the government that issued it. The value of fiat money is derived from the relationship between supply and demand and the stability of the issuing government, rather than the worth of a commodity backing it as is the case for commodity money. Most modern paper currencies are fiat currencies, including the U.S. dollar, the euro, and other major global currencies.

Token - A token represents an asset, property or economic good. Tokens that are created use other existing block chains that are generated using standard templates, such as Smart Contracts on the Ethereum blockchain. Tokens are therefore Smart Contracts that are assigned a value or a function.

TRC-10 Token - TRC-10 is a technical token standard supported by the TRON blockchain natively. They have been available since the mainnet launch of Tron, when it moved from Ethereum to its own blockchain.
