

A CRYPTO FINTECH COMPANY

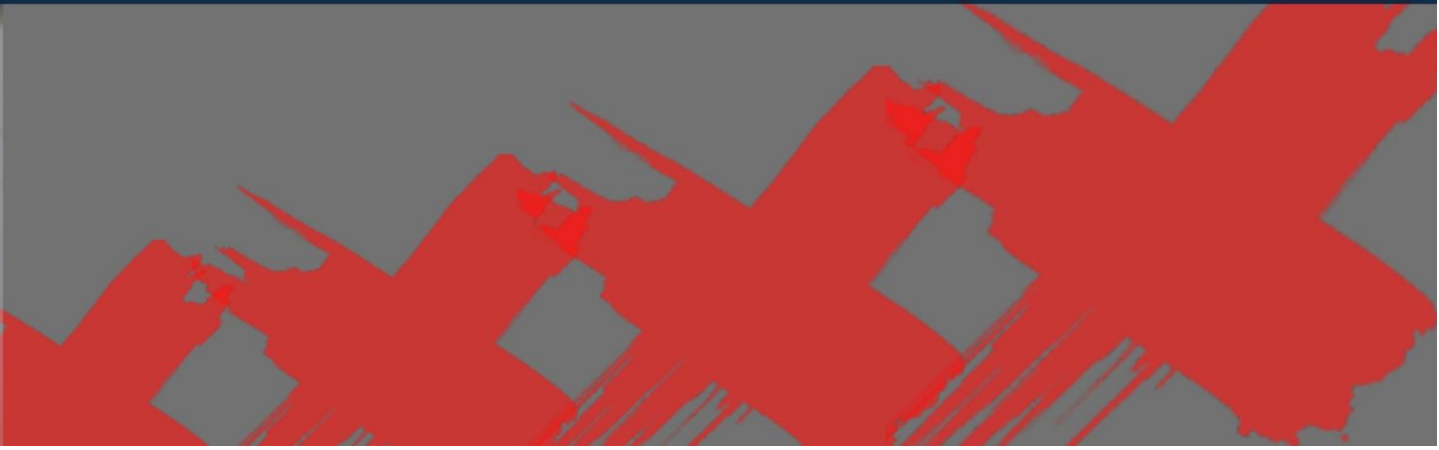

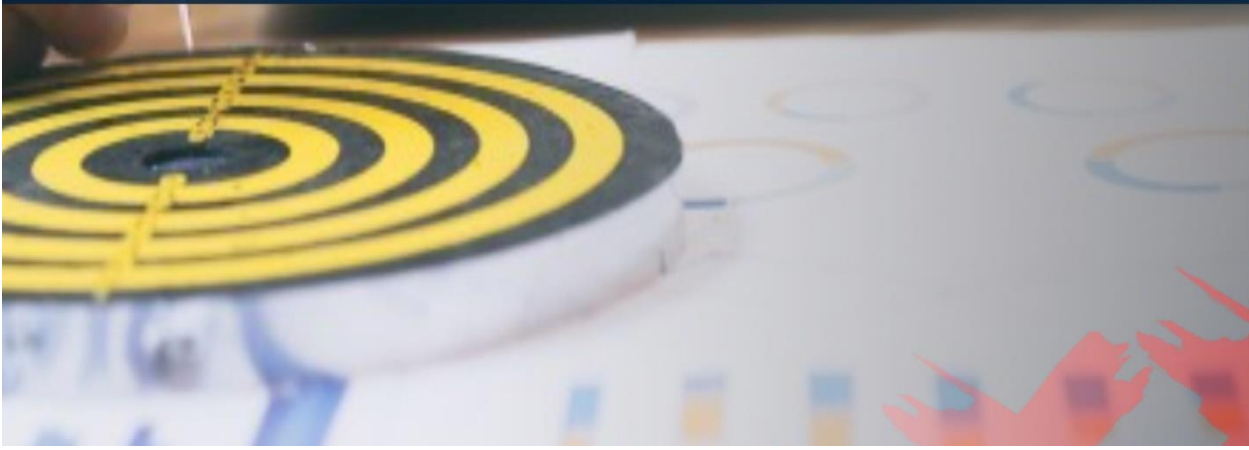

2020

WHITEPAPER
www.xtrm.world

ABOUT US

- We are a Crypto based Fintech company by the registered name of XTRM LLC, registered at USA. We are into utilization of Blockchain technology to bring a revolution in the Crypto space for all Crypto enthusiasts.
- Our main aim is to ensure minimal risk higher returns to our investors.
- In order to achieve this milestone we have developed our own Crypto arbitraging and FX software, through which we have been able to generate high returns with lowest possible risk.
- A company where Investors can invest in our projects through BTC/Ether/LTC. Our app is ISO 27001.2013 certified for the scope of Blockchain Technology Solution and Artificial Intelligence Software Development.

FROM THE **DESK** OF THE **CEO**

It is with great pleasure I introduce to you our novel XTRM project which is a subsidiary of it's preceding YoCoin Foundation. The XTRM project built on the YoCoin Blockchain was born out of the deepest desire to help provide an essence of financial stability and a turn-around to our investors via the utilization of an array of diverse products that are embedded on the XTRM market design. The Concept of XTRM is a necessity today in the Crypto space, as part of our vision is to bridge the gap between investors and the revolutionary concept of Blockchain technology. With the best set of minds working together and with the aid of the experiences acquired over the years, we are certain to bring about a turn around in the world of Crypto investment via the application of our array of products and creating a beneficial utility to our native XTRM tokens.

- PRESIDENT S. BANERJEE

CHAPTER 1

Concept of XTRM

Opportunities And Technology

OPPORTUNITIES

- In Q1 of 2020 over 70 million peoples are actively engaged in some kind of crypto currency holdings / transactions / trading / investment.
- Crypto Q1 2020 holds over 280 billion of market capitalization which surpasses most of countries annual GDP rate.
- Crypto still being developing day by day users are mostly dependant upon centralized system for their crypto activities like holding, trading, investment, gambling, international transfers etc.,
- XTRM seeks an opportunity to invade the crypto market with one stop decentralized thrustless solutions for above mentioned activities handing over the power of decentralization into users hand.
- XTRM introduces unique business model to enhance the decentralized crypto activities where it aims to bring financial freedom to its users under global recession due to lock down owing Corona Pandemic.

TECHNOLOGY

- XTRM uses own blockchain secured by over 800k minting servers around the globe rather than replying on ERC-20 or any such other based technology where systems like ERC-20 have seen large venerability towards security, transparency and transaction speed & cost.
- XTRM deploys YOC blockchain to run its main project where it can issue tokens build dapp & dex completely decentralized and transparent.
- XTRM also deploys bridge between YOC & Ethereum based projects like dapps, dex & DeFi.
- Currently YOC blockchain has hash rate of >169.91 TH/s

<input type="text" value="Tx Hash, Address, or Block #"/>					<input type="button" value="Search"/>
Current Block: 3045361	Gas Limit: 4,712,388 m/s	Block Time: 53 second(s)	Current Diff: 34.558 G	Hashrate: 169.910 TH/s	

Concept of XTRM

S.P.E of XTRM And Certification

WHAT IS THE S.P.E OF XTRM?

STRATEGY:

Our CEO Mr. Banerjee has started XTRM with a very clear vision & that is incoming one year, XTRM should be counted at least in the leading top 10 crypto exchanges.

PLANNING:

As we already have a strong marketing network based globally, what we have learned from our past experiences & getting implemented here in this platform as well, I.e.regular clear communication & updates, 24x7 Support Team, smooth & secured software, etc.

EXECUTION:

We already tied-up with exchanges like Vindax, Finexbox, Catex, etc. and many more to come very soon. We are already listed with "Coinmarketcap". We have already implemented regular, faster & automated ROI's just at one touch both from mobile app n web as well.

So in a word that our CEO believes and always communicate to us - **"We know better & we can do the best as a team"**

WE ARE A USA CERTIFIED FINTECH COMPANY

Hybrid wallet

Our hybrid wallet is an advanced AI wallet built on YoCoin blockchain technology and designed to handle millions of transactions in a few seconds. Our wallet affords you the benefit of making passive ROI simply by depositing your Crypto assets with us and watch you earn daily on those assets involved. Our wallet has integrated several Crypto assets deposit options which include; BTC, ETH, LTC, USDT, XRP, BNB, XTRM, and YOCOIN Tokens. We plan to incorporate other tokens as we progress providing several diverse options to our investors.

We have recently integrated the fiat option and have added USD providing a wide range of options and availability to make a deposit and earn passively. The concept of our Hybrid wallet helps solve the problem of having your Crypto assets stored on any third party digital wallets without any benefits accrued to having such deposits. Think of it like a bank that gives you interest over time based on the amount of money you have in your account balance, the same concept our hybrid wallet has integrated allowing you have interest on those deposits.

Keeping in mind that the rate at which you earn daily depends on the value of crypto-asset stored (ranges between 0.25% - 0.6%) which is locked for a period of 30 days after which you are allowed to remove your Crypto asset without incurring any termination fee as we believe this helps build the act of saving. Our hybrid wallet also avails you the opportunity of earning more passive ROI via our affiliate and referral system, with this carefully thought out organization, you can earn more simply by bringing in a member who signs up using your link and automatically becomes your downline and having some percentage accrued to you based on his deposit. You can refer to our compensation page for more information.

Our hybrid wallet gives you the flexibility of inter-converting any of your crypto assets after you make a deposit based on the lists of token options available on the wallet app. You can easily make a withdrawal at any point in time allowing our users to have a taste of the lightening experience of our novel Blockchain technology in terms of speed. The hybrid wallet is available both in the web version and mobile App format, you can decide to use either of these options as the web version is accessible via our website, the APP version is currently available on Playstore for Android and IOS version is already underway.

We know our hybrid wallet is one of its kind, and with the right utilization with other arrays of our products, earning passively would become an easy walk in the park.

XTRM Products Crypto Exchange

Cryptocurrency exchanges are online platforms in which you can exchange one kind of digital asset for another based on the market value of the given assets. It is important not to confuse cryptocurrency exchanges for cryptocurrency wallets or wallet brokerages. Cryptocurrency wallets and wallet brokerages generally allow you to buy and sell a small range of popular digital assets (Bitcoin and Ethereum), which you can then send to a different exchange to trade for other digital assets like altcoins.

XTRM Crypto Exchange is an advanced trading platform that avails it's users a smooth trading experience through a variety of trading pairs available giving a range of options that you can easily trade your digital assets against while ensuring a boost in the level of confidence utilizing our exchange platform.

TRADE ANYWHERE

XTRM is designed to offer maximum credibility to you while trading cryptocurrencies. Integrated with a secure multi-currency Wallet to buy, sell, and transact digital assets, XTRM is safe to use. Our goal is to provide an appropriate environment for cryptocurrency trading and enhance the global crypto market surpassing the existing limits.

Stay connected and trade anywhere, anytime! Access your account and be a part of the XTRM Community of crypto enthusiasts. We develop and maintain a robust relationship with our community members and provide exclusive service for specific trade accomplishments.

What is a Forex Trading Platform?

A forex trading platform is an online software which enables investors to access the foreign exchange market. It can be used to open, close and manage trades from the device of their choice and contains a variety of tools, indicators and timeframes designed to allow you to monitor and analyse the markets in real-time.

XTRM team with highly skill full and experienced developers and trades have been trading in Forex since 2009. Our traders trade manually as based on technical & fundamentals with partnered ECN brokers in Forex. XTRM uses Forex Expert Advisors based on MT4 & MT5 based on Trend, Correlation and hedging strategy to trade Forex fully automatic and generate profits most of our EA yield in a range of 15-40% monthly yield.

WHAT IS CRYPTO ARBITRAGE?

Cryptocurrency arbitrage is the simultaneous purchase and sale of a cryptocurrency to profit from an imbalance in price. It is a trade that profits by exploiting the price differences of the same asset on different cryptocurrency exchanges.

Cryptocurrency arbitrage can only exist as long as markets are not perfect. For example, an arbitrage opportunity is present when there is the opportunity to instantaneously buy something for a low price on one market and sell it for a higher price somewhere else.

Cryptocurrency arbitrage between different exchanges is the most obvious type of arbitrage, because it is very similar to fiat currency arbitrage (forex arbitrage) and sports arbitrage. The idea is simple: benefit from the differences in prices for the same coin but on different exchanges. For example, take a look at the different prices for Bitcoin in US dollars on different exchanges in the image above, where the price for 1 Bitcoin ranges between \$3,808 and \$11,552. In this example, you could profit from a 303% spread between exchanges by purchasing Bitcoin at \$3,808 and selling at \$11,552.

XTRM deploys crypto auto bot to find such crypto assets whose prices varies not less than 1% on different exchanges.

Our XTRM Arbitrage bot works 24/7, and in a fully automated mode to generate profits. Profits ranges from 1%-5% per trade though seems low, but many such opportunities are found in a single day.

A DApp, or Decentralized Application, is a software program that allows users to interact with a network like the Ethereum network. More specifically, a DApp is a user interface that allows users to interact with smart contracts stored on a distributed and decentralized peer-to-peer blockchain-based network like the Ethereum network.

Despite the name, the frontend of DApps are often not decentralized (they can be, but often aren't). While it can't be a DApp if the backend isn't utilizing a peer-to-peer distributed network like Ethereum's, the front end of DApps are often web-based and therefore built using web programming languages and stored on a central server. In other words, the name DApp can be used to describe applications that have varying levels of decentralization in practice.

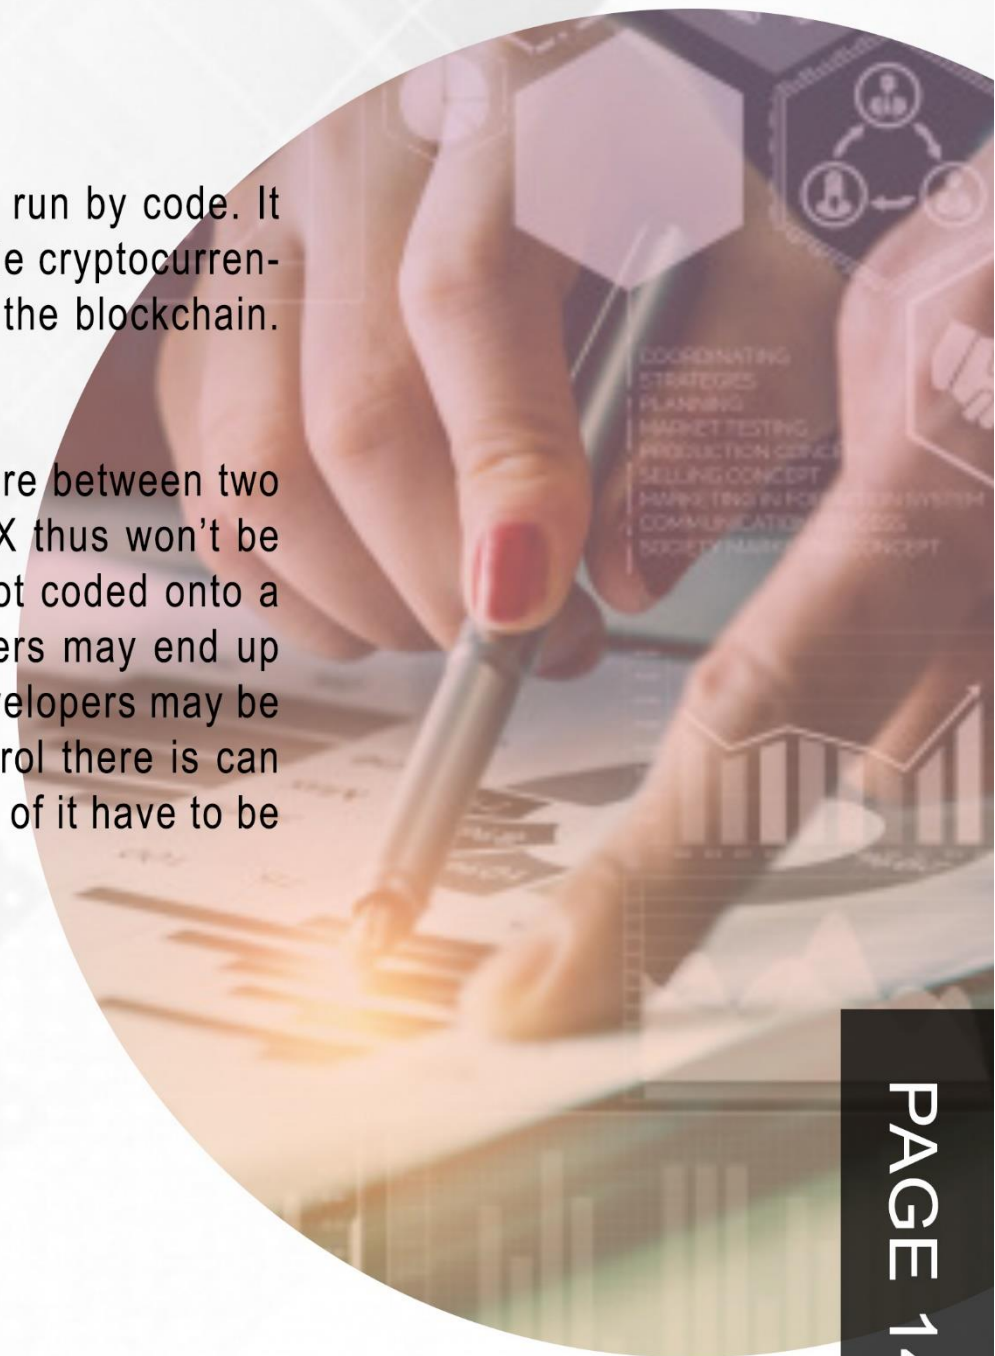

XTRM uses DAPP based on various technology including Ethereum, Tron, EOS, NEO & IOST to build its DAPP featuring :

- a. Crypto Network plans
- b. Crypto Investments
- c. Crypto Gaming & Gambling
- d. Crypto Socials
- e. Crypto Bank / De-FI – Decentralized finance for lending & staking.

In Cryptocurrency, a DEX is a Decentralized peer-to-peer Exchange. It is an exchange run by code. It usually exists as a decentralized application (DApp). It is a place where people can trade cryptocurrencies directly without a middleman. On a DEX, every transaction is generally written to the blockchain. The DEX replaces the need for a centralized exchange to act as a middleman.

Although generally a DEX will have no middleman when it comes to trades (all trades are between two peers), there are generally developers who manage the platform and aspects of a DEX thus won't be fully decentralized. In general a DApp needs a front end, and that front end is often not coded onto a blockchain, and thus must be managed to some degree. Likewise, a team of developers may end up working on the code, and who works on the code may be controlled by a team. Also, developers may be able to do things like add and remove coins for trade. In sum, how much outside control there is can differ by exchange, but since the code had to be created by someone and since aspects of it have to be managed, in general a DEX is not fully decentralized, just specifically the trading is.

Fully automated non-human based DEX is being built by XTRM for various crypto to be exchangeable between each other including non-Ethereum based crypto like bitcoin, Litecoin, monero, etc by converting them into DAO with flat USD live price. Such DEX would help users to convert cryptos flawlessly

XTRM Products

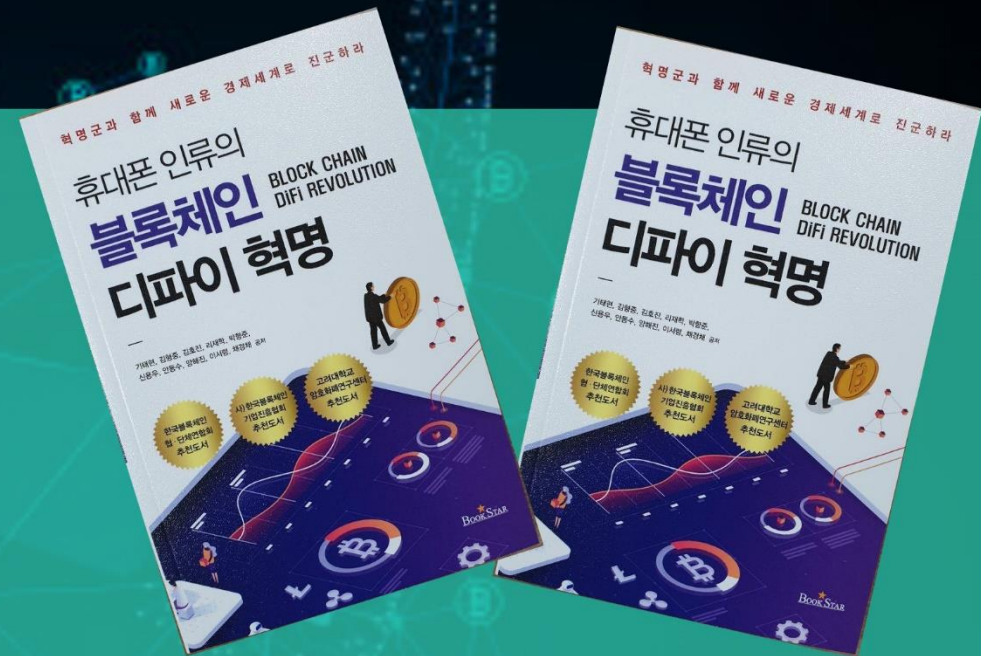

Crypto Banking & De-fi

Rather than mistaking the term 'banking' for an institution, think of it as a process. Crypto banking is the process by which cryptocurrencies can flow into the market and can be exchanged to facilitate transactions of all kinds. Crypto banks are platforms such as cryptocurrency apps that allow cryptocurrency holders to store their crypto assets, as well as use them to make everyday payments.

Crypto exchanges serve as a pseudo or rather as a new kind of bank for crypto, an effective alternative banking system for the people's money. Another crucial part of crypto banking is crypto wallets are a crucial part of crypto banking, as banking consists of other things like lending, storing, and borrowing.

XTRM Crypto Bank is an innovation project by XTRM, where users can store over 100 different cryptocurrencies under a single wallet and transact with them. XTRM also provides between 1% to 13.5% on different cryptocurrencies just for holding them with XTRM

crypto bank. XTRM crypto bank works in conjunction with De-Fi to decentralize its funds and earn dividends which are then distributed to all users of crypto banks. XTRM crypto bank works in a trust-less manner with 100% fund backed up in USDT.

De-Fi is a new style of decentralized crypto banking where De-Fi stands for Decentralized-Finance. Using De-Fi XTRM will be conducting banking stuff like staking, lending, and borrowing of crypto like BTC, eth, etc, xrm, etc against stable USDT, USDC & DAO. Users can earn % profits by lending users who need to borrow whereas borrowers get a loan against his crypto assets for a given period of time with interest %.

In De-Fi being decentralized both parties lender and borrowers are safe guaranteed against any defaults.

In such conditions of lockdown, online games & gambling remains highly used applications around the globe.

XTRM has been deploying over 7 games including flip, dice, solitaire, roll and many more with fair betting the system from randomly generated numbers from blockchain with instant results and pay-outs. Since Decentralized gaming & gambling remains 100% risks free, we expect to bring over 100k users to our gaming and gambling platform.

A single online platform offering Hotels, Flights, Holidays, Mobile recharges, DTH recharges, Utility bill payments with tangible products like clothes, shoes, jewelry, cell phones to power banks, from toys to electrical gadgets; XTRM would offer a range of 1.6 million products with worldwide delivery.

XTRM will launch its single one-stop platform for all products with online payment options to pay using its own token, BTC, eth, etc including debit/credit cards, PayPal, etc,.

During the phase of Pandemic, such an online store would definitely make its way in traditional markets with the power of decentralization.

As part of our commitment to developing the Xtrm project and showcasing our diversities, we have launched TOKEN-GIANTS. With TOKEN-GIANTS, Token creation has become easier simply by utilizing our own novel YoCoin Blockchain Technology.

You can easily create your own Token in just one minute or your individualized Blockchain project without the aid of any Developer and at a free service offered by our own very TOKEN-GIANT PLATFORM.

The XTRM team is committed to giving you the best as we unveil more of our eye-catching products. It's just a matter of time, the team is dedicated to making our platform a cynosure that will attract more investors from both far and near.

Visit Token-Giants today at

Those who invented film did not intend to make it a personal or individual experience. From the very beginning, film was always exhibited to audiences comprising varying numbers of groups of viewers. From the family to small closed venues, to the nickelodeons, to designated film theatres, to larger and more sophisticated film houses and on to present day multiplexes, film viewing has remained a collective audience experience. Although more films are watched at the personal and family levels due to the emergence of digital video, the cinematic experience, will of necessity, entail a degree of social interaction.

With XTRM CINEMATICS, digital entertainment just got easier as XTRM strive to deliver streams of informative and pleasurable experience to her audience via real life and fictional events. Our media entertainment will also employ Webseries, deterring any limitations of our media products to our audience and getting a wide base audience that will foster more awareness and knowledge of XTRM products as a whole.

Over 200 million people work in the travel and tourism industry worldwide. Tourism simply entails people traveling from where they live for the purpose of business, adventure, recreation and leisure.

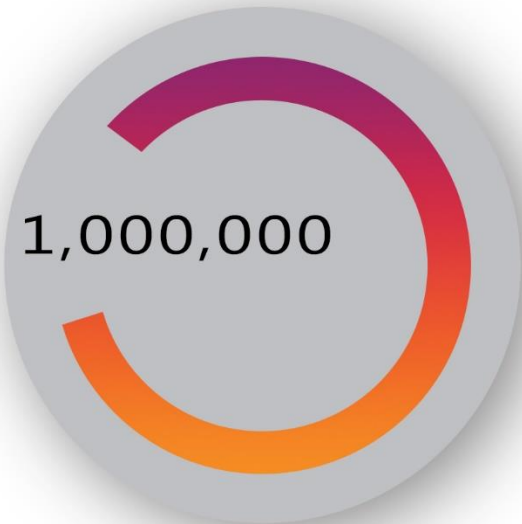

With XTRM Travel and Tourism, you can be guaranteed the best service and pleasurable experience traveling around the world or to places of interest, while taking advantage of an array of services that will be profered by our platform. We are working on integrating more utility to our native XTRM tokens by accepting it as a mode of payment involved in your tours. With XTRM travel and Tourism, recreation just got easier.

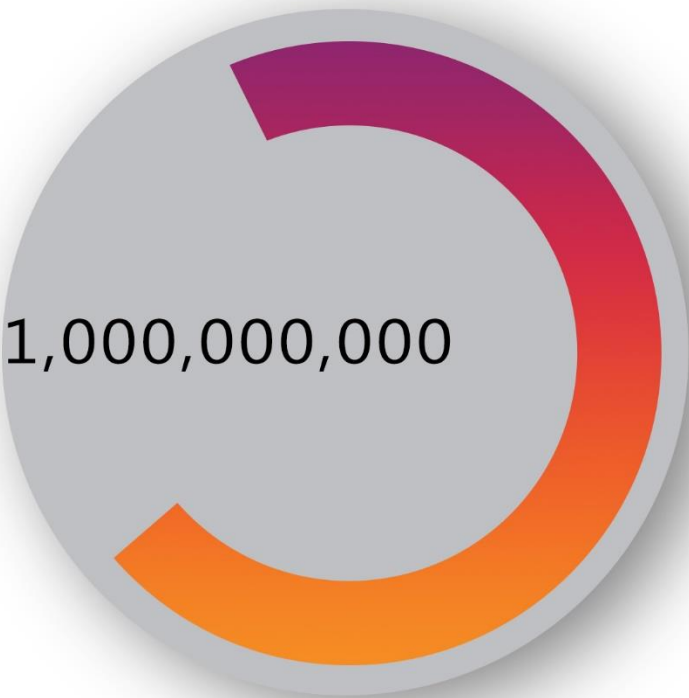

Crypto casino also known as Decentralized betting is one of the developed technology of blockchain. As it is, the gaming industry has swiftly changed gears from the conventional traditional to blockchain-based casinos that operate on different networks, including BTC, ETH, and EOS. Most new players are intrigued to join the crypto casino online platform due to the welcome reward available for signup.

With XTRM Crypto casino, betting and gambling have become easier and less risky due to the risk-check measures that will be put in place to mitigate these setbacks. Another advantage of using our online gambling platform is the joy of privacy, which is made possible by the power of decentralization as users don't have to give out their info while placing bets.

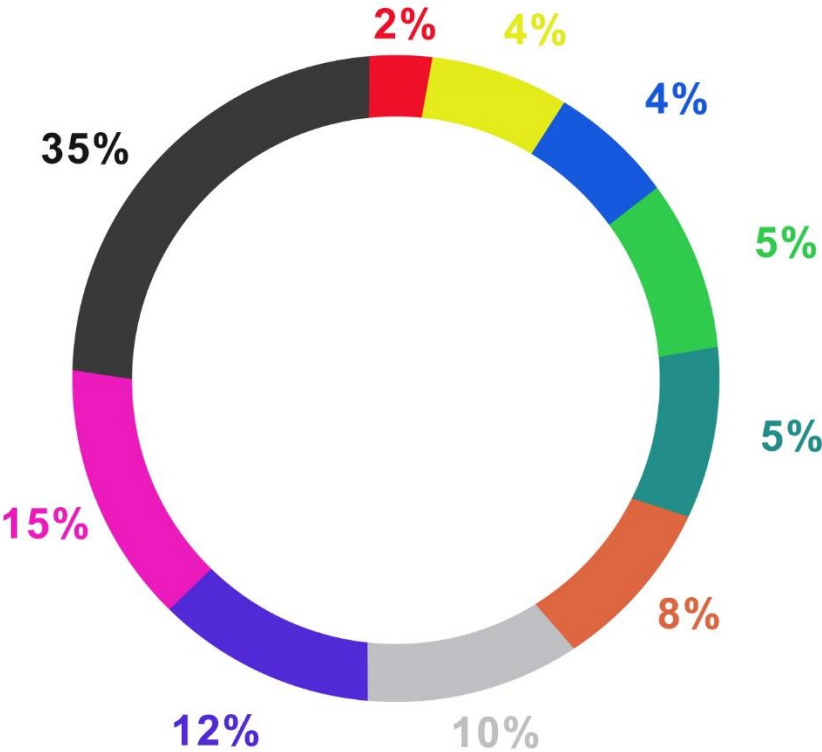

XTRM TOKEN METRICS

CIRCULATING SUPPLY

TOTAL SUPPLY

TOKEN ALLOCATION

XTRM tokens built on the YO-BLOCKCHAIN has been designed to serve as a store of value and enhance utility based on the diversity of our products yet to be launched. Holding XTRM tokens would be holding digital gold as these our native token would be a major gateway to accessing most of your products, and this we believe would be a major contributor to making our native token the precious Gem all investors would want to acquire.
